Health Care and Reform in Industrialized Countries

EDITED BY
MARSHALL W. RAFFEL

This timely volume examines the health care systems of Canada, Denmark, France, Germany, Japan, the Netherlands, New Zealand, Sweden, the United Kingdom,

and the United States. All democratic and affluent, with well-educated populations and high health standards, these countries have interacted with each other extensively over the years in commercial, cultural, and scientific affairs. The contributors, all resident health care experts, address here the ways in which their countries influence, and are influenced by, the health care systems of other countries studied here. They also examine their common problems—not least the increasing pressure to serve aging populations while maintaining economic balance.

Each covering a different country, the chapters detail the various components of national health care systems: the role, choices, and financial responsibility of the patient, physician training and influence, the organization and financing of hospitals, provisions for care of the elderly and mentally ill, public health services, the role of private health insurance, national health expenditures and efforts at cost containment, and the role of government. Each chapter is supplemented with a wealth of statistical data relevant to the respective country.

Contributors are Peggy Leatt, A. Paul Williams, Allan Krasnik, Signild Vallgård, Wolfgang Greiner, J.-Matthias v.d.Schulenburg, Marie-Pascal Pomey, Jean-Pierre Poullier, Toshitaka Nakahara, J. A. M. (Hans) Maarse, Claudia Scott, Stefan Håkansson, Sara Nordling, Peter R. Hatcher, Marshall W. Raffel, and Norma K. Raffel.

324 pages 19 illustrations \$19.95 paper
