PROCEEDINGS

OF THE

CAMBRIDGE PHILOSOPHICAL SOCIETY

VOL. XXIII

PART I

(WITH PLATE I AND TITLE-PAGE, TABLE OF CONTENTS, AND INDEX TO VOL. XXII)

CAMBRIDGE
AT THE UNIVERSITY PRESS
AND SOLD BY
DEIGHTON, BELL & CO., LIMITED,
AND BOWES & BOWES, CAMBRIDGE
CAMBRIDGE UNIVERSITY PRESS,
FETTER LANE, LONDON, E.C. 4
1926

February 1926.

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

NOTICES.

1. As the stock of early Parts of the *Transactions* and *Proceedings* of the Society is very unequal, the Council is obliged to require that no separate Parts of Volumes I—XI of the *Transactions*, or of Volumes I—XVI of the *Proceedings*, shall be sold without the authority of the Secretaries; to whom also enquiries concerning complete sets should be made.

Members of the Society having early Parts of the publications to dispose of, to add to the sets in the hands of the Society, are invited to communicate with the Secretaries.

2. Letters, and Communications to the Society, should be addressed to one of the Secretaries,

Mr J. GRAY, King's College. [Biological]

Mr F. P. WHITE, St John's College. [Mathematical]

Mr R. H. FOWLER, Trinity College. [Physical]

Presents for the Library of the Society should be addressed to *The Philosophical Library, New Museums, Cambridge.*

3. Fellows and Honorary Members who desire the *Transactions* of the Society to be sent to them should communicate with the Secretaries if they do not receive the Numbers as they appear.

4. Authors of papers are informed that the Illustrations and Diagrams are executed as far as possible by photographic "process" work; drawings should be on a large scale and on smooth white Bristol board in Indian ink.

Authors may receive, on request, twenty-five offprints of a paper in the *Proceedings* or *Transactions*, without charge. Additional copies may be had by payment to the University Press.

5. *Members of the Society are particularly requested to inform the Secretaries of any change of postal address.*

CONTENTS

VOL. XXII

PAGE

On certain nets of plane curves. By Mr F. P. WHITE, St John's College 1

The conics through fives of six points. By Mr F. P. WHITE, St John's College 11

On the stability of the periodic states of the triode oscillator. By Mr W. M. H. GREAVES, St John's College 16

Involutions on a normal quartic curve in space of four dimensions. By Mr C. G. F. JAMES, Trinity College 24

On errors of observation. By Dr W. BURNSIDE, Pembroke College . 26

On the generalisation of a theorem of Steiner. By Professor H. F. BAKER 28

On an extension of Wallace's pedal property of the circumcircle. By Mr H. W. RICHMOND, King's College 34

On the real twisted cubic curves which are geodesic upon a quadric surface. By Mr H. W. RICHMOND, King's College 42

On the number of lines which meet four regions in hyper-space. By R. VAIDYANATHASWAMY. (Communicated by Mr H. W. TURNBULL, Trinity College) 49

The mechanism of the rusting of iron. By Mr U. R. EVANS, King's College 54

Angular momentum and electron impact. By P. M. S. BLACKETT, King's College. (Four Text-figures) 56

Hankel transforms. By E. C. TITCHMARSH. (Communicated by Mr G. H. HARDY) 67

On a modified electrostatic oscillograph. By Dr J. A. CROWTHER, St John's College. (One Text-figure) 68

An oscillographic study of the production of X-rays by a Coolidge tube. By Dr J. A. CROWTHER, St John's College. (Plates I, II) . . 70

An early formulation by Stokes of the theories of the rotatory polarizations of light. By Sir JOSEPH LARMOR, Lucasian Professor . . . 76

On Graeffe's method for complex roots of algebraic equations. By Mr S. BRODETSKY, Trinity College, and G. SMEAL 83

On the problem of four particles. By Mr J. BRILL, St John's College . 88

Canonical forms of the quaternary cubic associated with arbitrary quadrics. By Mr H. W. TURNBULL, Trinity College 92

On protecting and sensitising colloidal sols. By Mr ERIC K. RIDEAL . 101

The equation of state of a gas. By J. E. JONES, 1851 Exhibition Senior Research Student, Trinity College, Cambridge. (Communicated by Mr R. H. FOWLER) 105

On the differential invariants of the Laguerre group. By TADAHIKO KUBOTA. (Communicated by Professor H. F. BAKER) . . . 113

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

PAGE

On the penetration of waves and their rays into a medium of gradually varying properties. By J. A. WILCKEN, B.Sc. (Copenhagen), Ph.D. (La Plata); late of Christ's College. (Communicated by Professor Sir JOSEPH LARMOR) 124

Dissociation under a temperature gradient. By P. A. M. DIRAC, St John's College, Cambridge. (Communicated by Mr R. H. FOWLER) . . 132

The electromagnetic equations as basis of Einstein's quadratic form. By Mr R. HARGREAVES, St John's College. (One Text-figure) . . 138

On the polygons inscribed in one conic and circumscribed to another. By Dr W. BURNSIDE, Pembroke College, Cambridge 163

The problems of random flight and conduction of heat. By Dr W. BURNSIDE, Pembroke College, Cambridge 167

The integral expansions of arbitrary functions connected with integral equations. By J. HYSLOP, St John's College. (Communicated by Professor E. W. HOBSON) 169

On the angle of incidence in soaring flight. By Dr E. H. HANKIN, St John's College, and J. D. NORTH. (One Text-figure) 186

On five lines, in space of four dimensions, which lie upon a quadric threefold and the normal quartic curves of which they are chords. By F. BATH, King's College. (Communicated by Mr H. W. RICHMOND, King's College) 189

Complexes of conics and the Weddle surface. By Mr C. G. F. JAMES, Trinity College 201

Trajectories of small horizontal velocity in a resisting medium. By Mr J. E. LITTLEWOOD, Trinity College, Cayley Lecturer . . . 217

Two notes on the Riemann zeta-function. By Mr J. E. LITTLEWOOD, Trinity College, Cayley Lecturer 234

On the applicability and deformation of surfaces. By B. M. SEN, King's College. (Communicated by Professor H. F. BAKER) . . . 243

The quadratic form for radial acceleration, in the theory of relativity. By Mr R. HARGREAVES, St John's College 248

The statistical theory of dissociation and ionization by collision, with applications to the capture and loss of electrons by α-particles. By Mr R. H. FOWLER, Trinity College 253

Integrals of systems of ordinary differential equations. By Dr T. M. CHERRY, Trinity College 273

A system of linear equations with an infinity of unknowns. By E. C. TITCHMARSH. (Communicated by Mr G. H. HARDY, Trinity College) 282

On Poincaré's theorem of "the non-existence of uniform integrals of dynamical equations." By Dr T. M. CHERRY, Trinity College . 287

On the zeros of the Riemann zeta-function. By Mr J. E. LITTLEWOOD, Trinity College, Cayley Lecturer 295

On loci which have two systems of generating spaces. By Mr H. W. RICHMOND and F. BATH, King's College 319

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

PAGE

On integrals developable about a singular point of a Hamiltonian system of differential equations. By Dr T. M. CHERRY, Trinity College . 325

On a case of steady flow of a gas in two dimensions. By Mr S. LEES, St John's College. (One Text-figure) 350

The thallous thallic halides. By Mr A. J. BERRY, Downing College . 363

The high energy groups in the magnetic spectrum of the radium C β-rays. By Dr C. D. ELLIS, Trinity College. (One Text-figure) . . . 369

The relative absorbing powers of the L-levels for radiation of varying wave-length. By H. W. B. SKINNER, Trinity College. (Two Text-figures) 379

Some electrical properties of liquid sulphur. By D. H. BLACK, Emmanuel College. (Communicated by Dr F. W. ASTON.) (Four Text-figures) 393

The number of β-particles from Radium E. By K. G. EMELÉUS, B.A., St John's College. (Communicated by Professor Sir E. RUTHERFORD.) (Two Text-figures) 400

On the measurement of the critical potentials of gases. By Mr E. G. DYMOND, St John's College. (Two Text-figures) 405

The spectra of some lithium-like and sodium-like atoms. By Mr D. R. HARTREE, St John's College 409

Improvements in the apparatus for measuring the velocity of very rapid chemical reactions. By Dr H. HARTRIDGE, King's College, and Mr F. J. W. ROUGHTON, Trinity College. (Three Text-figures) . 426

Note on the Doppler principle and Bohr's frequency condition. By P. A. M. DIRAC, St John's College. (Communicated by Mr R. H. FOWLER) 432

Some experiments with an α-particle counter. By Mr E. V. APPLETON, K. G. EMELÉUS, B.A., and M. A. F. BARNETT. (Eleven Text-figures) 434

A helical method of focussing β-rays. By R. A. R. TRICKER, B.A., Trinity College. (Communicated by Professor Sir E. RUTHERFORD.) (Plate III and Three Text-figures) 454

Some methods of estimating the successive ionisation potentials of any element. By Mr D. R. HARTREE, St John's College . . . 464

An optical interference method of measuring Young's modulus for rods. By Dr G. F. C. SEARLE, Peterhouse. (Four Text-figures) . . 475

On the vector algebra of eight associated points of three quadric surfaces. By Mr H. W. TURNBULL, Trinity College 481

Why wireless electric rays can bend round the earth (Abstract). By Sir JOSEPH LARMOR, F.R.S., Lucasian Professor 488

Note on the chemical constant of chlorine. By R. R. S. COX, B.A., Christ's College. (Communicated by Mr R. H. FOWLER) 491

Dissociative equilibrium in an external field of force. By Mr E. A. MILNE, Trinity College 493

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

PAGE

Integrals developable about a singular point of a Hamiltonian system of differential equations. Part II. By Dr T. M. CHERRY, Trinity College. (One Text-figure) 510

The acceleration of β-particles in strong electric fields such as those of thunderclouds. By Professor C. T. R. WILSON, Sidney Sussex College 534

The determination of the frequency of an alternating current supply by the vibrations of rods. By Dr G. F. C. SEARLE, Peterhouse. (Three Text-figures) 539

Photographic plates for the detection of mass rays. By Dr F. W. ASTON, Trinity College. (Plate IV) 548

The kinetic theory of metallic conduction. By E. L. DAVIES and Mr G. H. LIVENS 555

The decay constant of radium emanation. By L. BASTINGS. (Communicated by Professor Sir E. RUTHERFORD) 562

On the current induced in a wireless telegraph receiving antenna. By Mr E. B. MOULLIN, Downing College. (Communicated by Mr E. V. APPLETON.) (Two Text-figures) 567

On the positive flash in vacuum discharge tubes. (Preliminary note.) By Mr R. WHIDDINGTON, St John's College. (Plate V) . . 574

The structure of radiation. By Dr EDMUND C. STONER, Emmanuel College 577

Note on the heating effect of the γ-rays from RaB and RaC. By Dr C. D. ELLIS, Trinity College, and W. A. WOOSTER, B.A., Peterhouse . 595

A preliminary note on a direct determination of the distribution of intensity in the natural β-ray spectrum of RaB and RaC. By Dr L. F. CURTISS. (Communicated by Professor Sir E. RUTHERFORD.) (Three Text-figures) 597

A generalization of Feuerbach's theorem. By Mr J. P. GABBATT, Peterhouse 601

Characteristics of complexes of conics in space of four dimensions. By Mr C. G. F. JAMES, Trinity College 621

Note on the Lorentz group. By Mr J. BRILL, St John's College . . 630

The symmetric functions of which the general determinant is a particular case. By Major P. A. MACMAHON, Sc.D., F.R.S., St John's College 633

On simplexes doubly incident with a quadric. By R. VAIDYANATHASWAMY. (Communicated by Professor H. F. BAKER) 655

On the phrase "equally probable." By Mr W. BURNSIDE, Honorary Fellow of Pembroke College 669

A note on wireless signal strength measurements made during the solar eclipse of 24 January, 1925. By Mr E. V. APPLETON and M. A. F. BARNETT. (One Text-figure) 672

The action of the electrical counter. By K. G. EMELÉUS, B.A., St John's College. (Communicated by Dr J. CHADWICK.) (Four Text-figures) 676

An extension of Wallace's, Miquel's and Clifford's theorems on circles. By Mr F. P. WHITE, St John's College 684

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

PAGE

Triple binary forms; the complete system for a single (1, 1, 1) *form with its geometrical interpretation.* By Mr W. SADDLER, St John's College. (Communicated by Mr H. W. TURNBULL) 688

A geometrical treatment of the correspondence between lines in threefold space and points of a quadric in fivefold space. By Mr H. W. TURNBULL, Trinity College 694

Theory of statistical estimation. By Mr R. A. FISHER, Gonville and Caius College 700

On the idea of frequency. By Mr W. BURNSIDE, Honorary Fellow of Pembroke College 726

The bursting of soap-bubbles in a uniform electric field. By Professor C. T. R. WILSON, and Mr G. I. TAYLOR, Trinity College. (Plates VI, VII) 728

The passage of electrons through small apertures. By J. F. LEHMANN and T. H. OSGOOD. (Communicated by Professor Sir E. RUTHERFORD, F.R.S.) (Four Text-figures) 731

An apparatus for the investigation of the effect of poisonous substances, and mixed vapours on catalytic activity. By F. H. CONSTABLE, B.A., Strathcona Research Student, St John's College. (Three Text-figures) 738

On pedal quadrics in non-euclidean hyperspace. By Mr J. P. GABBATT, Peterhouse 751

The temperature distribution in a transformer or other laminated core of rectangular cross section in which heat is generated at a uniform rate. By J. D. COCKCROFT, B.A., St John's College. (Five Text-figures) . 759

The theory of the influence of magnetic fields on the stopping power of gases for α-particles. By R. DE L. KRONIG. (Communicated by Mr R. H. FOWLER) 773

On Hausdorff's proof of the extended Riesz-Fischer theorem. By Mr S. POLLARD, Trinity College 777

On the representation of the modular group of order $\frac{1}{2}p(p^2-1)$ *as a group of linear substitutions on* $\frac{1}{2}(p-1)$ *symbols, when* p *is a prime of the form* $4n+3$. By Mr W. BURNSIDE, Honorary Fellow of Pembroke College 779

On groups of linear substitutions which contain irreducible metacyclical subgroups. By Mr W. BURNSIDE, Honorary Fellow of Pembroke College 788

A theoretical study of the stopping power of hydrogen atoms for α-particles. By Mr R. H. FOWLER, Trinity College. (One Text-figure) . . 793

Proceedings at the Meetings held during the Session 1923–1924 . . 804

Statement of Accounts of the Cambridge Philosophical Society, from January 1, 1924, to December 31, 1924 814

Notes on optical constants. By Mr C. G. DARWIN, F.R.S., Tait Professor of Natural Philosophy in the University of Edinburgh. I. *The optical behaviour of certain atomic models* 817

https://doi.org/10.1017/S030500410001197X Published online by Cambridge University Press

PAGE

Notes on optical constants. By Mr C. G. DARWIN, F.R.S., Tait Professor of Natural Philosophy in the University of Edinburgh. II. *The lateral scattering from a gas* 824

The β-ray spectrum of the natural L-radiation from radium B. By D. H. BLACK, M.Sc., Emmanuel College. (Communicated by Professor Sir E. RUTHERFORD) 832

The natural X-ray spectrum of radium B. By Professor Sir ERNEST RUTHERFORD, F.R.S., and W. A. WOOSTER, B.A., Peterhouse. (One Text-figure) 834

The analysis of the β-ray spectrum due to the natural L radiation of radium B. By D. H. BLACK, M.Sc., Emmanuel College. (Communicated by Professor Sir E. RUTHERFORD) 838

The atomic number of a radioactive element at the moment of emission of the γ-rays. By Dr C. D. ELLIS, Trinity College, and W. A. WOOSTER, B.A., Peterhouse. (One Text-figure) 844

The β-ray type of disintegration. By Dr C. D. ELLIS, Trinity College, and W. A. WOOSTER, B.A., Peterhouse 849

Assemblies of imperfect gases by the method of partition functions. By Mr R. H. FOWLER, Trinity College 861

An extended form of Kronecker's theorem with an application which shows that Burgers' theorem on adiabatic invariants is statistically true for an assembly. By L. H. THOMAS, B.A., Trinity College. (Communicated by Mr R. H. FOWLER) 886

Doublet and triplet separations in optical spectra as evidence whether orbits penetrate into the core. By Mr D. R. HARTREE, St John's College. (Three Text-figures) 904

On the theorem of Pappus. By Mr M. H A. NEWMAN, St John's College 919

On differentiation with respect to a function. By Mr E. C. FRANCIS, Peterhouse 924

The Lebesgue-Stieltjes integral. By Mr E. C. FRANCIS, Peterhouse . . 935

The enumeration of the partitions of multipartite numbers. By Major P. A. MACMAHON, Sc.D., St John's College 951

On the substitution of Wallis's postulate of similarity for Euclid's postulate of parallels. By Professor M. J. M. HILL, Peterhouse. (Eight Text-figures) 964

Proceedings at the Meetings held during the Session 1924–1925 . . 970

Index to Vol. XXII 979
