PUBLISHED BY CAMBRIDGE UNIVERSITY PRESS FOR
AND ON BEHALF OF THE ASSOCIATION OF SYMBOLIC LOGIC.

The BULLETIN, the JOURNAL and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in logic and the exchange of ideas among mathematicians, computer scientists, linguists, and others interested in this field. The BULLETIN encourages submissions of *Articles* and *Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. It also encourages the submissions of abstracts for doctoral level theses in logic. The BULLETIN also publishes reviews of publications in logic.

Thesis abstracts editor

Christian Rosendal rosendal@math.uic.edu

Articles present topics of broad interest in a way that is accessible to a large audience. They can be purely expository, survey, or historical articles or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final version.

To submit *Articles* or *Communications* please follow the procedure described at <http://www.aslonline.org/journals-bulletin-guide.html>

To submit *Thesis Abstracts* please follow the procedure described at <http://aslonline.org/LogicThesisAbstracts.html>

Books for review in the BULLETIN should be sent to **ASL, Department of Mathematics, University of Connecticut, 341 Mansfield Road, U-1009, Storrs, CT 06269-1009, USA.**

TABLE OF CONTENTS

ARTICLES

Polymorphism and the obstinate circularity of second order logic: A victims' tale, by PAOLO PISTONE.....	1
A hierarchy of computably enumerable degrees, by ROD DOWNEY AND NOAM GREENBERG	53

COMMUNICATIONS

A constructive examination of a Russell-style ramified type theory, by ERIK PALMGREN.....	90
--	----

REVIEWS

Alexander Razborov, <i>Flag algebras</i> Reviewed by James Cummings.....	107
