# GENERAL INDEX

TO THE FIRST TWENTY-FOUR VOLUMES OF

## THE JOURNAL OF MENTAL SCIENCE,

By G. FIELDING BLANDFORD, M.D.,

Late President of the Medico-Psychological Association; with Historical Sketch,  
by D. HACK TUKE, M.D., Co-Editor of the Journal.

J. & A. CHURCHILL, New Burlington Street.

---

## MANUAL OF PSYCHOLOGICAL MEDICINE.

By J. C. BUCKNILL, M.D., F.R.C.P., F.R.S., and  
D. HACK TUKE, M.D., F.R.C.P.

Fourth Edition, Revised and Enlarged, with 12 Plates (four being coloured),  
8vo., 25s.

"It is not too much to say that it is the best and most favourably known to the medical and legal professions, by both of which it is quoted as the highest authority. It has acquired this enviable standing from the high reputation of its authors, from the correctness of the views and opinions expressed, and from its fulness. More than any work by English authors it deals with the subject of insanity in all its relations. . . . We abstain from any further remarks upon a book, which, for more than twenty years, has been a standard guide in the hands of the alienists of all countries."—*American Journal of Insanity*, October, 1879.

"The authors claim that the work is now brought up to the knowledge of the day in all particulars. This seems quite probable from a careful examination of the text. We have been often asked to designate the best book on insanity for general use. To those who must confine their studies to a single work, we believe, the last edition of Bucknill and Tuke will prove the most comprehensive and useful treatise in the English language."—*The Boston Medical and Surgical Journal*, October, 1879.

"In the revision, every sentence, and even every word seems to have been critically examined. As a whole the volume is a monument of faithful, conscientious work."—*The American Journal of the Medical Sciences*, October, 1879.

J. & A. CHURCHILL, New Burlington Street.

---

8vo., 14s.

## ILLUSTRATIONS OF THE INFLUENCE OF THE MIND UPON THE BODY.

By D. HACK TUKE, M.D., F.R.C.P.

"To Dr. Tuke belongs the merit of having attempted, not merely to adopt his speculations to scientific inquiries, but to confine them within the regular and rigid limits of professional and philosophical investigations."—*British and Foreign Medico-Chirurgical Review*.

J. & A. CHURCHILL, New Burlington Street.

## CONTENTS OF No. 110.—JULY, 1879.

### PART I.—ORIGINAL ARTICLES.
