**Neck, Thyroid, &c.**, p. 119.—MCCURNEY: Treatment of Scrofulous Glands. TREVES: Excision of Scrofulous Glands. LANCET: Angina Ludovici. *Ibid*: Mandeville Case. PICQUÉ: Enormous Cystic Goitre. LANCET: Galvano-Puncture in Goitre. LEFLAIVE: Nature and Pathogeny of Exophthalmic Goitre. CHARCOT: New Signs of Graves' Disease. BERTOYE: Fever in Exophthalmic Goitre. DAMION: Electrotherapy in Graves' Disease. VERDIER: Treatment of Exophthalmic Goitre. LANCET: High Altitudes in Exophthalmic Goitre. *Ibid*: Pathology of the Ganglion of the Pneumogastric. SWANN: Foreign Body in Ear for Eighteen Years.

**Reviews**, p. 123.—Transactions of the Royal Academy of Medicine in Ireland. GOUQUENHEIM and TISSIER: Laryngeal Phthisis.

# THE THROAT AND VOICE.

LONDON ]

MARCH.

[1889.

## CHLORATE OF POTASH TABLOIDS.

FOR AFFECTIONS OF THE VOICE, THROAT AND RESPIRATORY SURFACES GENERALLY.

By using the Tabloids the drug is effectually brought in contact with the oral mucous surfaces as a continuous gargle, and its specific action made certain. In acute sore throat, Chlorate of Potash "usually relieves the uneasiness in a few hours" (Cohen). "It is used in ulcerated mouth

and follicular pharyngitis, and has been employed in croup, diphtheria and spasm of the larynx" (Brunton).

"Of convenient size, they are beautifully made; and, as they dissolve slowly in the mouth, are well-suited for throat affections."—THE LANCET.

Supplied to the Medical Profession in beautifully graven white metal boxes, blue silk label, at 4d. and 9d. each. Retail prices, 6d. and 1s. each.

## CHLORATE OF POTASH AND BORAX TABLOIDS.

The Tabloids afford an agreeable form in which to administer Chlorate of Potash and Borax.

Supplied to the Medical Profession in beautifully graven white metal boxes, pink silk label, at 4d. and 9d. each. Retail prices, 6d. and 1s. each.

## CHLORIDE OF AMMONIUM TABLOIDS.

The solvent and discutient as well as antiphlogistic powers of Chloride of Ammonium are well known, and have led to its extensive employment in cases of sore throat and bronchitis, attended with abundant secretion of thick and tough mucus or phlegm. The Tabloids slowly dissolving secure direct and continuous contact with the inflamed surface. They quickly mitigate irritation, and lessen expectoration.

Two or three of the Tabloids will sometimes entirely relieve coughs that have long resisted treatment with ordinary remedies.

Supplied to the Medical Profession in bottles, at 5d. and 1s. 1d. each. Retail prices 6d. and 1s. 6d. each.

## VOICE TABLOIDS.

Composed of COCAINE, Chlorate of Potash and Borax.

Impart a clear and silvery tone to the voice.

Easily retained in the mouth while singing or speaking. Now used by the leading singers and public speakers throughout the world.

**DIRECTIONS.**—A single Tabloid may be slowly dissolved in the mouth to remove huskiness or hoarseness.

Supplied to the Medical Profession in beautifully graven white metal boxes, blue silk label, at 8d. and 1s. 4d. each. Retail prices, 1s. and 2s. per box.

## SAL PRUNELLA TABLOIDS.

(NITRATE OF POTASH.)

"A popular remedy, sometimes successful in mild cases of incipient inflammatory sore throat, is a small piece of nitre allowed to dissolve slowly in the mouth" (Waring).

**DIRECTIONS.**—One or more (5 gr.) Tabloids should be dissolved slowly in the mouth for the local effect.

Supplied to the Medical Profession, in bottles of 100, at 1s. 2d. each. Retail price, 1s. 6d. each.

## HAZELINE.

This drug is highly commended by the British

The Witch Hazel Plant.

Medical Association's Committee on Therapeutics. Hazeline, being prepared from the fresh green twigs, contains all the valuable volatile principles of the plant Witch Hazel, and is much more uniform and reliable in its action than are the tinctures, fluid extracts, etc., prepared from the dried bark.

**DIRECTIONS:**—In Catarrh or cold in the head, may be sniffed up the nostrils with an equal part of tepid water.

Dose for irritated or inflamed throat and lungs, half to one teaspoonful occasionally.

Supplied to the Medical Profession, in ½ and 1 lb. bottles, at 1s. 2d. & 3s. 6d. each. Retail Prices, 1s. 6d. & 4s. 6d. each.

## VEREKER'S CHLORIDE OF AMMONIUM INHALER.

"The neutral vapour of Chloride of Ammonium removes unhealthy and offensive secretions, and

restores the long diseased or weakened nasal and respiratory mucous membrane to a healthy state, so that in cases of catarrh, where thickening, induration, and irritation exist a most decided improvement is brought about in a short time." In "throat-cough," pharyngeal irritation, and relaxation and weakness of the throat, it acts as a most effective alterative and tonic to the mucous membrane.

Dr FRANKS, Dublin University, says:—"It is the best I have ever used, and I think I have tried all."

Dr. SMYLY, Ex.-Pres. Royal College of Surgeons, Ireland, says:—"It is the best Inhaler for Chloride of Ammonium I have met with."

Supplied to the Medical Profession at 7s. 6d. each. Retail 10s. each.

**BURROUGHS, WELLCOME, & Co., Snow Hill Buildings, London, E.C.**

Will be happy to supply trial Specimens to Medical Men free on request.
