The Development of a Russian Legal Consciousness

RICHARD S. WORTMAN

Previous studies of Russian legal institutions have treated the reform of the courts as a sudden reversal of policy that occurred during the brief liberal period of the 1850s and 1860s. Richard S. Wortman now shows that reform came instead as the culmination of the development of legal professionalization within Russian officialdom. Wortman examines how institutional, cultural, and intellectual factors helped shape the personalities of the men responsible for the innovations.

The Bolsheviks Come to Power

By **ALEXANDER RABINOWITCH**
 Professor of history and director of the Russian and East European Institute at Indiana University

This fascinating new work presents a fundamentally new view of Lenin, his party, and the reasons for Bolshevik success. "It is revisionist scholarship in the best and truest sense. Both political and social history, it greatly expands on our detailed knowledge of the turbulent events of that year, while deepening and revising our understanding of the Bolshevik Party and the social factors that brought it to power." —*STEPHEN F. COHEN, Princeton University
