

# *Combinatorics, Probability & Computing*

## CONTENTS

A Theorem on Reconstruction of Random Graphs PETER J. CAMERON AND CLEIDE MARTINS	1
Some Dual Problems of Geometric Probability in the Plane JOHN GATES	11
Hamilton Cycles in Oriented Graphs ROLAND HÄGGKVIST	25
Sign-Coherent Identities for Characteristic Polynomials of Matroids JOSEPH P. S. KUNG	33
On a Random Instance of a 'Stable Roommates' Problem: Likely Behavior of the Proposal Algorithm BORIS PITTEL	53
Optimally Reliable Graphs for Both Vertex and Edge Failures D. H. SMITH	93

*Printed in Great Britain by the University Press, Cambridge*
