

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

Accessed 15 February 2006.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

## CONTENTS

### REVIEW ARTICLES

#### Treatments for bulimia nervosa: a network meta-analysis

Slade E, Keeney E, Mavranzouli I, Dias S, Fou L, Stockton S, Saxon L, Waller G, Turner H, Serpell L, Fairburn CG & Kendall T 2629

#### Telephone-delivered psychosocial interventions targeting key health priorities in adults with a psychotic disorder: systematic review

Baker AL, Turner A, Beck A, Berry K, Haddock G, Kelly PJ & Bucci S 2637

#### Effectiveness of interventions to promote help-seeking for mental health problems: systematic review and meta-analysis

Xu Z, Huang F, Kösters M, Staiger T, Becker T, Thornicroft G & Rüsck N 2658

### ORIGINAL ARTICLES

#### Distinct risk factors for obsessive and compulsive symptoms in chronic schizophrenia

Fernandez-Egea E, Worbe Y, Bernardo M & Robbins TW 2668

#### Acute general hospital admissions in people with serious mental illness

Jayatilleke N, Hayes RD, Chang C-K & Stewart R 2676

#### Deep brain stimulation of the supero-lateral branch of the medial forebrain bundle does not lead to changes in personality in patients suffering from severe depression

Bewernick BH, Kilian HM, Schmidt K, Reinfeldt RE, Kayser S, Coenen VA, Markett S & Schlaepfer TE 2684

#### Disparities in the management of cardiovascular risk factors in patients with psychiatric disorders: a systematic review and meta-analysis

Ayerbe L, Forgnone I, Foguet-Boreu Q, González E, Addo J & Ayis S 2693

#### Past trauma and future choices: differences in discounting in low-income, urban African Americans

van den Berk-Clark C, Myerson J, Green L & Grucza RA 2702

#### Risk of neurological, eye and ear disease in offspring to parents with schizophrenia or depression compared with offspring to healthy parents

Gunnarsdóttir ED, Hällgren J, Hultman CM, McNeil TF, Crisby M & Sandin S 2710

#### Empirical evidence for discrete neurocognitive subgroups in patients with non-psychotic major depressive disorder: clinical implications

Pu S, Noda T, Setoyama S & Nakagome K 2717

#### Psychotic experiences and general medical conditions: a cross-national analysis based on 28002 respondents from 16 countries in the WHO World Mental Health Surveys

Scott KM, Saha S, Lim CCW, Aguilar-Gaxiola S, Al-Hamzawi A, Alonso J, Benjet C, Bromet EJ, Bruffaerts R, Caldas-de-Almeida JM, de Girolamo G, de Jonge P, Degenhardt L, Florescu S, Gureje O, Haro JM, Hu C, Karam EG, Kovess-Masfety V, Lee S, Lepine J-P, Mneimneh Z, Navarro-Mateu F, Piazza M, Posada-Villa J, Sampson NA, Stagnaro JC, Kessler RC, McGrath JJ & on behalf of the WHO World Mental Health Survey Collaborators 2730

#### Prevalence and heritability of body dysmorphic symptoms in adolescents and young adults: a population-based nationwide twin study

Enander J, Ivanov VZ, Mataix-Cols D, Kuja-Halkola R, Ljótsson B, Lundström S, Pérez-Vigil A, Monzani B, Lichtenstein P & Rück C 2740

#### Increased hippocampal engagement during learning as a marker of sensitivity to psychotomimetic effects of $\delta$ -9-THC

Bhattacharyya S, Sainsbury T, Allen P, Nosarti C, Atakan Z, Giampietro V, Brammer M & McGuire PK 2748

#### Investigating ethnic variations in reporting of psychotic symptoms: a multiple-group confirmatory factor analysis of the Psychosis Screening Questionnaire

Heuvelman H, Nazroo J & Rai D 2757

#### Does thinner right entorhinal cortex underlie genetic liability to cannabis use?

Paul S & Bhattacharyya S 2766

#### What accounts for poor functioning in people with schizophrenia: a re-evaluation of the contributions of neurocognitive v. attitudinal and motivational factors

Beck AT, Himmelstein R, Bredemeier K, Silverstein SM & Grant P 2776

#### Overlap of heritable influences between cannabis use disorder, frequency of use and opportunity to use cannabis: trivariate twin modelling and implications for genetic design

Hines LA, Morley KI, Rijdsdijk F, Strang J, Agrawal A, Nelson EC, Statham D, Martin NG & Lynskey MT 2786

#### Historical precedents for the DSM-III bereavement exclusion criteria for major depression

Kendler KS 2794

#### Corrigendum

2804
