528 Mechanism of frequency lock-in in transonic buffeting flow
C. Gao, W. Zhang, X. Li, Y. Liu, J. Quan, Z. Ye & Y. Jiang

S 562 Numerical investigation of multiple-bubble behaviour and induced pressure in a megasonic field
N. Ochiai & J. Ishimoto

S 595 Nonlinear waves with a threefold rotational symmetry in pipe flow: influence of a strongly shear-thinning rheology
E. Plaut, N. Roland & C. Nouar

623 Turbulent channel flow of a dense binary mixture of rigid particles
I. Lashgari, F. Picano, P. Costa, W.-P. Breugem & L. Brandt

646 Influence of turbulent fluctuations on detonation propagation
B. McN. Maxwell, R. R. Bhattacharjee, S. S. M. Lau-Chapdelaine, S. A. E. G. Falle, G. J. Sharpe & M. I. Radulescu

697 Turbulence in a box: quantification of large-scale resolution effects in isotropic turbulence free decay
M. Meldi & P. Sagaut

716 Formation of sediment patterns in channel flow: minimal unstable systems and their temporal evolution
A. G. Kidanemariam & M. Uhlmann

744 Flow and fouling in membrane filters: effects of membrane morphology
P. Sanaei & L. J. Cummings

772 Extreme vortex states and the growth of enstrophy in three-dimensional incompressible flows
D. Ayala & B. Protas

807 Mixing of the fluid phase in slowly sheared particle suspensions of cylinders
K. Thøgersen & M. Dabrowski

838 Yield-stress fluid deposition in circular channels
B. Laborie, F. Rouyer, D. E. Angelescu & E. Lorenceau

JFM Rapids (online only)

R1 Effect of isolated roughness element height on high-speed laminar–turbulent transition
D. Estruch-Samper, R. Hillier, L. Vanstone & B. Ganapathisubramani

S R2 Capillary rise of non-aqueous liquids in cellulose sponges
J. Kim, J. Ha & H.-Y. Kim

R3 Transitional behaviour of convective patterns in free convection in porous media
H. Karani & C. Huber

R4 Mixing in continuous gravity currents
D. Sher & A. W. Woods

S indicates supplementary data or movies available online.

818 ISSN 0022-1120
Journal of Fluid Mechanics 10 May 2017

1 Footprints of a flapping wing
J. Zhang

5 From red cells to soft lubrication, an experimental study of lift generation inside a compressible porous layer
T. Gacka, Z. Zhu, R. Crawford, R. Nathan & Q. Wu

26 Rough-wall turbulent boundary layers with constant skin friction
A. Sridhar, D. I. Pullin & W. Cheng

46 Convection from a line-source into a two-layer stratified ambient fluid
Y. Ma, M. R. Flynn & B. R. Sutherland

68 Dynamics of a small gap gas lubricated bearing with Navier slip boundary conditions
N. Y. Bailey, S. Hibberd & H. Power

100 Dynamics of an elastic sphere containing a thin creeping region and immersed in an acoustic region for similar viscous-elastic and acoustic time and length scales
Y. Friedman & A. D. Gat

116 Size and shape of shock waves and slipline for Mach reflection in steady flow
C.-Y. Bai & Z.-N. Wu

141 The topology of gas jets injected beneath a surface and subject to liquid cross-flow
S. A. Mäkiharju, I.-H. R. Lee, G. P. Filip, K. J. Maki & S. L. Ceccio

184 Normalized dissipation rate in a moderate Taylor Reynolds number flow
A. J. Puga & J. C. LaRue

205 Spin-down in a rapidly rotating cylinder container with mixed rigid and stress-free boundary conditions
L. Oruba, A. M. Soward & E. Dormy

241 Complex solutions of the Dean equations and non-uniqueness at all Reynolds numbers
F. A. T. Boshier & A. J. Mestel

260 Three-dimensional wake transition for a circular cylinder near a moving wall
H. Jiang, L. Cheng, S. Draper & H. An

288 On the non-parallel instability of the rotating-sphere boundary layer
A. Segalini & S. J. Garrett

319 Short-wavelength local instabilities of a circular Couette flow with radial temperature gradient
O. N. Kirillov & I. Mutabazi

344 Euler and Navier–Stokes equations in a new time-dependent helically symmetric system: derivation of the fundamental system and new conservation laws
D. Dierkes & M. Oberlack

366 Local flow characterization using bioinspired sensory information
B. Colvert, K. Chen & E. Kanso

382 Unsteadily manipulating internal flow barriers
S. Balasuriya

407 Hydrodynamic force on a sphere normal to an obstacle due to a non-uniform flow
B. Rallabandi, S. Hilgenfeldt & H. A. Stone

435 Performance and mechanism of sinusoidal leading edge serrations for the reduction of turbulence–aerofoil interaction noise
P. Chaitanya, P. Joseph, S. Narayanan, C. Vanderwel, J. Turner, J. W. Kim & B. Ganapathisubramani

465 Direct numerical simulation of triboelectric charging in particle-laden turbulent channel flows
H. Grosshans & M. V. Papalexandris

492 Nonlinear regimes of spanwise modulated waves in plane Poiseuille flow
H. G. Silva & M. A. F. Medeiros
