The geometric figure on the cover, a four-dimensional polytope, was redrawn from the inside cover page of the celebrated book 'Regular Polytopes' by Harold Scott MacDonald Coxeter (1907–2003), one of the greatest geometers of the 20th century. Coxeter, a Fellow of the Royal Society of Canada and a Fellow of the Royal Society (London), joined the University of Toronto in 1936 and worked there enthusiastically for 60 years. Since 1978, the Canadian Mathematical Society has awarded the Coxeter-James Prize in his honor.

La figure géométrique sur la couverture, un polytope en dimension quatre, a été reprise du plat intérieur du célèbre ouvrage Regular Polytopes de Harold Scott MacDonald Coxeter (1907–2003), l'un des plus grands géomètres du XXe siècle. Membre de la Société royale du Canada et de la Royal Society (Londres), H.M.S. Coxeter s'est joint au corps professoral de l'Université de Toronto en 1936, où il a travaillé avec enthousiasme pendant 60 ans. Depuis 1978, la Société mathématique du Canada décerne le prix Coxeter-James en son honneur.

2022, 65/4

815	Commutativity via spectra of exponentials	*Rudi Brits, Francois Schulz, and Cheick Touré*
825	Maximal subgroups of nontorsion Grigorchuk–Gupta–Sidki groups	*Dominik Francoeur and Anitha Thillaisundaram*
845	On pull-backs of the universal connection	*Kristopher Tapp*
860	Spherical coverings and X-raying convex bodies of constant width	*Andriy Bondarenko, Andriy Prymak, and Danylo Radchenko*
867	Generalized torsion for knots with arbitrarily high genus	*Kimihiko Motegi and Masakazu Teragaito*
882	Independent transversals in bipartite correspondence-covers	*Stijn Cambie and Ross J. Kang*
895	A sharpened form of Adams-type inequalities on higher-order Sobolev spaces $W^{m,\frac{n}{m}}(\mathbb{R}^n)$: a simple approach	*Lu Chen, Guozhen Lu, and Maocun Zhu*
906	Arithmetic derivatives through geometry of numbers	*Hector Pasten*
924	Trudinger's inequalities for Riesz potentials in Morrey spaces of double phase functionals on half spaces	*Yoshihiro Mizuta and Tetsu Shimomura*
936	Kneser's theorem in σ-finite abelian groups	*Pierre-Yves Bienvenu and François Hennecart*
943	Matrix inequalities and majorizations around Hermite–Hadamard's inequality	*Jean-Christophe Bourin and Eun-Young Lee*
953	A note on spaces of almost periodic functions with values in Banach spaces	*Juan Matías Sepulcre and Tomás Vidal*
963	Corona and Wolff theorems for the multiplier algebra of Dirichlet–Morrey spaces	*Lian Hu, Songxiao Li , and Rong Yang*
976	Stieltjes interlacing of the zeros of j_n	*William Frendreiss, Jennifer Gao, Austin Lei, Amy Woodall, Hui Xue, and Daozhou Zhu*
994	A note on Mosco convergence in CAT(0) spaces	*A. Bërdëllima*
1004	Necessary and sufficient conditions on global solvability for the p-k-Hessian inequalities	*Jiguang Bao and Qiaoli Feng*
1020	Operator valued analogues of multidimensional Bohr's inequality	*Vasudevarao Allu and Himadri Halder*
1036	Some characterizations of ρ-Einstein solitons on Sasakian manifolds	*Dhriti Sundar Patra*
