

Seminars in General Adult Psychiatry

NEW!

Edited by George Stein & Greg Wilkinson

A major new textbook of adult general psychiatry by leading experts in the field and the centrepiece of the Seminars series. This multi-authored textbook places its greatest emphasis on detailed clinical descriptions of the common psychiatric disorders and their place within the ICD-10 and DSM-IV schemes. Psychological and biological treatments are covered in depth giving the reader an insight into the issues involved in modern patient care. Although primarily intended for doctors preparing for their MRCPsych, the text provides a comprehensive well-referenced review of the whole of modern clinical psychiatry and will be of use to consultant psychiatrists and other health professionals in the mental health field. As with other titles in the series, frequent use of boxes, tables and figures is made to set out important points and key information. The book is presented in two volumes as a boxed set.

• £55.00 • Vol 1: 810pp Vol 2: 698pp • Published January 1998 • ISBN 0 902241 91 5

FIRST CHOICE

LUSTRAL™ 50mg
sertraline

A first choice antidepressant

Abbreviated Prescribing Information:
Lustral (sertraline)

Presentation: Tablets containing 50mg or 100mg sertraline. **Indications:** Treatment of symptoms of depressive illness, including accompanying symptoms of anxiety. Prevention of relapse or recurrence of depressive episodes, including accompanying symptoms of anxiety. **Dosage:** Lustral should be given as a single daily dose. The initial dose is 50mg and the usual therapeutic dose is 50mg daily. Dosage can be further increased, if appropriate, to a maximum of 200mg daily. Patients should be maintained on the lowest effective dose and doses of 150mg or more should not be used for periods exceeding 8 weeks. **Use in children:** Not recommended. **Use in the elderly:** Usual adult dose. **Contra-indications:** Hypersensitivity to Lustral. Hepatic insufficiency. Do not use with, or within two

Lustral. Use during pregnancy: Lustral should be used only if clearly needed. **Lactation:** Not recommended. **Precautions, warnings:** Renal insufficiency, unstable epilepsy, ECT, driving. Lustral should be discontinued in a patient who develops seizures. Lustral should not be administered to patients concurrently being treated with tranquillizers who drive or operate machinery. Patients should be closely supervised for the possibility of suicide attempt or activation of mania/hypomania. Bleeding abnormalities. **Drug Interactions:** Caution with other centrally active medication and with drugs known to affect platelet function. Serotonergic drugs including tryptophan, sumatriptan and fenfluramine should not be used with Lustral. Lithium levels should be monitored. Although Lustral has been shown to have no adverse interaction with alcohol, concomitant use with alcohol is not recommended. Interactions with other highly protein bound drugs should be considered. The potential of Lustral to interact with e.g. warfarin, diazepam, tolbutamide and cimetidine have not been fully

nausea, anorexia, diarrhoea/loose stools, sexual dysfunction (principally, ejaculatory delay), tremor, increased sweating, dyspepsia, dizziness, insomnia and somnolence. Vomiting, abdominal pain, abnormal LFTs, jaundice, serious liver events, pancreatitis, arthralgia, myalgia, malaise, rash (including rare reports of erythema multiforme, photosensitivity), angioedema, tachycardia. Seizures (see precautions, warnings). Movement disorders, menstrual irregularities, hyperprolactinaemia and galactorrhoea. Hyponatraemia. As with all psychoactive medicines, possible side effects on discontinuation. **Legal Category:** POM. **Basic NHS Cost:** 50mg tablet (PL57/0308) Calendar pack of 28, £26.51; 100mg tablet (PL 57/0309) Calendar pack of 28, £39.77. Further information on request. Pfizer Limited, Sandwich, Kent. Date revised: September 1997. **Reference:** 1. Lustral SPC.
