The Thought of Gregory the Great

G. R. EVANS

Gregory the Great was, after Augustine of Hippo, perhaps the most influential of the Fathers in the Latin West during the Middle Ages. This study looks at Gregory's thought as a whole and tries to show what was most important to him and the way he arrived at a balance between the active and the contemplative, the 'outward' and the 'inward' in his own mind. There is a tailpiece on the influence of his ideas in later centuries.

The Victorian Christian Socialists

EDWARD NORMAN

Victorian Christian Socialism began as a protest against industrial evils by a group of Anglicans and soon their ideals began to spread to other Churches, although not as a systematic 'movement'. Dr Norman here offers a history of Christian Socialism constructed around the most influential of its advocates. They are shown to have been ethical and educational reformers rather than politicians, but in their ability to stand outside the common assumptions and prejudices of their day they achieved social criticism of lasting value.
