

Instructions to authors

Detailed instructions to authors are available online here:
[cambridge.org/core/journals/journal-of-glaciology/information](https://www.cambridge.org/core/journals/journal-of-glaciology/information)

The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Letters are limited to five *Journal* pages and Correspondences to two (one *Journal* page = about 1000 words).

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English, not appropriate for the journal, or of inferior quality will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct in advance of online publication.

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
 - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
 - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise
- Abstract should be less than 200 words

- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
 - be one or two column widths: up to 85 mm or up to 178 mm
 - not be in boxes
 - use strong black lines (avoid tinting if possible)
 - use SI units in labels
 - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
 - be set in MathType or advanced equation editor
 - NOT be embedded as graphics in the text
- Tables should
 - be numbered in Arabic
 - be referred to in text (as Table 1 etc.)
 - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
 - be concise
 - be complete and accurate, including doi numbers
 - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
 - be arranged in alphabetical order by first author's surname
 - include works accepted but not published as 'in press'
 - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and £300 for a communication (of 2 published pages or fewer). IGS members receive a 10% discount on these charges.

Figures quoted here are correct for 2020.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of GLACIOLOGY

CONTENTS Vol 66 No 255 2020

1–10 **New insights into ice accumulation at Galena Creek Rock Glacier from radar imaging of its internal structure**

Eric Ivan Petersen, Joseph S. Levy, John W. Holt, Cassie M. Stuurman

11–24 **Modeling present and future ice covers in two Antarctic lakes**

Sebastián Echeverría, Mark B. Hausner, Nicolás Bambach, Sebastián Vicuña, Francisco Suárez

25–34 **Seasonal ice-speed variations in 10 marine-terminating outlet glaciers along the coast of Prudhoe Land, northwestern Greenland**

Daiki Sakakibara, Shin Sugiyama

35–48 **A full Stokes ice-flow model to assist the interpretation of millennial-scale ice cores at the high-Alpine drilling site Colle Gnifetti, Swiss/Italian Alps**

Carlo Licciulli, Pascal Bohleber, Josef Lier, Olivier Gagliardini, Martin Hoelzle, Olaf Eisen

49–60 **Formation and evolution of an extensive blue ice moraine in central Transantarctic Mountains, Antarctica**

Christine M. Kassab, Kathy J. Licht, Rickard Petersson, Katrin Lindbäck, Joseph A. Graly, Michael R. Kaplan

61–73 **Meltwater percolation, impermeable layer formation and runoff buffering on Devon Ice Cap, Canada**

David W. Ashmore, Douglas W. F. Mair, David O. Burgess

74–82 **A novel tilt sensor for studying ice deformation: application to streaming ice on Jarvis Glacier, Alaska**

Ian R. Lee, Robert L. Hawley, Steven Bernsen, Seth W. Campbell, David Clemens-Sewall, Christopher C. Gerbi, Kate Hruby

83–96 **Response of snowpack to +2°C global warming in Hokkaido, Japan**

Yuta Katsuyama, Masaru Inatsu, Tatsuo Shirakawa

97–112 **Dynamic simulations of Vatnajökull ice cap from 1980 to 2300**

Louise Steffensen Schmidt, Guðfinna Aðalgeirsdóttir, Finnur Pálsson, Peter L. Langen, Sverrir Guðmundsson, Helgi Björnsson

113–123 **Tides modulate crevasse opening prior to a major calving event at Bowdoin Glacier, Northwest Greenland**

Eef van Dongen, Guillaume Jouvét, Andrea Walter, Joe Todd, Thomas Zwinger, Izumi Asaji, Shin Sugiyama, Fabian Walter, Martin Funk

124–136 **Mass balance and area changes of glaciers in the Cordillera Real and Tres Cruces, Bolivia, between 2000 and 2016**

Thorsten Seehaus, Philipp Malz, Christian Sommer, Alvaro Soruco, Antoine Rabatel, Matthias Braun

137–152 **A Bayesian ice thickness estimation model for large-scale applications**

Mauro A. Werder, Matthias Huss, Frank Paul, Amaury Dehecq, Daniel Farinotti

153–165 **Antarctic ice-sheet structures retrieved from P-wave coda autocorrelation method and comparisons with two other single-station passive seismic methods**

Peng Yan, Zhiwei Li, Fei Li, Yuande Yang, Weifeng Hao

Letter

166–174 **Englacial drainage structures in an East Antarctic outlet glacier**

Thomas Schaap, Michael J. Roach, Leo E. Peters, Sue Cook, Bernd Kulesa, Christian Schoof

Published for the International Glaciological Society, Cambridge, UK
