

PROCEEDINGS

OF THE

ROYAL SOCIETY OF EDINBURGH

SESSION 1939-40

PART II]

VOL. LX

[Pp. 129-240

CONTENTS.

NO.		PAGE
X.	Interpolated Derivatives. By B. SPAIN, Ph.D., Mathematical Institute, University of Edinburgh. <i>Communicated by Professor E. T. WHITTAKER, F.R.S.</i>	134
	(<i>Issued separately June 3, 1940.</i>)	
XI.	Reciprocity. Part III: Reciprocal Wave Functions. By Professor MAX BORN, F.R.S., University of Edinburgh, and KLAUS FUCHS, D.Sc., Carnegie Research Fellow	141
	(<i>Issued separately June 10, 1940.</i>)	
XII.	Reciprocity. Part IV: Spinor Wave Functions. By KLAUS FUCHS, D.Sc., Carnegie Research Fellow, University of Edinburgh. <i>Communicated by Professor MAX BORN, F.R.S.</i>	147
	(<i>Issued separately June 10, 1940.</i>)	
XIII.	Tests of Carcinogenic Substances in Relation to the Production of Mutations in <i>Drosophila melanogaster</i> . By CHARLOTTE AUERBACH, Ph.D., Institute of Animal Genetics, University of Edinburgh. <i>Communicated by Dr A. W. GREENWOOD</i>	164
	(<i>Issued separately June 10, 1940.</i>)	
XIV.	The Genetical and Mechanical Properties of the Sex Chromosome. VI. <i>Hexacentrus mundus</i> . By P. C. KOLLER, D.Sc., Ph.D., Institute of Animal Genetics, University of Edinburgh. (With Fifteen Text-figures)	174
	(<i>Issued separately July 18, 1940.</i>)

PUBLISHED BY ROBERT GRANT & SON, LTD., 126 PRINCES STREET, AND
WILLIAMS & NORGATE, LTD., 36 GREAT RUSSELL STREET, LONDON, W.C. 1
AND PRINTED BY NEILL & CO., LTD., 212 CAUSEWAYSIDE, EDINBURGH, 9

Price Nine Shillings

ROYAL SOCIETY OF EDINBURGH,

22, 24 GEORGE STREET, EDINBURGH, 2.

THE PREPARATION FOR PUBLICATION OF PAPERS IN THE TRANSACTIONS AND PROCEEDINGS OF THE SOCIETY.

IN view of the national necessity for exercising the strictest economy in paper and the high cost of publication, authors of papers are requested to write their communications in as concise a form as possible and to avoid excess of tables and illustrations.

An author is advised to retain a copy of his paper, as the Society cannot undertake any responsibility in relation to the custody of papers entrusted to it. The MS. must be easily legible, preferably typewritten on one side of quarto or foolscap paper and with pages numbered. *It must be absolutely in its final form for printing.* A short summary of the important points in the paper should be given. A table of contents (for a long paper), references to plates, etc., must be in their proper places, and positions indicated for the insertion of illustrations that are to appear in the text. Names of genera and species should be in italics. Footnotes should be avoided.

Additions to a paper after it has been finally handed in for publication will, if accepted by the Council, be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

References to literature should be placed at the end of the paper, alphabetically arranged, under authors' names, with abridged titles of journals, thus:—

SANDEMAN, I., 1929. "The Fulcher Bands of Hydrogen," *Proc. Roy. Soc. Edin.*, vol. xlix, pp. 48–64.

WHITTAKER, E. T., and ROBINSON, G., 1923. *A Short Course in Interpolation*, London.

Titles of papers should be quoted exactly, and all references to literature should be carefully checked by the authors before submitting the paper. References to literature in the text should be made by quoting the author's name and the year of publication thus (Sandeman, 1929) or (Whittaker and Robinson, 1923), and adding the page when necessary.

All illustrations must be in a form immediately suitable for reproduction, preferably of a size to permit reduction to about two-thirds the linear dimensions of the original, and should be capable of reproduction by photographic processes. Drawings and diagrams to be reproduced as line blocks should be made with fixed Indian ink, preferably on fine white bristol board, free from folds or creases; smooth clean lines or sharp dots, but no washes or colours, should be used. Graphs should be on a squared paper ruled in *faint blue* lines, unless the lines are to be brought out. If the illustrations are on a large scale to be afterwards reduced by photography, any lettering must be on a corresponding scale.
