American Branch: 32 East 57th Street, New York, N.Y. 10022

SUBSCRIPTION £5 net (U.S.A. \$18.50) per volume

SINGLE PARTS 45s. net (U.S.A. \$7.50)

GENETICAL RESEARCH

GENETICAL RESEARCH publishes original work on all aspects of genetics, or in any field of research which has an important bearing on genetics. Papers will be submitted to referees before acceptance. They will generally be printed in order of acceptance. In addition, Short Papers (see below) may be included if received 3 months before publication date.

GENETICAL RESEARCH is published bi-monthly.

Single parts 45s. net (\$7.50 in U.S.A.), plus postage.

Three parts form a volume. The subscription price of a volume (which includes postage) is £5 net (\$18.50 in U.S.A.).

Copies of the journal. For subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second Class postage paid at New York, N.Y.

Orders should be sent to a bookseller or to the publishers.

NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English, with an English summary. An additional summary in French, German, Russian or Italian will be accepted. Papers should be sent to the Executive Editor, Dr E. C. R. Reeve, Institute of Animal Genetics, West Mains Road, Edinburgh 9.

GENERAL. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in *Genetical Research* may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible.

SHORT PAPERS. This category is designed for concisely written reports of work for which rapid publication is considered desirable. Such papers will normally be published within three months of receipt in acceptable form. They should not exceed 6 pages of print in length.

TYPESCRIPTS. A top copy and one carbon copy should be submitted. They should be typed with double-spacing, on one side of the paper, leaving margins of about $1\frac{1}{2}$ inches at the left-hand side and head of each sheet. Quarto is preferred to foolscap paper. Heavily corrected typescripts may have to be returned to the author for retyping. Papers should state the name and address of the author (or his proxy) to whom proofs are to be sent. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper, and changes of address and sources of financial support may be added in footnotes.

A short title should be supplied for running headlines; this must not exceed 50 characters, counting each letter and space as one character.

(continued inside back of cover)

JOURNAL OF REPRODUCTION AND FERTILITY

The Journal publishes original papers, abstracts of Proceedings, and occasionally reviews and bibliographies, dealing with the morphology, physiology, biochemistry and pathology of reproduction in man and animals, and with the biological, medical and veterinary problems of fertility and lactation. Nine numbers are issued to give three volumes a year.

Papers to appear during 1968 include:

- J. G. VANDENBERGH and S. VESSEY. Seasonal breeding of free-ranging rhesus monkeys and related ecological factors.
- P. J. BURFENING and L. C. ULBERG. Embryonic survival subsequent to culture of rabbit spermatozoa at 38° and 40° C.
- W. R. BUTLER, A. D. JOHNSON and W. R. GOMES. Effect of short term vitamin A deficiency on testicular lipids in the rat.
- L. MONDORF and M. FABER. The influence of radiation on human fertility.
- A. BARTKE. Effect of an IUD on implantation and the decidual reaction in different strains of mice.
- K. HUMPHREY and L. MARTIN. The effect of oestrogen and anti-oestrogens on ovum transport in mice.
- E. M. COURTINHO and J. C. DE SOUZA. Conception control by monthly injections of medroxyprogesterone suspension and a long-acting oestrogen.
- P. D. ALTLAND and B. HIGHMAN. Sex organ changes and breeding performance of male rats exposed to altitude: effect of exercise and physical training.
- J. L. THOMSON. Effect of two nonsteroidal antifertility agents on pregnancy in mice. 1. Comparison of *in vitro* and *in vivo* effects on zygotes.
- N. KOVACIC. Mouse hyperaemic corpora lutea assay of prolactin.
- H. M. BRUCE, R. B. LAND and D. S. FALCONER. Inhibition of pregnancy-block in mice by handling.
- S. A. BARNETT and M. J. LITTLE. Conception and parturition of mice at two temperatures.
- ANNE MCLAREN. Can beads stimulate a decidual response in the mouse uterus?
- D. J. DIERSCHKE and M. T. CLEGG. Studies on the relationship of serum and pituitary gonadotrophin levels to ovulation in the ewe.

Editorial correspondence should be sent to the Executive Editor, Journal of Reproduction and Fertility, 8 Jesus Lane, Cambridge, England, and business correspondence to the publishers.

The subscription rate for 1968 is £7 per volume or £21 per year (three volumes). U.S.A. and Canada \$23.50 per volume or \$70.00 per year.

ANIMAL BREEDING ABSTRACTS

is such an invaluable guide to the latest literature on livestock breeding and genetics that we can hardly believe you have not heard of it, * BUT do you know about our

ANNOTATED BIBLIOGRAPHIES

The following titles may be of interest to you:

Number	Subject	Period covered	Number of references	Price
41	The effect of heterozygosity in rodents	1945-66	5	6s.
42	Theoretical aspects of heterozygosity	1955-64	26	6s.
43	Theoretical aspects of ageing	1962-66	5	6s.
44	The effect of ageing in mice and rats	1947-66	46	12s.
49	Twinning in cattle	1955-67	68	18s.
50	Inheritance of black coat colour in sheep	1956-65	8	6s.
52	Heritability of udder conformation	1952-66	51	12s.
69	Genotype-environment interaction in cattle	1961-67	41	12s.

These are duplicates of bibliographies prepared on request at the Commonwealth Bureau of Animal Breeding and Genetics, Edinburgh. In addition to the full title reference, the abstract published in *Animal Breeding Abstracts* is reproduced. They can be obtained on application to the Director of the Bureau, The King's Buildings, West Mains Road, Edinburgh, 9. The prices quoted include postage by ordinary mail, and the remittance should be sent with the order *unless you want it posted by air mail*. If the material is to be sent by air mail, do not send money with your request. You will receive an invoice which includes air mail postage.

* *Animal Breeding Abstracts* can be ordered through any bookseller or direct from Commonwealth Agricultural Bureaux, Farnham House, Farnham Royal, Bucks., England. The subscription is 110s. annually, or 210s. if you live outside the British Commonwealth.

COMMONWEALTH BUREAU OF PLANT BREEDING AND GENETICS

SCHOOL OF AGRICULTURE, CAMBRIDGE, ENGLAND

Information on all topics concerned with the improvement of economic plants and microorganisms, in particular the methods and achievements of crop breeding, field trials, new varieties and strains, genetics and cytology, is given regularly in the journal

PLANT BREEDING ABSTRACTS

COMPILED FROM WORLD LITERATURE

Each volume contains over seven thousand abstracts from articles and reports in thirty to forty different languages, also reviews of new books and notices of new journals

JOURNAL OF MOLECULAR BIOLOGY

Editor-in-Chief J. C. Kendrew

Published fortnightly, 600 pp., per volume, 140s.
1966, Volumes 23-30 inclusive £56.0.0.

The *Journal of Molecular Biology* is concerned with the nature, production and replication of biological structure at the molecular level, and its relation to function. The Journal will have a wide appeal among scientists working on the following subjects: sub-cellular organization, molecular genetics, structure and replication of viruses; molecular structure of muscle, nerve and other tissues; structure of proteins, nucleic acids, carbohydrates, lipids, etc., and their synthetic analogues as investigated by X-rays, light absorption and other methods; problems of inter- and intra-molecular energy transfer.

INTERNATIONAL ABSTRACTS OF BIOLOGICAL SCIENCES

AIMS AND SCOPE

INTERNATIONAL ABSTRACTS OF BIOLOGICAL SCIENCES attempts to cover the more important papers in experimental biology, approaching the subject from the fundamental point of view, with emphasis on

ANATOMY
BIOCHEMISTRY
CYTOLOGY
GENETICS

IMMUNOLOGY
PHARMACOLOGY
PHYSIOLOGY

Also covered are BOTANY and ZOOLOGY, treated as experimental subjects; ANIMAL BEHAVIOUR; biochemical and physiological aspects of MICROBIOLOGY and PATHOLOGY; ODONTOLOGY, which includes DENTAL PATHOLOGY and DENTAL ANATOMY.

JOURNALS COVERED

A list of the journals (currently over 500) which are regularly scrutinized by the abstractors is given in the first number of each volume. In the majority of cases an indicative abstract of the paper is prepared, but in a few cases—for instance, if the paper is a preliminary communication or the subject matter is border-line—an expanded title only is given.

The total number of abstracts published in a year exceeds 30,000. Monthly issues contain over 2,500 abstracts each. Three issues and index of subjects and authors constitute a quarterly volume.
