EDITORIAL POLICY

Parasitology publishes original results from pure and applied studies of parasites and host-parasite relationships. In addition to papers describing the taxonomy, life-cycles and ecology of parasites, the editors will be pleased to consider reports of experimental work on biochemical, immunological and physiological aspects of parasitism and the chemotherapy of parasitic diseases. Contributors are strongly advised to prepare their typescripts in the manner set out in the *Instructions to Authors* which appears at the front of the first issue of each volume. The editors assume that papers submitted to *Parasitology* are not being considered for publication in other journals and do not contain material which has already been published.
