

SUBSCRIPTION RATES

Subscription rates (post free) for volume 40 (2003) of the *Journal of Applied Probability* are as follows:

US\$223.00; \$A413.00; £145.50 for libraries and institutions;
US\$74.25; \$A137.75; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>). 0021-9002/03 \$00.70+ .20.

Research Papers

- 527 PHILIPPE PICARD, CLAUDE LEFÈVRE AND IBRAHIM COULIBALY. Problèmes de ruine en théorie du risque à temps discret avec horizon fini
- 543 PHILIPPE PICARD AND CLAUDE LEFÈVRE. Probabilité de ruine éventuelle dans un modèle de risque à temps discret
- 557 OTSO OVASKAINEN AND STEPHEN J. CORNELL. Biased movement at a boundary and conditional occupancy times for diffusion processes
- 581 BÁRBARA GONZÁLEZ-ARÉVALO AND GENNADY SAMORODNITSKY. Buffer content of a leaky-bucket system with long-range dependent input traffic
- 602 BYUNG CHUN PARK, JAE YOUNG PARK AND ROBERT D. FOLEY. Carousel system performance
- 613 SANDJAI BHULAI AND GER KOOLE. On the structure of value functions for threshold policies in queueing models
- 623 JAMES C. FU AND YUNG-MING CHANG. On ordered series and later waiting time distributions in a sequence of Markov dependent multistate trials
- 643 SUYONO AND J. A. M. VAN DER WEIDE. A method for computing total downtime distributions in repairable systems
- 654 YOSHIAKI ITOH AND HOSAM M. MAHMOUD. One-sided variations on interval trees
- 671 JEAN-FRANÇOIS MARCKERT AND ABDELKADER MOKKADEM. Ladder variables, internal structure of Galton–Watson trees and finite branching random walks
- 690 CHUNSHENG MA. Power-law correlations and other models with long-range dependence on a lattice
- 704 KRZYSZTOF DĘBICKI AND MICHEL MANDJES. Exact overflow asymptotics for queues with many Gaussian inputs
- 721 HENRY W. BLOCK, YULIN LI AND THOMAS H. SAVITS. Initial and final behaviour of failure rate functions for mixtures and systems
- 741 Y. H. WANG, HSIAO-FEN CHANG AND SHUN-YI CHEN. Convergence theorems for the lengths of consecutive successes of Markov Bernoulli sequences
- 750 M. ISPÁNY, G. PAP AND M. C. A. VAN ZUIJLEN. Asymptotic inference for nearly unstable INAR(1) models
- 766 MARCUS A. AGUSTIN. Statistical properties of a system reliability estimator using the Littlewood software reliability model.

Short Communications

- 779 PETER NEAL. SIR epidemics on a Bernoulli random graph
- 783 ERIK EKSTRÖM. Perpetual American put options in a level-dependent volatility model
- 790 HOSAM M. MAHMOUD. Mixed distributions in Sattolo's algorithm for cyclic permutations via randomization and derandomization
- 797 ALLAN GUT. On the moment problem for random sums
- 803 JINWEN CHEN. From the central limit theorem to heavy-tailed distributions
- 807 S. N. U. A. KIRMANI AND JACEK WESOŁOWSKI. Time spent below a random threshold by a Poisson driven sequence of observations
- 815 OLIVIER PERRIN AND WENDY MEIRING. Nonstationarity in \mathbb{R}^n is second-order stationarity in \mathbb{R}^{2n}
- 821 DAMIAN CLANCY AND PHILIP K. POLLETT. A note on quasi-stationary distributions of birth–death processes and the SIS logistic epidemic
- 826 H. N. NAGARAJA AND GADI BARLEVY. Characterizations using record moments and in a random record model and applications

Letter to the Editor

- 834 ULRICH HERKENRATH, MARIUS IOSIFESCU AND ANDREAS RUDOLPH. A note on invariance principles for iterated random functions
