

LASER AND PARTICLE BEAMS

VOLUME 13 NUMBER 2
1995

PULSE POWER AND HIGH ENERGY DENSITIES

SPECIAL ISSUE: 6th International Workshop
on Atomic Physics for Ion-Driven Fusion

CAMBRIDGE
UNIVERSITY PRESS

Laser and Particle Beams

Pulse Power and High Energy Densities

Editor in Chief:

G. H. MILEY
 Director, Fusion Studies Laboratory,
 University of Illinois,
 103 S. Goodwin Ave, Urbana, IL 61801, USA

Emeritus Editor in Chief: HEINRICH HORA

Professor Emeritus
 University of New South Wales
 Kensington 2033, Australia

Associate Editors:

R. DAUTRAY (for Europe)
 Scientific Director, CEA Limeil, B.P. 27
 94190 Villeneuve St. Georges, France

A. H. GUENTHER (for Pulse Power)
 Scientific Advisor (Lab. Development)
 Sandia National Laboratories
 Albuquerque, NM 87115

C. YAMANAKA (for Japan)
 Director, Institute of Laser Engineering,
 Osaka University, Suita,
 565 Osaka, Japan

Editorial Board

N. G. Basov (Moscow)
 D. Cartwright (Los Alamos)
 P. van Devender (Albuquerque)
 S. Eliezer (Soreq, Israel)
 G. Kessler (Karlsruhe)
 M. H. Key (Rutherford Appleton Lab.)
 M. Kristiansen (Pulse Power Lab,
 Texas Tech)
 R. L. McCrory (Rochester)
 G. A. Mesyats (Sverdlovsk, Russia)
 P. Mulser (Darmstadt)
 S. Nakai (Osaka)
 K. Niu (Nagatsuta)
 A. A. Offenberger (Alberta)
 A. M. Prokhorov (Moscow)
 B. Ripin (Washington)
 D. D. Ryutov (Novosibirsk)
 E. Storm (Livermore)
 J. P. Wetteau (CEA Limeil)

Laser and Particle Beams is an international journal that covers the generation, and the interaction with matter, of high intensity laser and particle beams. It also covers the physics of systems with high energy densities. Specific fields of interest include nuclear fusion, especially inertial confinement, magnetic confinement, diagnostics, material treatment, laboratory astrophysics, plasmas and spectroscopy at extreme conditions, physical properties of hot dense matter and intense particle beams and optical (laser) beams from the microwave to the X-ray region. The exploration of these fields and their new physics, including nonlinear and nonclassical phenomena, should find a forum in this journal.

As well as publishing original articles the journal also publishes occasional review articles, surveys of research at particular laboratories and reviews of recent books.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$11.00 + .10. This consent does not extend to multiple copying for promotional or commercial purposes. Code 5/0263-0346/95/\$11.00 + .10.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission must be sought from Cambridge University Press.

Subscriptions: *Laser and Particle Beams* (ISSN 0263-0346) is published quarterly. The subscription price for institutions (which includes postage) of Volume 13, 1995 is US \$330 for the US, Mexico, and Canada (UK £175 elsewhere). Individual rates: US \$95 in the US, Mexico, and Canada; UK £60 elsewhere. Single parts cost US \$84 for the US, Mexico, and Canada (UK £50 elsewhere) plus postage. Four parts form a volume. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or direct to the publishers: Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211, USA; orders outside the US, Canada, or Mexico may be sent to Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, England. Claims for missing issues should be made immediately after receipt of the next issue. POSTMASTER: Send address changes in the US, Mexico, and Canada to *Laser and Particle Beams*, Cambridge University Press, 110 Midland Avenue, Port Chester, NY 10573-9864.

Second Class Postage paid at New York, NY and at additional mailing offices.

Tom A. Mehlhorn

LASER AND PARTICLE BEAMS

Pulse Power and High Energy Densities

Volume 13, Number 2, 1995

Special Issue: Papers from the 6th International Workshop on Atomic Physics for Ion-Driven Fusion, November 7–12, 1993, Santa Fe, New Mexico, USA.

G.H. Miley: Editor's Preface 177

T.A. Mehlhorn: Guest Editor's Preface 179

W. Laux, J. Jacoby, and D.H.H. Hoffmann (Gesellschaft für Schwerionenforschung, Darmstadt, Germany): X-ray diagnostics of dense plasmas produced by high-energy heavy ions 183

P. Wang, J.J. MacFarlane, and G.A. Moses (Univ. of Wisconsin, Madison, WI, USA): Effects of multiple ionization on the K_{α} spectrum of aluminum in intense lithium beam experiments 191

X. Kang, K. Masugata, and K. Yatsui (Nagaoka Univ. of Tech., Niigata, Japan): Evaluation of ablation plasma characteristics of intense, pulsed, ion-beam evaporation 201

C. Deutsch and N.A. Tahir (Univ. Paris XI, Orsay Cedex, France): Fragmentation and stopping of heavy cluster ions in a lithium target 211

A. Tauschwitz, E. Boggasch (Max-Planck-Inst., Garching, Germany), D.H.H. Hoffmann, J. Jacoby (Gesellschaft für Schwerionenforschung, Darmstadt, Germany), U. Neuner, M. Stetter, S. Stöwe, R. Tkotz (Physikalisches Inst., Erlangen, Germany), M. de Magistris (Univ. di Napoli, Napoli, Italy), and W. Seelig (Inst. für Angewandte Physik, Darmstadt, Germany): Heavy-ion beam focusing with a wall-stabilized plasma lens 221

J.J. MacFarlane, P. Wang (Univ. of Wisconsin, Madison, WI, USA), J.E. Bailey, T.A. Mehlhorn, and R.J. Dukart (Sandia Nat. Labs., Albuquerque, NM, USA): Plasma diagnostics using K_{α} satellite emission spectroscopy in light ion beam fusion experiments 231

S.A. Slutz (Sandia Nat. Labs., Albuquerque, NM, USA): Analytic optimization of ion driven hohlraums 243

T. Blenski and S. Morel (Ecole Polytech. Féd. de Lausanne, Lausanne, Switzerland): Application of Hartree-Fock theory of fluctuations to opacity calculation 255

G. Maynard, C. Deutsch, P. Fromy, and K. Katsonis (CNRS, Univ. Paris XI, Orsay, France): Atomic physics for inertial fusion using average correlated hydrogenic atom model 271

P. Sigmund and A. Nørmann (Odense Univ., Odense M, Denmark): Charge-exchange and energy-loss statistics of swift penetrating ions 281

M. Chabot, D. Gardès, J. Kiener, S. Damache, B. Kubica (IPN, Orsay, France), C. Deutsch, G. Maynard, M. Pouey (LPGP, Orsay, France), W. André, C. Fleurier, D. Hong (GREMI, Orléans, France), K. Wohrer (GPS, Paris VI, France), and D.H.H. Hoffmann (GSI, Darmstadt, Germany): Charge-state distributions of chlorine ions interacting with cold gas and with fully ionized plasma 293

V.L. Jacobs (Naval Research Lab., Washington, DC, USA) and A.B. Filuk (Sandia Nat. Labs., Albuquerque, NM, USA): Polarization of atomic radiative transitions in crossed electric and magnetic fields 303

G. Zwacknagel, C. Toepffer, and P.-G. Reinhard (Univ. Erlangen, Erlangen, Germany): Stopping power of heavy ions in strongly coupled plasmas 311

Contents continued on page iv

Contents continued from page iii

E.J. McGuire (Sandia Nat. Lab., Albuquerque, NM, USA): Systematic ion-atom interaction cross sections and stopping powers in the plane wave Born approximation 321

E. Nardi and Z. Zinamon (Weizmann Inst. of Science, Rehovot, Israel): The interaction of large fast carbon clusters with plasma 335

W. Jiang, T. Sakagami, K. Masugata, and K. Yatsui (Nagaoka Univ. of Tech., Niigata, Japan): Three-dimensional, tight focusing of intense pulsed light-ion beam by spherical plasma focus diode 343
