“In *Planet in Peril*, Michael Bess brings his singular voice, intellectual courage, and good judgment to bear on the four mega-dangers facing humankind – climate change, nuclear weapons, pandemics, and artificial intelligence. He avoids the simplistic thinking that characterizes too much of the public debate on these issues and offers insightful, viable solutions. It is one of those rare books that is both a joy to read and a roadmap for solving daunting problems.”

Michael Vandenberg, *Vanderbilt University*

## ORIGINAL ARTICLES

- The Early Cretaceous tectonic evolution of the Neo-Tethys: constraints from zircon U-Pb geochronology and geochemistry of the Liuqiong adakite, Gongga, Tibet** 1647–1662  
*Yao Zhong, Wen-Guang Yang, Li-Dong Zhu, Long Xie, Yuan-Jun Mai, Nan Li, Yu Zhou, Hong-Liang Zhang, Xia Tong and Wei-Na Feng*
- Fluid evolution and ore genesis of Cu-Pb-Zn veins in the Panjiaduan deposit, Great Xing'an Range, NE China: evidence from fluid inclusion and H-O-He-Ar isotopes** 1663–1680  
*Qing-Fei Sun, Ke-Yong Wang, Feng-Yue Sun, Miao Zhang, Chen-Guang Zhao and Li-Xue Sun*
- Zircon geochronology and Hf isotopic study from the Leo Pargil Dome, India: implications for the palaeogeographic reconstruction and tectonic evolution of a Himalayan gneiss dome** 1681–1698  
*Shashi Ranjan Rai, Himanshu K. Sachan, Christopher J. Spencer, Aditya Kharya, Saurabh Singhal, Arun Kumar Ojha, Pallavi Chattopadhyaya and Pitambar Pati*
- Subduction-accretion complex with boninitic ophiolite slices and Triassic limestone seamounts: Ankara Mélange, central Anatolia** 1699–1726  
*Aral I Okay, Demir Altiner, Taniel Danelian, Gültekin Topuz, Ercan Özcan and Andrew RC Kylander-Clark*
- Methods for determining the characteristics of weathered granite reservoirs: application to Binxian Uplift, Dongying Sag, Bohai Bay Basin** 1727–1743  
*Xiaoke Li, Gang Chen and Shangzi Liang*
- Effect of inherited structural highs on the structure and kinematics of the South Dezful Embayment, SW Iran** 1744–1766  
*Aref Shamszadeh, Khalil Sarkarinejad, Oriol Ferrer, Soumyajit Mukherjee and Mohammad Seraj*
- Influence of multi-trend major fault reactivation during multiphase rifting: Beier Depression, Hailar Basin, NE China** 1767–1786  
*Rui Lou, Yonghe Sun, Tingen Fan, Hongjun Fan and Lu Liu*
- Zinc, sulfur and cadmium isotopes and Zn/Cd ratios as indicators of the origin of the supergiant Broken Hill Pb-Zn-Ag deposit and other Broken Hill-type deposits, New South Wales, Australia** 1787–1808  
*Paul G. Spry, Ryan D. Mathur, Graham S. Teale and Linda V. Godfrey*
- Petrology and Sr-Nd isotope geochemistry of Mosonik: a polygenetic phonolitic nephelinite-phonolite volcano located in the North Tanzanian Divergence of the East African Rift** 1809–1832  
*Roger H. Mitchell and J. Barry Dawson*

## DISCUSSION

- Discussion of Searle, 'Tectonic evolution of the Caledonian orogeny in Scotland: a review based on the timing of magmatism, metamorphism and deformation'** 1833–1836  
*John F. Dewey and Paul D. Ryan*

## DISCUSSION - REPLY

- Reply to Dewey and Ryan Comment on Searle, MP (2021) 'Tectonic evolution of the Caledonian orogeny in Scotland: a review based on the timing of magmatism, metamorphism and deformation'** 1837–1845  
*Michael P. Searle*
