

Perception & Psychophysics

Editor: Charles W. Eriksen

Associate Editors:

Myron Braunstein Edward C. Carterette Robert Fox Norma Graham Lester E. Krueger Herschel W. Leibowitz Christopher W. Tyler

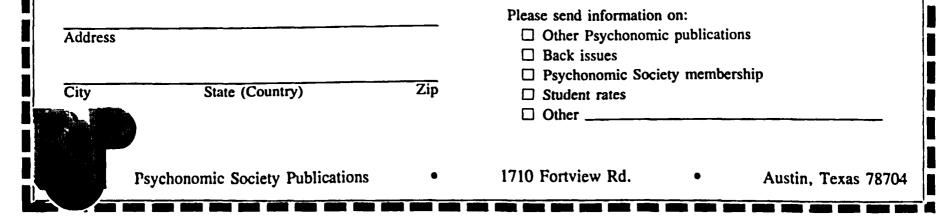

Perception & Psychophysics, one of the most prestigious of the six journals published by the Psychonomic Society in the field of experimental psychology, deals primarily with sensory processes, perception, and psychophysics in studies that employ either human or animal subjects. Most articles published in the journal are reports of experimental investigations in these areas, but articles that are primarily theoretical are included as well, as are integrative and evaluative reviews.

RECENT ARTICLES include:

- "Interference with McCollough Effects via Pre- and Postinduction Exposure to Achromatic Gratings: Time Course and Magnitude of Aftereffect Decrement" by Diane Skowbo
- "An Investigation of the Equiratio-Mixture Model in Olfactory Psychophysics: A Case Study" by Franc T. Schiet and Jan E. R. Frijters
- "Experimental Demonstration of the Sensory Basis of the Size-Weight Illusion" by Sergio Cesare Masin and Loredana Crestoni
- "Subitizing: Direct Apprehension or Serial Processing?" by Charles L. Folk, Howard Egeth, and Ho-Wan Kwak
- "Facilitation and Interference with a Separable Redundant Dimension in Stimulus Comparison" by W. R. Garner
- "Are Letter Codes Always Activated" by Seth N. Greenberg
- "Masking the Motions of Human Gait" by James E. Cutting, Cassandra Moore, and Roger Morrison
- "The Effect of Orientation on Interpolated Elastic Structure from Dot Motion: Its Occurrence and Persistence" by Akira Ishiguchi
- "'Ratios' and 'Differences' in Perceived Sweetness Intensity" by Cees De Graaf and Jan E. R. Frijters
- "Separating Visible Persistence from Retinal Afterimages" by Vincent Di Lollo, Craig D. Clark, and John H. Hogben
- "Familiarity and Visual Change Detection" by Harold Pashler

Perception & Psychophysics is published monthly, two volumes per year. Annual subscription rates for Volumes 45 and 46 (1989): \$120 for Institutions; \$55 for Individuals. Please add \$12 for foreign/Canadian postage. Back issues and special student rates are also available.

BEHAVIORAL and BRAIN SCIENCES

Cambridge Di Journals

EDITOR: Stevan Harnad, Princeton, NJ

Behavioral and Brain Sciences publishes particularly significant and controversial "target articles." These have been successful in drawing out the leading investigators in a wide range of fields who discuss, debate and critically analyze topics of current interest to the entire biobehavioral science community. Fascinating and often surprising results come from the 20-30 open peer commentaries on each target article from psychologists, linguists. philosophers, neuroscientists, anthropologists, developmentalists and other specialists within and across these disciplines.

Behavioral and Brain Sciences

Selected Papers

Sex differences in human mate preferences: Evolutionary hypothesis tested in 37 cultures, D.M. Buss

The child's trigger experience: "Degree-O" learnability, D. Lightfoot

Strategies for the control of voluntary movements with one degree of freedom, G.L. Gottlieb et al.

Numerical competence in animals: Definitional issues, current evidence and a new research agenda, H. Davis, R. Perusse

Reconciling Fechner and Stevens: Toward a unified psychophysical law, L.E. Krueger

Behavioral and Brain Sciences (ISSN 0140-525X) is published quarterly. Subscription to Volume 12, 1989 (US and Canada only): S154.00 for institutions; \$65.00 for individuals; single parts \$43.00.

Back Volumes: 1-11 (1978-1988) \$54.00 each.

THE VISUAL PROCESSING OF MOTION

A meeting organized by the CNRS (Life Science Department) in the framework of the "Conférences Jacques Monod"

The meeting will take place in Roscoff (Brittany, France) from June 19 to June 23, 1989. Applicants should contact:

Dr. N. Franceschini, Chairman Laboratoire de Neurobiologie 31 Chemin Joseph Aiguier 13402 MARSEILLES CEDEX 9, FRANCE

Telephone: 91-22-41-29 EARN: FRCHINI at FRMOP11

SPEAKERS INCLUDE:

- C. Bonnet
- O. Braddick
- E. Buchner
- P. Buisseret
- J. Bullier
- V. Conilleau-Perez
- J. Cremieux
- M. Egelhaaf
- R. Emerson
- O. Faugeras
- N. Franceschini
- Y. Fregnac
- K. Götz
- P. Hammond
- H von Hateren

- M. Imber
- A. Kaneko
- K. Kirschfeld
- C. Koch
- S. Laughlin
- R. Masland
- D. Mestre
- W. Newsome
- G. Orban
- C. Oyster
- J. M. Pichon
- W. Reichardt
- F. Schuling
- M. Srinivasan
- V Torre

ΙA

Research, theory, and application in psychology and related behavioral, cognitive, neural and social sciences

Editor: William K. Estes, Harvard University

P

First Issue - January 1990

The bimonthly flagship journal of The American Psychological Society

Psychological Science will publish research articles, research reviews, short reports and perspectives on psychological science and its applications.

Cambridge Journals of Related Interest

• Applied Psycholinguistics

A quarterly journal publishing research papers on the psychological processes involved in language and language development and defects in adults and children.

- •Behavioral and Brain Sciences The internationally renowned quarterly with the innovative 'Open Peer Commentary' format. Target article, 20-30 commentaries, author response and references published together are a seminar in print.
- Development and Psychopathology A new multidisciplinary quarterly publishing original empirical, theoretical and review

Psychological Medicine

G

Quarterly issues contain original research in clinical psychiatry and the basic sciences related to it.

• Psychology of Women Quarterly

Publishes empirical studies, review articles. and theoretical articles aimed at establishing a greater understanding of women's issues and sex roles in society.

Visual Neuroscience

A monthly journal publishing research and theoretical articles in basic visual neuroscience. with primary emphasis on retinal and brain mechanisms that underlie visually-guided behaviors and visual perception.

of normal and pathological development in adults and children.

Cambridge University Press 32 East 57th Street • New York, N.Y. 10022

THE JOURNAL OF PHYSIOLOGY

Published for the Physiological Society

Chairman of the Editorial Board: A. V. Edwards, University of Cambridge

This internationally respected journal publishes high quality papers representing original experimental work in three areas: general physiology, mammalian physiology, and human physiology. Each hardbound monthly volume of *The Journal of Physiology* is concerned with respiration, circulation, excretion, reproduction, digestion, homeostasis, and particularly neurophysiology and muscular contraction. Abstracts of scientific meetings of the Physiological Society, which are accepted by the members present at those meetings, are also published. A Cumulative Subject and Author Index is produced triennially and an Annual Index is produced in the intervening years.

Selected papers

Co-ordinated variations in chloride-dependent potassium transport and cell water in normal human erythrocytes, G. W. Stewart

Influence of right atrial stretch and atrial natriuretic factor on rate intestinal fluid content, S. Kaufman & E. Monckton

Outward rectification of inhibitory postsynaptic currents in cultured rat hippocampal neurons, J. L. Barker & N. L. Harrison

Review Lecture: Capillary permeability and how it may change, C. C. Michel

The Journal of Physiology (ISSN 0022-3751) is published monthly in 1989. Subscription to volumes 408-419: \$1200.00 per year; \$106.00 per volume.

Back Volumes: 254-407 (1976-1988) \$115.00 each.

V I S U A L NEUROSCIENCE Volume 2 1989 Number 5

CONTENTS

Robert P. Dolan and Peter H. Schiller	421	Evidence for only depolarizing rod bipolar cells in the primate retina
Roberta G. Pourcho and Michael T. Owczarzak	425	Distribution of GABA immunoreactivity in the cat retina: A light- and electron-microscopic study
K.W.S. Ashwell, H. Holländer, W. Streit, and J. Stone	437	The appearance and distribution of microglia in the developing retina of the rat
S.B. Braverman, I. Rappaport, and S.C. Sharma	449	Characterization of a goldfish antigen during development and regeneration of the visual system
Rene Garcia and Frederic Gaillard	455	Quantitative stimulus-response studies on sustained ganglion cells in the frog retina
P. Michael Iuvone, Margarete Tigges, Alcides Fernandes, and Johannes Tigges	465	Dopamine synthesis and metabolism in rhesus monkey retina: Development, aging, and the effects of monocular visual deprivation
M.A. BERKLEY	473	Integration regions for vernier acuity in the cat: Comparative aspects of cortical scaling
Margaret T.T. Wong-Riley, Satish C. Tripathi, Thomas C. Trusk, and Daniel A. Hoppe	483	Effect of retinal impulse blockage on cytochrome oxidase-rich zones in the macaque striate cortex: I. Quantitative electron-microscopic (EM) analysis of neurons
Margaret T.T. Wong-Riley, Thomas C. Trusk, Satish C. Tripathi, and Daniel A. Hoppe	499	Effect of retinal impulse blockage on cytochrome oxidase-rich zones in the macaque striate cortex: II. Quantitative electron-microscopic (EM) analysis of neuropil
David Parkinson, Elizabeth C. Coscia, and Nigel W. Daw	515	Identification and localization of 5-hydroxytryptamine receptor sites in macaque visual cortex
	527	Detailed Information for Contributors

528 The Humane Care and Use of Animals
