

Tragedy as a Critique of Virtue: The Novel and Ethical Reflection

John D. Barbour

In depicting the downfall of a good man or woman, tragedy assesses a particular form of virtue, or moral excellence, and affirms the virtue's value and significance while recognizing its inherent limitations and dangerous potential in certain circumstances. This conception of tragedy as a critique of virtue is used as the theoretical basis for ethical criticism of four tragic novels: Henry James's *The Princess Casamassima*, Herman Melville's *Billy Budd*, Joseph Conrad's *Nostromo*, and Robert Penn Warren's *All the King's Men*.

Evil and the Unconscious

Walter Lowe

Inspired by emerging new interpretations of Sigmund Freud, Lowe explores the ways in which psychoanalysis addresses the problems of evil and suffering. In particular, Lowe argues that a psychoanalytic perspective illuminates the extent to which the human condition is marked by tragic conflict and self-delusion, as well as clarifies the limits of the unreflective optimism of the human potential movement.

The Prophetic Theology of George Tyrrell

David Wells

The focus of this study is the fiery Jesuit, George Tyrrell, whose ideas disappeared in the wreckage of Modernism. Later, the Second Vatican Council produced teachings which bore a striking resemblance to what he taught, and this evidence raises the provocative question of how yesterday's heresy could become today's orthodoxy. Tyrrell's theology is here freshly evaluated.

The Bible in American Education

David Barr, Nicholas Piediscalzi, editors

The eight essays in this book provide perspective on the present interaction of the Bible and American education by examining specific educational and historical settings from the Colonial period to the present. They show how the Bible gave shape to educational institutions and how, in turn, historical, cultural, and educational styles influenced the ways in which the Bible has been studied and interpreted.

ORIGEN: SPIRIT & FIRE
A Thematic Anthology of His Writings

by Hans Urs von Balthasar

Translated by Robert J. Daly, S.J.

Called the "man of steel" by scholars who came after him, Origen ranks in importance for the history of Christian thought beside St. Augustine and St. Thomas Aquinas. Von Balthasar compares his philosophy with that of Heraclitus and Nietzsche: "For their work too is, externally, ashes and contradiction, and makes sense only because of the fire of their souls which forces their unmanageable material into a unity and, with a massive consumption of fuel, leaves behind it a fiery track across the earth."

Social Ethics as Gospel

John Howard Yoder

The essays in this volume project a vision of Christian social ethics rooted in historical community and illuminated by Scripture. Yoder contends that for the Christian, morality is inseparable from community. Drawing upon scriptural accounts of the early church and reviewing discipleship in the radical reformation tradition, he demonstrates the Christian community's constant need for reform and change.
