

## INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The Bulletin receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\text{\LaTeX}$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\text{\TeX}$  are able to produce PDF files directly. A  $\text{\LaTeX}$  class file for the Bulletin can be downloaded from the website. Authors who need assistance may email the secretary of the Bulletin at [jams@ms.unimelb.edu.au](mailto:jams@ms.unimelb.edu.au).

Authors are advised to keep copies of all files of the submitted article; the Bulletin will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2000 Mathematics Subject Classification. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of Ph.D. Theses.** The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

**Mixed Sources**  
Product group from well-managed  
forests and other controlled sources

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

# Table of Contents

---

<b>On the number of solutions of the Diophantine equation <math>ax^m - by^n = c</math></b> <i>He, B. &amp; Togbé, A.</i>	177
<b>On coherence of endomorphism rings</b> <i>Zhu, H.-Y. &amp; Ding, N.-Q.</i>	186
<b>Partial orders on partial Baer–Levi semigroups</b> <i>Singha, B., Sanwong, J. &amp; Sullivan, R. P.</i>	195
<b>Maximal annuli with parallel planar boundaries in the three-dimensional Lorentz–Minkowski space</b> <i>Pyo, J.</i>	208
<b>On <math>m</math>-covers and <math>m</math>-systems</b> <i>Sun, Z.-W.</i>	223
<b>Fock factorization of B-valued analytic mappings on a Hilbert inductive limit</b> <i>Wang, C., Zhou, Y., Feng, D. &amp; Han, Q.</i>	236
<b>Global asymptotic stability for general symmetric rational difference equations</b> <i>Zhang, C., Li, H.-X. &amp; Huang, N.-J.</i>	251
<b>Real hypersurfaces with cyclic-parallel structure Jacobi operators in a nonflat complex space form</b> <i>Ki, U.-H. &amp; Kurihara, H.</i>	260
<b>Simple proofs for universal binary Hermitian lattices</b> <i>Park, P.-S.</i>	274
<b>On a perturbed conservative system of semilinear wave equations with periodic-Dirichlet boundary conditions</b> <i>Chen, J. &amp; O'Regan, D.</i>	281
<b>Closed form formula for the number of restricted compositions</b> <i>Jaklič, G., Vitrih, V. &amp; Žagar, E.</i>	289
<b>Involutions of graph link exteriors whose fixed point sets are closed surfaces</b> <i>Ikeda, T.</i>	298
<b>Ehrlich's theorem for groups</b> <i>Li, Y. &amp; Nicholson, W. K.</i>	304
<b>On commutative reduced filial rings</b> <i>Andruszkiewicz, R. R. &amp; Prysyczepko, K.</i>	310
<b>On a graph related to the maximal subgroups of a group</b> <i>Herzog, M., Longobardi, P. &amp; Maj, M.</i>	317
<b>Existence results for abstract degenerate neutral functional differential equations</b> <i>Hernández, E. &amp; Balachandran, K.</i>	329
<b>A remark on partial sums involving the Möbius function</b> <i>Tao, T.</i>	343
<b>Topology of interconnection networks with given degree and diameter</b> <i>Pineda-Villavicencio, G.</i>	350
