

Directions to Contributors - Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of the *Proceedings* (February), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax) or i.sambrook@nutsoc.org.uk (e-mail).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *Proceedings* is printed in double-column format (column width of 85 mm) with a text area of 235 x 177 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. The original illustrations should accompany the manuscript for submission. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Hollman PCH, Devries JHM, Vanleeuwen SD, Mengelers MJB & Katan MB (1995) Absorption of dietary quercetin glycosides and quercetin in healthy ileostomy volunteers. *American Journal of Clinical Nutrition* **62**, 1276-1282.

Elia M (1992) Organ and tissue contribution to metabolic rate. In *Energy Metabolism: Tissue Determinants and Cellular Corollaries*, pp. 61-77 [J Kinney and H Tucker, editors]. New York: Raven Press.

Wilmore JH & Costill DL (1994) *Physiology of Sport and Exercise*. Champaign, IL: Human Kinetics.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The Proceedings of the Nutrition Society, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Manuscripts. Three complete copies of the manuscript together with the original artwork should be submitted to:

Contents

Trinity College, Dublin, 16–18 June 1997

Symposium on 'Nutritional aspects of exercise'

Chairs: M. J. Gibney, *Trinity College, Dublin*; R. Maughan, *University Medical School, Aberdeen*; I. Macdonald, *Nottingham*

Dietary macro- and micronutrient requirements of endurance athletes. <i>Clyde Williams</i>	1–8
Free radicals, exercise and antioxidant supplementation. <i>Mitchell Kanter</i>	9–13
The sports drink as a functional food: formulations for successful performance. <i>R. J. Maughan</i>	15–23
Influence of diet on the metabolic responses to exercise. <i>Lawrence L. Spriet & Sandra J. Peters</i>	25–33
Amino acid metabolism, branched-chain amino acid feeding and brain monoamine function. <i>P. M. Jakeman</i>	35–41
Nutrition, exercise and the immune system. <i>Bente Klarlund Pedersen, Kenneth Ostrowski, Thomas Rohde & Helle Bruunsgaard</i>	43–47
Use of endogenous carbohydrate and fat as fuels during exercise. <i>Wade H. Martin III & Samuel Klein</i>	49–54
The nutritional demands of very prolonged exercise in man. <i>Mike Stroud</i>	55–61
Exercise and postprandial lipid metabolism. <i>Adrienne E. Hardman & Sara L. Herd</i>	63–72
Effect of high-fat diets on exercise performance. <i>Bente Kiens & Jørn W. Helge</i>	73–75
The relationship between physical activity and food intake. <i>Neil A. King</i>	77–84
Exercise and obesity. <i>Tracy J. Horton & James O. Hill</i>	85–91
Exercise prescription for weight management. <i>Andrew P. Hills & Nuala M. Byrne</i>	93–103

University of Newcastle, 9–11 July 1997

Symposium on 'Early environmental, genetic and nutritional influences on adult disease'

Chair: C. J. Seal, *University of Newcastle*

Maternal nutrition, placental growth and fetal programming. <i>Keith Godfrey & Sian Robinson</i>	105–111
Glucocorticoids and the preparation for life after birth: are there long-term consequences of the life insurance? <i>Abigail L. Fowden, Juan Li & Alison J. Forhead</i>	113–122

(Contents continued facing inside back cover)
