CONTENTS

Preface	ix
PSA 1992 Program	xi
Synopsis	xxi
Part I. Methodology and Explanation	
1. <i>Explanatory Unification and Scientific Understanding</i> Eric Barnes, Denison University	3
2. <i>On Values in Science: Is the Epistemic/Non-Epistemic Distinction Useful?</i> Phyllis Rooney, Oakland University	13
3. <i>Darcy's Law and Structural Explanation in Hydrology</i> James R. Hofmann, California State University–Fullerton and Paul A. Hofmann, New Mexico Institute of Mining and Technology	23
4. <i>Philosophy of Science and Its Rational Reconstructions: Remarks on the VPI Program for Testing Philosophies of Science</i> Alan W. Richardson, University of Keele	36
Part II. Experimentation	
5. <i>Some Complexities of Experimental Evidence</i> Margaret Morrison, University of Toronto	49
6. <i>Experimental Reproducibility and the Experimenters' Regress</i> Hans Radder, Vrije Universiteit, Amsterdam	63
7. <i>How Do You Falsify a Question?: Crucial Tests versus Crucial Demonstrations</i> Douglas Allchin, University of Minnesota	74
Part III. Quantum Theory I	
8. <i>Value-definiteness and Contextualism: Cut and Paste with Hilbert Space</i> Allen Stairs, University of Maryland	91
9. <i>The Objectivity and Invariance of Quantum Predictions</i> Gordon N. Fleming, Pennsylvania State University	104
10. <i>Relativity, Quantum Mechanics and EPR</i> Robert Clifton, Cambridge University Constantine Pagonis, Cambridge University Itamar Pitowsky, The Hebrew University of Jerusalem	114

Part IV. Issues in Methodology

11. *Another Day for an Old Dogma* 131
Robert J. Levy, Wittenberg University
12. *The Importance of Models in Theorizing: A Deflationary Semantic View* 142
Stephen M. Downes, University of Utah
13. *Towards an Expanded Epistemology for Approximations* 154
Jeffrey L. Ramsey, Rice University

Part V. Problems in Special Sciences

14. *Sociology and Hacking's Trousers* 167
Warren Schmaus, Illinois Institute of Technology
15. *Neo-classical Economics and Evolutionary Theory: Strange Bedfellows?* 174
Alex Rosenberg, University of California–Riverside
16. *Community Ecology, Scale, and the Instability of the Stability Concept* 184
E.D. McCoy and Kristin Shrader-Frechette, University of South Florida

Part VI. Decision Theory

17. *Kings and Prisoners (and Aces)* 203
Jordan Howard Sobel, University of Toronto
18. *Dutch Strategies for Diachronic Rules: When Believers See the Sure Loss Coming* 217
Brad Armendt, Arizona State University
19. *The Collapse of Collective Defeat: Lessons from the Lottery Paradox* 230
Kevin B. Korb, Indiana University

Part VII. Realism: Causes, Capacities and Mathematics

20. *Cartwright, Capacities, and Probabilities* 239
Gürol Irzik, Boğaziçi University
21. *Objects and Structures in the Formal Sciences* 251
Emily Grosholz, Pennsylvania State University
22. *Adding Potential to a Physical Theory of Causation* 261
Mark Zangari, La Trobe University

Part VIII. Kuhnian Themes: SSR at Thirty

23. *Theory-ladenness of Observations as a Test Case of Kuhn's Approach to Scientific Inquiry* 277
Jaakko Hintikka, Boston University
24. *Theory-ladenness of Perception Arguments* 287
Michael A. Bishop, Iowa State University
25. *The Structure Thirty Years Later: Refashioning a Constructivist Metaphysical Program* 300
Sergio Sismondo, Cornell University

Part IX. Topics in the Philosophy of Biology

26. *Additivity and the Units of Selection* 315
Peter Godfrey-Smith, Stanford University
27. *Jacques Monod's Scientific Analysis and Its Reductionistic Interpretation* 329
Spas Spassov, University of Montreal
28. *A Kernel of Truth? On the Reality of the Genetic Program* 335
Lenny Moss, Northwestern University
29. *A Defense of Propensity Interpretations of Fitness* 349
Robert C. Richardson, University of Cincinnati and
Richard M. Burian, Virginia Polytechnic Institute and
State University

Part X. Quantum Theory II

30. *Locality, Complex Numbers, and Relativistic Quantum Theory* 365
Simon W. Saunders, Harvard University
31. *Reversibility and the Interpretation of Mixtures in Quantum Mechanics* 381
Osvaldo Pessoa, Jr., Universidade Estadual de Campinas–
Brazil
32. *Renormalization and the Effective Field Theory Programme* 393
Don Robinson, University of Toronto
33. *Bell's Inequality, Information Transmission, and Prism Models* 404
Tim Maudlin, Rutgers University

Part XI. Realism, Methodology and Underdetermination

34. *Convergent Realism and Approximate Truth* 421
David B. Resnik, University of Wyoming

35.	<i>Realism and Methodological Change</i> Jarett Leplin, University of North Carolina–Greensboro	435
36.	<i>Historical Contingency and Theory Selection in Science</i> James T. Cushing, University of Notre Dame	446
Part XII. Issues in the Philosophy of Psychology		
37.	<i>What Price Neurophilosophy?</i> Eric Sidel, University of Wisconsin-Madison	461
38.	<i>Darwin and Disjunction: Foraging Theory and Univocal Assignments of Content</i> Lawrence A. Shapiro, University of Pennsylvania	469
39.	<i>Thought and Syntax</i> William Seager, University of Toronto	481
40.	<i>Color Perception and Neural Encoding: Does Metameric Matching Entail a Loss of Information?</i> Gary Hatfield, University of Pennsylvania	492
Part XIII. Spacetime		
41.	<i>When is a Physical Theory Relativistic?</i> Roland Sypel and Harvey R. Brown, Oxford University	507
42.	<i>Space-Time and Isomorphism</i> Brent Mundy, Syracuse University	515
43.	<i>The Relativity Principle and the Isotropy of Boosts</i> Tim Budden, Oxford University	528
44.	<i>A New Look at Simultaneity</i> Kent A. Peacock, University of Western Ontario	542
