

GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)

CHARLOTTE AUERBACH J. R. S. FINCHAM

W. HAYES MARY F. LYON

R. RILEY A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

ASSISTANT EXECUTIVE EDITOR

J. O. BISHOP

Volume 13. 1969

CAMBRIDGE
AT THE UNIVERSITY PRESS
1969

PUBLISHED BY
THE SYNDICS OF THE CAMBRIDGE UNIVERSITY PRESS
Bentley House, 200 Euston Road, London, N.W. 1
American Branch: 32 East 57th Street, New York, N.Y. 10022

Printed in Great Britain at the University Printing House, Cambridge

CONTENTS

No. 1 (February 1969)

SAUNDERS, J. H. Changes in recombination and genetic disturbance on transferring the H_2Lc_2 linkage group from <i>Gossypium tomentosum</i> to <i>G. barbadense</i> and <i>G. hirsutum</i>	page 1
KRZANOWSKA, H. Factor responsible for spermatozoan abnormality located on the Y chromosome in mice	17
LAND, R. B. and FALCONER, D. S. Genetic studies of ovulation rate in the mouse	25
OHTA, TOMOKO and KIMURA, MOTOO. Linkage disequilibrium due to random genetic drift	47
STANISICH, VILMA and HOLLOWAY, B. W. Genetic effects of acridines on <i>Pseudomonas aeruginosa</i>	57
SOMERS, J. M. and BEVAN, E. A. The inheritance of the killer character in yeast	71
BEISSON, JANINE and ROSSIGNOL, MICHELE. The first case of linkage in <i>Paramecium aurelia</i>	85
LOUTIT, J. S. Investigation of the mating system of <i>Pseudomonas aeruginosa</i> strain 1. IV. Mapping of distal markers	91
RAICU, PETRE and DUMA, DOINDA. Cytogenetical study in <i>Spalax leucodon</i> Nordm. in Moldavia (Rumania)	99
CURNOW, R. N. and BAKER, L. H. A correction to our earlier paper on 'The effect of repeated cycles of selection and regeneration in populations of finite size'	105
WILKIE, D. and MAROUDAS, N. G. Induction of cytoplasmic respiratory deficiency in yeast by phenethyl alcohol	107
MEYNELL, G. G. Exclusion superinfection immunity and abortive recombinants in $I+ \times I+$ bacterial crosses	113

No. 2 (April 1969)

PIKE, DEREK J. A comparison of two methods for predicting changes in the distribution of gene frequency when selection is applied repeatedly to a finite population	117
KIMURA, MOTOO and CROW, JAMES F. Natural selection and gene substitution	127
HILL, W. G. On the theory of artificial selection in finite populations	143

HILL, W. G. The rate of selection advance for non-additive loci	page 165
YAMADA, YUKIO and BELL, A. E. Selection for larval growth in <i>Tribolium</i> under two levels of nutrition	175
BYRNE, BARBARA J. Kappa, mu and the metagon hypothesis in <i>Paramecium aurelia</i>	197
DICKINSON, A. G. and MEIKLE, VERONICA M. H. A comparison of some biological characteristics of the mouse-passages scrapie agents, 22A and ME7	213
GLOVER, S. W. and COLSON, C. Genetics of host-controlled restriction and modification in <i>Escherichia coli</i>	227

No. 3 (June 1969)

DOWRICK, G. J. and EL BAYOUMI, A. S. Nucleic acid content and Chromosome morphology in <i>Chrysanthemum</i>	241
HUNT, DAVID N. and BURNET, BARRIE. Gene-environment interactions of the <i>eyeless</i> mutant in <i>Drosophila melanogaster</i>	251
RICHMOND, M. H. and JOHNSTON, JOAN. The reversible transition of certain genes in <i>Staphylococcus aureus</i> between the integrated and the extra-chromosomal state	267
JOHNSON, D. R. Brachyphalangy, an allele of extra-toes in the mouse	275
VYSE, E. R. and NASH, DAVID. Nutritional conditional mutants of <i>Drosophila melanogaster</i>	281
CURTIS, C. F. The production of partially sterile mutants in <i>Glossina austeni</i>	289
SRB, ADRIAN M. and BASL, MARY. The isolation of mutants affecting ascus development in <i>Neurospora crassa</i> and their analysis by a zygote complementation test	303
HUNT, DAVID M. Gene-environment interactions of the <i>eye-gene</i> mutant in <i>Drosophila melanogaster</i> and a comparison with <i>eyeless</i>	313
EDWARDS, SUSAN and MEYNELL, G. G. I sex factors and chromosomal recombination in <i>Salmonella typhimurium</i>	321
THOMPSON, JAMES N. JUN. and BRAVER, GERALD. Lethal effect of attached-X deletion in <i>Drosophila melanogaster</i>	325
PARMA, DAVID H. Acriflavin resistant <i>rII</i> deletions of bacteriophage T4	329

PLATES should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

DIAGRAMS should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

TABLES should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

FOOTNOTES should be avoided where possible. They can often be incorporated into the text, in parentheses.

SYMBOLS. Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

SPELLING should follow the *Concise Oxford Dictionary*.

REFERENCES should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (fourth edition).

PROOFS. Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

OFFPRINTS. Fifty offprints of each paper, including short papers, are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.

GENETICAL RESEARCH

VOLUME 13, NUMBER 3, JUNE 1969

CONTENTS

DOWRICK, G. J. and EL BAYOUMI, A. S. Nucleic acid content and Chromosome morphology in <i>Chrysanthemum</i>	page 241
