## Practical Problems in Clinical Psychiatry

Edited by **Keith Hawton  
and Philip Cowen**

Here, leading practitioners in the field of psychiatry consider important problems that face clinicians working with psychiatric patients. Practical guidance on treatment issues in relation to these problems is provided on the basis of scientific and clinical evidence. This complements perfectly the earlier, well received volume by the same authors: *Dilemmas and difficulties in the management of psychiatric patients*.

## Clinical Diversity in Late Onset Alzheimer's Disease

**Alistair Burns and  
Raymond Levy**

This book presents a unique insight into the clinical features and prognosis of late onset Alzheimer's disease and provides a summary of the results of a longitudinal study of patients suffering from senile dementia of the Alzheimer type. Various aspects of late onset Alzheimer's disease are examined in depth, including psychiatric symptoms, behavioural disturbances, neurological signs, and patterns of survival.

## Male Victims of Sexual Assault

Edited by **Gillian C.  
Mezey and Michael B.  
King**

The first book of its kind, *Male Victims of Sexual Assault* opens the debate on male sexual assault with reports from international experts in the field. Mezey brings together data, theoretical perspectives, and implications for future practice and policy. Essential reading for anyone interested in this increasingly 'hot' topic.
