

## NEW PUBLICATION

Journal of Applied Probability Special Volume 51A

### CELEBRATING 50 YEARS OF THE APPLIED PROBABILITY TRUST

Edited by

S. ASMUSSEN, P. JAGERS, I. MOLCHANOV  
and L. C. G. ROGERS

(ISBN 978-0-902016-09-5 (2014) xviii+408 pp. hardback)

This special volume appears in celebration of the fiftieth anniversary of both the Trust and *Journal of Applied Probability*. It contains an account of the Trust's history and activities written by Joe Gani and some historical reflections on applied probability by John Kingman. It also includes the 2014 Applied Probability Trust Lectures given by Dan Crisan and Alexander Gnedin at the jubilee event held at The University of Sheffield in April. The body of the volume consists of a number of invited papers by eminent researchers in applied probability and covers topics such as biological applications, finance and econometrics, heavy tails, Markov processes and renewal theory, random graphs, particle systems, and stochastic geometry.

A contents list is available at <http://www.appliedprobability.org>

The volume is available open access, with hardback copies available for (including surface mail postage)

**£35.00/US\$56.00/A\$64.00**

Visit <http://www.appliedprobability.org> to order online or to download an order form. Orders together with payment should be sent to:

Applied Probability  
School of Mathematics and Statistics  
The University of Sheffield  
Sheffield S3 7RH, UK

For further information, contact Sue Boyles: Tel: +44 114 222 3922;  
Fax: +44 114 222 3926; Email: [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)

## Subscription rates

Subscription rates for volume **52** (2015) of *Journal of Applied Probability* (JAP) are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$344.00; A\$387.00; £222.00 for libraries and institutions; or US\$116.00; A\$131.00; £75.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **47** (2015) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 222 3926; email [s.c.boyles@sheffield.ac.uk](mailto:s.c.boyles@sheffield.ac.uk)). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

## Notes for contributors

A submission to Applied Probability is considered as a submission to either *Journal of Applied Probability* (JAP) or *Advances in Applied Probability* (AAP). Longer papers are typically published in AAP, but the assignment of papers between the two journals is made by the Editor-in-Chief on an issue-by-issue basis. Short communications and letters specifically relating to papers appearing in either JAP or AAP are published in JAP.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L<sup>A</sup>T<sub>E</sub>X class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files. All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is [submissions\\_japaap@sheffield.ac.uk](mailto:submissions_japaap@sheffield.ac.uk).

## Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/15

PRINTED IN EUROPE BY BERFORDS INFORMATION PRESS, OXFORDSHIRE

Volume 52 Number 1

*Research Papers*

- 1 FRANÇOIS ROUEFF AND PHILIPPE SOULIER. Convergence to stable laws in the space  $\mathcal{D}$
- 18 R. GARRA, E. ORSINGER AND F. POLITO. State-dependent fractional point processes
- 37 RAÚL FIERRO, VÍCTOR LEIVA AND JESPER MØLLER. The Hawkes process with different exciting functions and its asymptotic behavior
- 55 KRZYSZTOF DEBICKI, ENKELEJD HASHORVA AND NATALIA SOJA-KUKIEŁA. Extremes of homogeneous Gaussian random fields
- 68 K. M. KOSIŃSKI AND M. MANDJES. Logarithmic asymptotics for multidimensional extremes under nonlinear scalings
- 82 VASSILIN. KOLOKOLTSOV. Stochastic monotonicity and duality of  $k$ th order with application to put–call symmetry of powered options
- 102 NURIA TORRADO AND SUBHASH C. KOCHAR. Stochastic order relations among parallel systems from Weibull distributions
- 117 PATRYK MIZIUŁA AND TOMASZ RYCHLIK. Extreme dispersions of semicoherent and mixed system lifetimes
- 129 ALBERT FERREIRO-CASTILLA AND KEES VAN SCHAİK. Applying the Wiener–Hopf Monte Carlo simulation technique for Lévy processes to path functionals
- 149 HANCHAO WANG. The Euler scheme for a stochastic differential equation driven by pure jump semimartingales
- 167 BRUNO BUONAGUIDI AND PIETRO MULIERE. On the disorder problem for a negative binomial process
- 180 ERNST SCHULTE-GEERS AND WOLFGANG STADJE. Maximal percentages in Pólya’s urn
- 191 DAVID LANDRIAULT, BIN LI AND HONGZHONG ZHANG. On the frequency of drawdowns for Brownian motion processes
- 209 ZHENGJUN JIANG. Optimal dividend policy when cash reserves follow a jump-diffusion process under Markov-regime switching
- 224 LI-JUAN CHENG AND YONG-HUA MAO. Eigentime identity for one-dimensional diffusion processes
- 238 YOUZHOU ZHOU. Ergodic inequality of two-parameter infinitely-many-alleles diffusion model
- 247 A. V. KALINKIN AND A. V. MASTIKHIN. A limit theorem for a Weiss epidemic process
- 258 ERIC FOXALL. New results for the two-stage contact process
- 269 BABAK HAJI AND SHELDON M. ROSS. A queueing loss model with heterogeneous skill based servers under idle time ordering policies
- 278 ERIK A. VAN DOORN. Representations for the decay parameter of a birth–death process based on the Courant–Fischer theorem

*Short Communications*

- 290 HOSAM M. MAHMOUD AND MARK DANIEL WARD. Asymptotic properties of protected nodes in random recursive trees
- 298 MARTIN EGOZCUE AND LUIS FUENTES GARCÍA. An optimal threshold strategy in the two-envelope problem with partial information

*Letter to the Editor*

- 305 S. ASHRAFI AND M. ASADI. On Ashrafi and Asadi (2014)
