

Against the Current: Wilder Penfield, the Frontal Lobes and Psychosurgery

Richard Leblanc

Can J Neurol Sci. 2019;46:586

AN INTERNATIONAL JOURNAL PUBLISHED BY THE CANADIAN NEUROLOGICAL SCIENCES FEDERATION

*The official Journal of: The Canadian Neurological Society, The Canadian Neurosurgical Society,
The Canadian Society of Clinical Neurophysiologists, The Canadian Association of Child Neurology, and
The Canadian Society of Neuroradiology*

Available in Canada

How many is too many?

For patients with at least 4 migraine days per month, consider Aimovig®

Indication and Clinical Use:

Aimovig® (erenumab) is indicated for prevention of migraine in adults who have at least 4 migraine days per month. Aimovig® should be initiated by physicians experienced in the diagnosis and treatment of migraine. Safety and efficacy has not been studied in patients aged 65 or older.

Relevant Warnings & Precautions:

- Aimovig® crosses the placenta. Avoid use during pregnancy as a cautionary measure.
- In nursing women, a decision should be made whether to discontinue nursing or discontinue Aimovig®, weighing the potential benefit of Aimovig® to the mother and breastfeeding to the infant.

For More Information:

Please consult the product monograph at www.novartis.ca/aimovigmonograph for important information relating to adverse reactions, drug interactions, and dosing information which have not been discussed in this piece. The product monograph is also available by calling us at 1-800-363-8883.

1ST and only anti-CGRP receptor indicated in migraine prevention^{1,2*}
