LOGAN TURNER PRIZE.

We should like to call attention to this prize, for which essays should be sent in by June 30th, 1938, to the Editor of the *Journal of Laryngology and Otology*. The subject for this prize is "Experimental Work on the Lymphatics of the Nose, Accessory Sinuses and Pharynx."

Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
