MATERIALS RESEARCH

VOLUME 28 • NO 20  
OCTOBER 28, 2013

A publication of the

**MRS** MATERIALS RESEARCH SOCIETY®  
*Advancing materials. Improving the quality of life.*

CAMBRIDGE  
UNIVERSITY PRESS

# Journal of MATERIALS RESEARCH

**JOURNAL OF MATERIALS RESEARCH (JMR)** is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

**JMR** publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

**Manuscripts** must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x 11 in. paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

**Articles** are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

**Commentaries and Reviews:** *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

**Color policy:** It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

*Journal of Materials Research* (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013 – 2473 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER:** Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2113, USA.

**Subscriptions, renewals, address changes, and single-copy orders** should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA (for USA, Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

**Reprints** of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press.

**Individual member subscriptions are for personal use only.**

Cover: FIG. 5(b). NG Cu irradiated to fluences of  $1 \times 10^{17}$  ions/cm<sup>2</sup>. [W.Z. Han, E.G. Fu, M.J. Demkowicz, Y.Q. Wang, and A. Misra: Irradiation damage of single crystal, coarse-grained and nano-grained copper under helium bombardment at 450 °C. p. 2763].

# Journal of MATERIALS RESEARCH

Volume 28, Number 20, October 28, 2013

## INVITED FEATURE PAPERS

2763–2770 **Irradiation damage of single crystal, coarse-grained, and nanograined copper under helium bombardment at 450 °C**

Weizhong Han, E.G. Fu,  
Michael J. Demkowicz,  
Yongqiang Wang, Amit Misra

2771–2784 **Detection of surface electronic defect states in low and high-*k* dielectrics using reflection electron energy loss spectroscopy**

Benjamin L. French, Sean W. King

## ARTICLES

2785–2798 **Nanoindentation cracking in gallium arsenide: Part I. In situ SEM nanoindentation**

Kilian Wasmer, Cédric Pouvreau,  
Jean-Marc Breguet,  
Johann Michler, Daniel Schulz,  
Jacques Henri Giovanola

2799–2809 **Nanoindentation cracking in gallium arsenide: Part II. TEM investigation**

Cédric Pouvreau, Kilian Wasmer,  
Haïcha Hessler-Wyser,  
Jean-Daniel Ganière,  
Jean-Marc Breguet,  
Johann Michler, Daniel Schulz,  
Jacques Henri Giovanola

2810–2818 **Effect of strong magnetic field on solid solubility and microsegregation during directional solidification of Al–Cu alloy**

Xi Li, Annie Gagnoud,  
Zhongming Ren, Yves Fautrelle,  
François Debray

2819–2828 **Variation in the nanoindentation hardness of platinum**

M.R. Maughan, H.M. Zbib,  
D.F. Bahr

2829–2834 **Dynamic recrystallization in high-purity aluminum single crystal under frictionless deformation mode at room temperature**

Yong Seok Choi, Kyung Il Kim,  
Kyu Hwan Oh, Heung Nam Han,  
Suk Hoon Kang, Jinsung Jang,  
Jun Hyun Han

2835–2843 **Microstructure evolution and martensitic transformation behaviors of 9Cr–1.8W–0.3Mo ferritic heat-resistant steel during quenching and partitioning treatment**

Linqing Xu, Zesheng Yan,  
Yongchang Liu, Huijun Li,  
Baoqun Ning, Zhixia Qiao

2844–2851 **Bainitic transformation behavior of ultra-high strength 30CrNi3MoV steel after experiencing small deformation in the nonrecrystallization austenite region**

Zhixia Qiao, Yongchang Liu,  
Baoqun Ning, Huijun Li,  
Zesheng Yan, Xiaosheng Zhou,  
Lianjin Li

2852–2860 **Mechanical and structural characterization of nonsintered and sintered steel wools by x-ray tomography: Description of the techniques and validation on virtual materials**

J.P. Masse, C. Barbier, L. Salvo,  
Y. Bréchet, O. Bouaziz,  
D. Bouvard

2861–2873 **Decoupled growth mechanism of Fe<sub>40</sub>Ni<sub>40</sub>P<sub>14</sub>B<sub>6</sub> eutectic alloy**

Bin Gu, Feng Liu, Xiaoqing Dong,  
Ke Zhang, Kang Wang

2874–2880 **A comparative study on effects of special casting processes on microstructural development in Cu–10Al–4Fe–4Ni alloy**

G. Lin, Y. Lei, J. Zeng,  
H. Li, X. Xu

2881–2889 **Preparation of a solid amine adsorbent based on polypropylene fiber and its performance for CO<sub>2</sub> capture**

Linzhou Zhuang, Shuixia Chen,  
Rijia Lin, Xiuzhu Xu

2890–2896 **Asparagine–serine–serine peptide regulates enamel remineralization in vitro**

Hsiu-Ying Chung,  
Cheng-Che Li
