

SCIENCE CITATION INDEX®...
the reference that sheds a whole new light
on literature searching...

belongs in every scientific library

Science Citation Index—the uniquely effective search tool that organizes the world's current scientific journal literature by the authors' own reference citations—retrieves more pertinent articles on almost any given subject, faster, than any other reference of any kind.

It's the one multi-disciplinary retrospective search tool that serves all departments because it covers all scientific subjects with unmatched authority. It's the one reference that finds material that gets lost in the limitations of conventional, subject-oriented literature indexing systems.

SCI® makes use of an indexing system that follows scientists' own traditional method of literature searching—that of locating articles related to their subject interests by

examining reference citations of articles known to be relevant. The technique is called "citation indexing". And the **SCI** is the only comprehensive index to the journal literature that offers it.

The **Science Citation Index** is the one standard literature-search reference that no library serving the scientific community can afford to be without. If your library doesn't yet have this most useful of all literature retrieval tools... used by libraries large and small... bring your search capabilities up to date now. And plan extra sets for branch and departmental libraries where they can do the most good for your entire organization. (Special matching grants are available to smaller departmental and branch libraries to make it economical to obtain multiple sets of **SCI**.)

For more on what the **Science Citation Index** can do for your library, send for our new brochure.

Dept. 500-300, 325 Chestnut St., Phila., Pa. 19106, (215) 923-3300

The journal you are reading and 5000 others are regularly covered in **CURRENT CONTENTS®**.

Proceedings of the British Society of Animal Production

Publication of an annual Proceedings recommenced in 1972. It contains reports, reviews and papers presented at the Society's meetings or commissioned by the Society. Original research papers are given in abstract only and continue to appear fully in *Animal Production*. Other material is given more extended coverage in particular papers presented at Symposia organised by the Society. These include:

1972 Proceedings: Artificial Rearing of Pigs
Processing of Roughages
Aspects of Carcass Evaluation
Animal Production from
Grassland

1973 Proceedings: Size of Animal in Relation
to Productivity with Special
Reference to the Ruminant

The annual subscription for the Proceedings (approx. 120 pages) is £1.75 (\$6.00 U.S. and Canada) but only £1 (\$3) extra if taken in a joint subscription with *Animal Production* (joint subscription £10.00 or \$28.00 U.S. and Canada).

Orders and enquiries to Longman Group Limited, Journals Division, 43-45 Annandale Street, Edinburgh, EH7 4AT.

Summary: Every article should have a short summary (not more than 250 words) complete in itself and understandable without reference to the paper. *The summary will be printed at the beginning of the paper.*

References: Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. Bibliographical details should be in the following order: author's name, initials, year, title of paper, title of journal (abbreviated according to the World List of Scientific Periodicals), volume of journal, first and last page of paper. References should be listed in alphabetical order. When abstracts are referred to, the page reference should be followed by (Abstr.).

Examples:

BLAXTER, K. L. and WILSON, R. S. 1962. The voluntary intake of roughages by steers. *Anim. Prod.* **4**: 351-358.

HAMMOND, J. 1932. *Growth and the Development of Mutton Qualities in the Sheep*. Oliver and Boyd, Edinburgh.

In the text, references should be made by giving author and year; at the first mention all authors should be named, thereafter the first author followed by *et al.* should be used for papers with more than two authors.

Proofs are supplied once and must be returned corrected to the Editors within seven days. Only essential corrections should be made.

Reprints: Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof stage.

Animal Production is published six times a year in two volumes. Annual subscription is £9.00 (or \$25.00 in the U.S.A. and Canada) and the price for a single part is £1.75 (or \$6.00) net.

Proceedings of the British Society of Animal Production recommenced annual publication as a new series in 1972. Annual subscription is £1.75 (\$6.00 U.S. and Canada) or available with a joint subscription to *Animal Production* at £10.00 (\$28.00).

Business matters, including regular subscriptions and sales (current and back numbers of the Journal and the Proceedings) should be addressed to Longman Group, Journals Division, 43/45 Annandale Street, Edinburgh EH7 4AT.
