PAEDIATRIC NEUROLOGIST

There is an opportunity for a full time academic paediatric neurologist with advanced specialty training in neurophysiology. The candidate should have documented expertise in paediatric and neonatal electroencephalography and in sensory evoked potential techniques. Appointment will be at Assistant Professor level in the Division of Neurology, Department of Paediatrics, University of Toronto. Interested candidates should send their Curriculum Vitae and two supporting letters by July 1, 1982 to:

**William J. Logan, M.D.,
Neurologist-In-Chief
The Hospital for Sick Children,
555 University Avenue,
Toronto, Ontario.
M5G 1X8**

In Parkinson Therapy:

Prolopa[®]

4 parts L-dopa: 1 part benserazide

For the response you expect...
without the frequency
of peripheral side effects

The 4:1 ratio provides

- Excellent clinical response in the management of Parkinsonian disability.^{1,2}
- Significantly fewer side effects – nausea and vomiting – than a 10:1 ratio Levodopa/Carbidopa preparation during the first six months of treatment.^{1,2}
- Patient preference over the 10:1 ratio Levodopa/Carbidopa preparation, with respect to nausea and vomiting.¹
