**Dr Edwin Trevathan**, School of Public Health at Saint Louis University, USA

**Dr Mark Vickers**, Liggins Institute, University of Auckland, New Zealand

**Dr Melissa Westwood**, Maternal and Fetal Health Research Group, University of Manchester, UK

# About the International Society for Developmental Origins of Health and Disease

The Society (Registered Charity Number 1116722) was set up to promote research into the fetal and early-life origins of disease and involves scientists from many backgrounds. Full details can be found at: [www.dohadsoc.org](http://www.dohadsoc.org)

## Aims of the Society

- To promote the co-ordination of a research strategy in different countries, for the scientific exploration of early human development in relation to chronic disease in later life
- To promote the development and application of public health strategies to prevent chronic disease
- To advocate for the need for funds from governmental and non-governmental sources for research in the developmental origins of health and disease
- To champion training opportunities for scientists and clinicians
- To foster regular meetings to discuss research findings and potential intervention
- To promote the interchange of ideas, staff and expertise between laboratories across the world
- To make representations to government, NGOs and other relevant agencies concerning the health implications of DOHaD

The Society is governed by an executive committee (“Council”) comprising President, Secretary and Treasurer, seven trustees, and an advisory committee of up to 24 members representing regions of the world and scientific specialties. Members of Council are chosen by a vote by all members of the Society and serve for a term of three years.

## Advantages of membership

- Opportunity to join an international scientific network which promotes an interdisciplinary and integrative approach to research
- Subscription to *Journal of Developmental Origins of Health and Disease (J DOHAD)*
- Two-monthly newsletter highlighting hot topics and current research initiatives across the field
- Preferential registration rates at the two-yearly DOHaD World Congress
- Eligibility to apply for financial support for workshops and advertising space for workshops on the website
- Details of relevant workshops, meetings and conferences on the website
- A password-protected section of the website, giving members’ key publications and contact details

## MANUSCRIPT SUBMISSION NOW ONLINE!

Submission to *Journal of Developmental Origins of Health and Disease* is exclusively via the web-based peer review system, ScholarOne Manuscripts.

### Benefits include:

- Rapid review process
- Online submission and tracking
- Worldwide 24/7 availability
- Access to all information in one place
- Prompt communication via e-mail

We invite all authors to submit online any NEW MANUSCRIPTS that are to be considered for publication in *Journal of Developmental Origins of Health and Disease*.

Bookmark the ScholarOne Manuscripts page now for future reference!
