Plant Pathology publishes research papers and critical reviews on all aspects of the subject, including such topics as:

- Diseases of temperate and tropical plants caused by fungi, viruses, virus-like organisms and bacteria
- Methods in plant pathology
- Physiological, biochemical, ecological, genetic and economic aspects of plant pathology
- Disease appraisal and crop loss assessment
- Plant disease control, including disease-related crop management

Short reports of new or unusual records of plant diseases are welcomed, as are letters to the editor when these comment on matters relevant to plant pathology.

Subscription Information

Plant Pathology is published quarterly. Subscription rates for 1988 are £82.00 (UK), US\$167.50 (USA & Canada), £98.50 (elsewhere) post free.
