

INDEX OF SUBJECTS

- Aedes* mosquitoes and transmission of myxoma virus in England, 461
 Aerosol particle size and infection of the guinea-pig with plague, 37
 Air, bacterial flora in indoor air, 512
 Air-borne bacterial counts and air hygiene, 524
 Air hygiene and air-borne bacteria, 524
Anopheles atroparvus and transmission of myxoma virus in England, 472, 478
 Anthrax prophylaxis, 28
 Antibody and complement requirements and starch granule phagocytosis, 8
 Antibody, heterologous in foot-and-mouth disease, 328
 Anticoagulant rodenticide, Pival, 20
 Antitoxin production and cortisone acetate, 452
- Bacteria, drying in peptone plugs, 487
 Bacterial flora in air of occupied rooms, 512
 Bacteriophages, staphylococcal, 213
 Bat-wing membrane technique and insect transmission of animal viruses, 192
 Bluetongue virus antigen in infected mouse brain, 79
 Brain tissue adsorption of tetanus toxin, 315
 Brucella infections, incomplete antibodies, 562
Brucella ovis and genital disease of sheep in Australia and New Zealand, 351
Brucella suis and respiratory infection of guinea-pigs, 49
- Canine virus hepatitis, complement-fixing antigen, 141
 Coli/coliphage relationship in sewage, 99
 Coliform bacilli in soil, sanitary significance, 365
 Complement heat-inactivation, prevention by some carbohydrates, 388
 Complement, protective action against heat-inactivation by glycine, 172
 Complement, protective action of glycolamide, 388
 Cortisone acetate, species difference in effect on laboratory animals, 452
- Declining populations, statistical study, 304
 Dengue virus type 1, isolation in Malaya, 569
 Dilution counting experiments, host susceptibility, variation in, 401
 Drying bacteria in peptone plugs, 487
- Epidemiology of myxomatosis, mechanical transmission by mosquitoes, 284
 Epidemiology of Q fever in East Anglia and Kent, 118
 Epidemiology of Q fever in rural and urban areas in south-east England, 533, 547
 Exhibition phenomenon with *Pseudomonas aeruginosa* phage 13, 441
 Experimental pulmonary anthrax, prophylaxis of, 28
- Fish, salmonella contamination of, in Ceylon, 581
 Foot-and-mouth disease, a non-specific complement-fixation system, 328
- Gamma-globulin, species difference effect of cortisone on, 452
 Genital disease caused by *Brucella ovis*, 351
 Glycerol influence on viability of *Trichomonas foetus* during freezing and thawing, 335
 Glycine protective action against heat-inactivation of complement, 172
 Glycolamide effect on heat-inactivation of complement, 388
- Haemolytic disease of newborn piglets, 153
 Heterologous antibody absorption from serum in foot-and-mouth disease, 328
 Host susceptibility, variation in dilution counting experiments, 401

- Immunity to *Salmonella gallinarum* infection with live vaccines, 433
 Immunization against typhoid O and Vi antigens, 592
 Immunological paralysis, partial, to *Trichomonas foetus* antigens, 415
 Incomplete antibodies in brucella infections, 562
 Infantile gastro-enteritis and milk, 311
 Infectivity titrations of myxoma virus, 246
 Influenza virus A, nucleic acid and carbohydrate content of, 201
 Influenza virus, preservation of, 509
 Influenza virus, six-hour soluble antigen production test of infectivity, 58, 68
 Insect transmission of animal viruses, bat-wing membrane technique, 192
 Interference effect of live vaccines of *Salmonella gallinarum*, 419
 Interference phenomenon caused by *Pasteurella pestis*, 227

 Live vaccines of *Salmonella gallinarum*, interference effect of, 419

 MEF₁ poliomyelitis virus, soluble antigen, 1
Microsporium canis Bodin in New Zealand, 378
 Milk and infantile gastro-enteritis, 311
 Mosquito transmission of myxoma virus, 258, 461, 472
 M substance, loss of, in strains of *Streptococcus pyogenes*, 89
 Myxoma virus, infectivity titrations, 246
 Myxoma virus, mosquito transmission, 258, 284, 461, 472
 Myxomatosis and *Anopheles atroparvus*, 472, 478

 Newala epidemic, isolation and study of virus, 177
 Newborn piglet, haemolytic disease of, 153
 Newcastle disease virus, strain differences, 234
 Nucleic acid and carbohydrate content of influenza virus A, 201

 Obituary: Arthur Felix, 152

Pasteurella pestis, interference phenomenon, 227
 Peanut oil as a stabilizer of Vi antigen of typhoid bacilli, 592
 Phages, classification of staphylococcal, 213
 Phagocytosis of starch granules, antibody and complement requirements, 8
 Pival, an anticoagulant rodenticide, 20
 Plague, experimental pulmonary and particle size of aerosols, 37
 Poliomyelitis virus MEF₁, soluble antigen of, 1
 Populations, declining, statistical study, 304
 Pox group of viruses, intracellular growth of some, 393
 Preservation of bacteria by drying, 487
Pseudomonas aeruginosa phage 13, exhibition phenomenon, 441

 Q fever in Great Britain, epidemiological studies, 118, 533, 547
 Q fever in rural and urban areas in south-east England, 533, 547

 Respiratory infection in guinea-pig with *Brucella suis*, 49
 Respiratory infection in guinea-pig with *Pasteurella pestis*, 37
 Rodenticide, an anticoagulant, Pival, 20
 Rubarth's disease, virus of, 141

 Salmonella in Ceylon fish, 581
Salmonella gallinarum, live vaccines and immunity, 419, 433
 Sewage and coli/coliphage relationship, 99
 Silica toxicity, 342
 Soil, sanitary significance of coliform bacilli, 365
 Solubility of Vi antigen, 585
 Soluble antigen production test, six-hour, for influenza virus infectivity, 58, 68

- Staphylococcal phages, classification of, 213
- Starch granules, antibody and complement requirements for phagocytosis, 8
- Streptococcus pyogenes* and loss of M substance, 89
- Tetanus toxin, adsorption by brain tissue, 315
- Trichomonas foetus* antigen, partial immunological paralysis to, 415
- Trichomonas foetus* viability, 335
- Typhoid immunization with oil-stabilized antigens, 592
- Vaccinia virus, complement-fixing antigen and haemagglutinin in chick embryo cultures, 102,
114
- Variation in host susceptibility, 401
- Vi antigen of *Salmonella typhi*, solubility of, 585
- Virus of Newcastle disease, strain differences, 234
