

***world-wide reputation for
safety and reliability***

Wide experience over 25 years has demonstrated conclusively that 'Sodium Amytal' is admirably suitable as a routine sedative and hypnotic. In sedative doses of 65 mg. (1 gr.) two or three times a day, it is invaluable in relieving stress and anxiety states, acting as a barrier between the patient and his worries, yet leaving his intellectual ability unimpaired. A hypnotic dose of 200 mg. (3 gr.) gives prompt sleep, after which the patient awakens refreshed and alert.

'Sodium Amytal' is a member of the widely-prescribed range of Lilly Barbiturates, from which the physician can select precisely that product best suited to his patient's need.

'SODIUM AMYTAL'
