## The Poetics of Imitation

Anacreon and the Anacreontic Tradition  
PATRICIA A. ROSENMEYER

Once thought to be the work of the archaic Greek poet Anacreon, the collection of so-called anacreontic poems were considered unworthy of attention when revealed to be late Hellenistic and early Roman imitations by anonymous writers. This book, the first full-length treatment of the corpus, explores the complex poetics of imitation which inspired anacreontic composition for so many centuries in antiquity.

## In and Out of the Mind

Greek Images of the Tragic Self  
**Ruth Padel**

The representations of mind in Greek tragedy are central to Western views of inwardness. In this wide-ranging work Ruth Padel relates ancient tragedy to the biology and daemonology of the time, exploring Greek conceptions of the human interior and the ways in which Greek tragic literature shaped how we speak about our inner selves today.

**"[Ruth Padel] has made what seems to me one of the most important contributions to the understanding of early Greek thought, and therefore to the origins of later Greek thought, that have appeared during the last fifty years . . . ."**—*Sir Hugh Lloyd-Jones, formerly Regius Professor of Greek, Oxford University*

## Homer's Ancient Readers

The Hermeneutics of Greek Epic's Earliest Exegetes

Although the influence of Homer on Western literature has long commanded critical attention, little has been written on how various generations of readers have found meaning in his texts.

These seven essays explore the ways in which the *Iliad* and the *Odyssey* have been read from the time of Homer through the Renaissance.

Her broad focus on the Mediterranean world combined with her interdisciplinary approach allows for new insights into a wide range of topics, including the meaning of myth, sculpture, the evolution of the alphabet, Homeric poetics, and Attic drama.

## In the Shadow of Olympus

The Emergence of Macedon

**Eugene N. Borza**

In tracing the emergence of the Macedonian kingdom from its origins as a Balkan backwater to a major European and Asian power, Eugene Borza offers a revealing account of a relatively unexplored segment of ancient history.

**“The number of books that truly fill gaps in scholarly literature is small; Borza’s work is one of them . . . . Borza has combined an enviable mastery of the geography and archaeology of Macedonia with impeccable scholarship to trace the emergence of Macedon as a major force in the political affairs of the fourth-century BCE Balkans. Scholars and students will find much of interest in this lucidly written volume.”—Choice**

"[A] vibrant, immensely readable biography. . . . History leaps off the page in this passionate narrative. . . . Green strips away romantic legends to lay bare an Orwellian tyrant whose unbroken ascent to absolute power led to his estrangement from reality."

—Publishers Weekly

"As one reads through Peter Green's enthralling life of Alexander . . . one feels every strand of the mythical story coming apart. . . . Green takes a very bold revisionist stand against the imperial vainglory of antiquity."

"Green's portrait will discomfit those who seek consistency in behavior (and those who have already made up their minds about Alexander): it is a complex, multi-dimensional figure which should appeal to this troubled age."

—The Classical World

"In every age, cultures both East and West have cast and recast [Alexander] in a variety of heroic molds, although, as demonstrated in Peter Green's impressive biography . . . the myths may well be more admirable than the man."
