JOURNAL of PALEONTOLOGY

VOL 97 | NO 4 | JULY 2023

REGULAR ARTICLES

- 777 Florentin Cailleux, Lars W. van den Hoek Ostende and Peter Joniak**
The late Miocene Erinaceidae and Dimylidae (Eulipotyphla, Mammalia) from the Pannonian region, Slovakia
- 799 Simon J. Braddy, Kenneth C. Gass and Michael Tessler**
Not the first leech: An unusual worm from the early Silurian of Wisconsin
- 805 Robert J. Elias and Roger A. Hewitt**
Corals and a cephalopod from the Whirlpool Formation (latest Ordovician, Hirnantian), Hamilton, Ontario: biostratigraphic and biogeographic significance
- 823 Javier H. Signorelli**
Catalogue of fossil genera of Mactridae (Mollusca: Bivalvia)
- 853 İzzet Hoşgör, İsmail Ö. Yılmaz and Sacit Özer**
The heterobranched subgenus *Trochactaeon* (*Trochactaeon*) in the Campanian (Late Cretaceous) of the northern Arabian Platform and its paleoenvironmental and paleobiogeographic implications
- 865 Sean R. Blackwell and Stephen R. Westrop**
A new Cambrian (Jiangshanian, Sunwaptan) trilobite fauna from Oklahoma and its biostratigraphic significance
- 891 Rui-Wen Zong**
Variation in eye lenses of two new Late Devonian phacopid trilobites from western Junggar, NW China
- 906 Noel J. Hernandez Gomez, Lisette E. Melendez, Whitney A. Lopic, Sarah L. Sheffield and Ronald D. Lewis**
Examining the ontogeny of the Pennsylvanian cladid crinoid *Erisocrinus typus* Meek and Worthen, 1865
- 914 Qiulai Wang, Yuping Qi and Le Yao**
Middle Visean (Mississippian) conodonts from shallow-water deposits in the Yashui section, Guizhou, South China, and their stratigraphic significance
- 927 Yi-Yang Cho and Cheng-Hsiu Tsai**
Crocodylian princess in Taiwan: Revising the taxonomic status of *Tomistoma taiwanicus* from the Pleistocene of Taiwan and its paleobiogeographic implications
- 941 Gerald Mayr and Andrew C. Kitchener**
Early Eocene fossils elucidate the evolutionary history of the Charadriiformes (shorebirds and allies)
- 956 Matthew T. Carrano, David R. Schwimmer, Jessica Nakano and Amanda Millhouse**
Transfer of the Cretaceous fossil vertebrate collection from Columbus State University to the Smithsonian's National Museum of Natural History
- Corrigendum**
- 958 Rui-Wen Zong**
Variation in eye lenses of two new Late Devonian phacopid trilobites from western Junggar, NW China – CORRIGENDUM
- 959 Thomas E. Guensburg, Rich Mooi and Nicolás Mongiardino Koch**
Crinoid calyx origin from stem radial echinoderms – CORRIGENDUM

Cover illustration: Cycloneuralia incertae sedis (left, right) and Palaeoscolecida incertae sedis (middle) from the Brandon Bridge Formation, Waukesha Lime and Stone Company quarry, Wisconsin. Braddy et al., Fig. 1.1, 1.2, 1.6.
