## **Unseasonal Migrations**

**The Effects of Rural Labor Scarcity in Peru**

*Jane L. Collins*

Jane Collins explores a phenomenon of growing importance in developing nations—the labor scarcity that emerges as farmers in Latin America and elsewhere are forced by economic necessity to seek seasonal work away from their home communities. Such labor scarcity often results in “unseasonal” ecological damage and the deterioration of social relations. Collins focuses on the seasonal journeys of Aymara-speaking highland peasants to east Andean valleys, where they grow coffee. Contrary to the conventional wisdom that labor is an abundant resource in developing countries, the Aymara’s situation illustrates a problem common throughout the Third World.

## Colonialism and Agrarian Transformation in Bolivia

Cochabamba, 1550–1900

*Brooke Larson*

Cochabamba is the principal agricultural region of Bolivia, with a peasantry that has been especially active in small-scale commercial agriculture and marketing. Focusing on this region, Brooke Larson supplies the first long-term historical view of rural society in colonial and nineteenth-century Bolivia. While examining the impact of mercantile colonialism during the late sixteenth and early seventeenth centuries, she offers an important corrective to the “world-systems” approach to agrarian transformation.

Combining economic history and ethno history, the author shows how the contradictions of class and colonialism gave rise to new social forces from below that both accommodated and challenged the evolving structures of domination.

Peronism and the Argentine Working Class, 1946-1976

**DANIEL JAMES**

This book analyses the relationship between Peronism and the Argentine working class from the foundation of the Peronist movement to the overthrow of Peron's widow. Drawing on a variety of untapped sources, Daniel James confronts many of the dominant myths which have surrounded the movement. He argues that its role in containing working-class militancy cannot be explained solely in terms of manipulation, corruption or union gangsterism.

## Language, Authority and Indigenous History in the *Comentarios reales de los incas*

MARGARITA ZAMORA

An original study of a classic of Spanish Renaissance prose narrative whose author, the son of an Inca princess and a Spanish conquistador, attempted a reconciliation of the pagan new-world culture with the fervent Christian evangelism of the conquest of Latin America. Zamora examines the rhetorical complexities of the *Comentarios*, and shows how, in order to present Inca civilisation to Europeans, Garcilaso turned to disciplines other than traditional historiography, in particular the linguistic strategies of Humanist philology and hermeneutics.

Why were so many of America's staunch allies as well as many Congressmen and opinion leaders opposed to the joint invasion of Grenada by the United States and the Caribbean neighbours of that tiny island-nation? What led to the Grenadian government crisis of 1983, and – above all – was the threat perceived by the Reagan administration real? These and related issues are explored by Reynold Burrowes' comprehensive account of the Grenada affair, a chapter in modern diplomacy and warfare that remains an enigma to many observers.

**LATIN AMERICAN INFLATION**

**Theoretical Interpretations and Empirical Results**

Julio Harold Cole

1988 112 pages, bibliog., index

Rapid inflation has been conspicuous in several Latin American countries for the past few decades. Efforts to explain their phenomenon in terms of features common to most Latin American economies has led to two distinct interpretations: the "monetary" approach and the "structuralist" view. In his book, Cole points out that a simple monetarist model can explain Latin American inflation, although it cannot by itself provide an explanation in terms of the "ultimate causes" of inflation. This is the basis of the structuralist critique, which attempts to provide an explanation in a deeper, overall sense.

**Inside Development in Latin America**  
**A Report from the Dominican Republic,**  
**Colombia, and Brazil**  
by James Lang

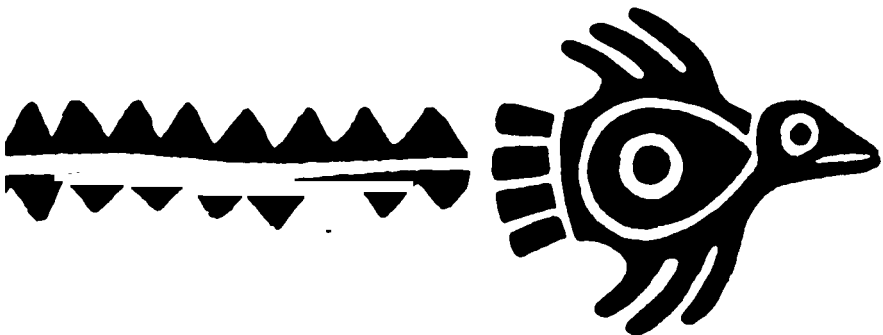

“One of the first optimistic books about Latin America in a long time. Lang had the will and the good fortune to go and simply look and listen. But he chose well whom he listened to, and his book is in effect an anthology of local voices and local expertise. It will reward anyone interested in Latin America or rural development.”—William A. Christian, Jr., MacArthur Foundation Fellow

James Lang takes readers on a journey inside Latin America to community health programs and rural extension projects in the Dominican Republic, Colombia, and Brazil. The people who do the work tell the story, explaining how credit is organized, describing the routines at health posts, and discussing crops and cooperatives. Local development, Lang argues, is affordable, realistic, and irreplaceable.

In this book Julio Faundez traces the development of Chilean politics from 1932 to the overthrow of Allende in 1973, focusing in particular on the participation of Marxist parties in Chile's democratic government. Relating the various phases in the evolution of the political system to the concrete problems that had to be faced, Faundez discusses how class alliances, political mobilization, and the role of organized labour affected developments in the country. His book adds an important new perspective to a perennial topic of debate among politicians and political scientists worldwide. 288pp. £18.50

*Journal of Latin American Studies* is published twice a year under the academic sponsorship of the Centres or Institutes of Latin American Studies at the Universities of Cambridge, Essex, Glasgow, Liverpool, London and Oxford.

The scope of the journal is the study of Latin America from the standpoint of the social sciences, including anthropology, archaeology, economics, geography, history, international relations, politics, sociology, etc., though it is not concerned with linguistic or literary studies.

Editorial policy avoids commitment to any political viewpoint or ideology, but welcomes free discussion of such issues in the Latin American context, on the understanding that all responsibility for opinions expressed rests exclusively with the author concerned and not with either the journal or its editors.

Contributions are invited from all parts of the world. Articles should generally not be more than 8,000 words long, and two copies, typed with double spacing, should be submitted. Diagrams and maps may be included by arrangement with the editors. The journal is published in English, but articles written in other languages may be considered, and arrangements made as required for translation into English. Contributors should keep one copy of the typescript for use in correcting proofs.

All contributions and editorial correspondence should be addressed to *Journal of Latin American Studies*, Institute of Latin American Studies, 31 Tavistock Square, London, WC1H 9HA.

Each contributor will receive, free of charge, 25 offprints of the article and a copy of the issue of the journal in which it appears.
