

# XIth INTERNATIONAL CONGRESS OF BIOPHYSICS

**July 25-30, 1992  
Budapest, Hungary**

Organized under the auspices of the International Union of Pure and Applied Biophysics (IUPAB), the Hungarian Academy of Sciences and the Hungarian Biophysical Society; Honorary President, J. Tigyi, President, L. Keszthelyi, Head of Scientific Program Committee, S. Damjanovich.

## SCIENTIFIC PROGRAM

Macromolecular Biophysics  
Supramolecular Structure and Function  
Biological Membranes and Transmembrane Signalling  
Biophysics of Nucleic Acids and Gene Expression  
Bioenergy Production and Flow  
Cellular Network Transduction and Sensing  
Advanced Experimental Techniques

*Opening lecture:* M. Eigen (Germany)

*Plenary lectures:* J. Hajdu (U.K.) M. Karplus (USA), C. Miller (USA), B. Sakman (Germany), A. Yonath (Israel), A.C. Yoshizawa (Japan)

The Organizing Committee, in collaboration with experts of IUPAB, has invited world leaders in each area to organize topical symposia for summarizing the most recent developments and setting the shape of future progress in biophysics.

The Council of IUPAB and the Organizing Committee have approved the organization of six pre- and post-congress satellite meetings and a summer-school on various fields of biophysics.

Fax: +(36-62) 53656, 23600, 13726  
E-mail: H1855GAR@ELLA.HU

## INSTRUCTIONS TO AUTHORS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published. Suggestions for reviews can be made to the editors.

2. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing throughout, including the list of references, with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article. Chapter and section headings and the table of contents should conform to the style in any issue from volume 19 onwards.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the *World List of Scientific Periodicals*. Authors should follow the example below for layout and punctuation:

BERNAL, J. D. (1967). *Origins of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* 1, 3–33.

SWENBERG, C. E. & GEACINTOV, N. E. (1973). Exciton interactions in organic solids. In *Organic Molecular Photophysics*, vol. 1 (ed. J. B. Birks), pp. 489–564. London: Wiley.

5. Drawings and photographs should be of the highest possible quality. The maximum size should be A4. Explanations should as far as possible be placed in the legends. Lettering for drawings and photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. In the case of multiple authorship these proofs and offprints will be sent to the first-named author only. One hundred additional copies may be purchased if ordered at the time proofs are returned.

---

## COPYING

This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US © law) subject to payment to C.C.C. of the per-copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0033-5835/92 \$5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission must be sought from Cambridge or the American Branch of Cambridge University Press.

*Quarterly Review of Biophysics* is covered by relevant abstracting and indexing services including *Biological Abstracts*, *Chemical Abstracts*, *Current Awareness in Biological Science*, *Current Contents*, *Excerpta Medica* and *Index Medicus*.
