

The completion by cuts of an orthocomplemented modular lattice: Addendum

D. H. Adams

It has been pointed out by Samuel S. Holland, Jr, that the result in this note (Bull. Austral. Math. Soc. 1 (1969), 279-280) was obtained independently by S. Maeda in a course of lectures given at the University of Massachusetts, Spring Semester, 1968, and that it appears in the notes assembled for this course, *Theory of symmetric lattices*.

Monash University,
Clayton, Victoria.

Received 26 September 1969.
