Minding Minors Wandering the Web: Regulating Online Child Safety

Edited by

Simone van der Hof, Bibi van den Berg and Bart Schermer

Ensuring online safety has become a topic on the regulatory agenda in many Western societies. However, regulating for online safety is far from easy, due to the wide variety of national and international, private and public actors and stakeholders that are involved. When regulating online risks for children it is important to strike the right balance between protection against harms on the one hand, and safeguarding their fundamental freedoms and rights on the other. The authors in this book grapple with precisely this theme: striking the right balance between ensuring safety for children on the internet while at the same time enabling them to experiment, to learn, to enrich their lives, to acquire skills and to have fun using this global network. The authors come from various scientific disciplines, ranging from law to social science and from media studies to philosophy, thus presenting both empirical and theoretical/conceptual approaches, and shedding a multi-disciplinary light on the complex topic of regulating online safety for children.

Simone van der Hof is Full Professor of Law and Information Society at the Center for Law and the Information Society at Leiden University, the Netherlands. **Bibi van den Berg** is Assistant Professor at the Center for Law in the Information Society of Leiden University. **Bart Schermer** is Assistant Professor at the Center for Law in the Information Society of Leiden University
