

GLACIOLOGICAL LITERATURE

This is a selected list of glaciological literature on the scientific study of snow and ice and of their effects on the earth; for the literature on polar expeditions, and also on the "applied" aspects of glaciology, such as snow ploughs, readers should consult the bibliographies in each issue of the *Polar Record*. For Russian material the system of transliteration used is that agreed by the U.S. Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use in 1947. Readers can greatly assist by sending reprints of their publications to the Society, or by informing Dr. J. W. Glen of publications of glaciological interest. It should be noted that the Society does not necessarily hold copies of the items in this list, and also that the Society does not possess facilities for microfilming or photocopying.

GENERAL GLACIOLOGY

- HATHERTON, T., ed. *Antarctica*. London, Methuen; New York, Frederick A. Praeger, 1965. xvi, 511 p. [Contents include: J. A. Heap, "Antarctic pack ice", p. 187-96; C. W. M. Swithinbank and J. H. Zumberge, "The ice shelves", p. 199-220; A. J. Gow, "The ice sheet", p. 221-58; C. R. Bentley, "The land beneath the ice", p. 259-77; R. H. Clark, "The oases in the ice", p. 321-30; M. J. Rubin and W. S. Weyant, "Antarctic meteorology", p. 375-401.]
KOSIBA, A. On the international glaciological terminology. *Acta Geophysica Polonica*, Vol. 13, No. 1, 1965, p. 9-14. [Proposals as to how a glossary should be compiled.]
LORIUS, C., and RICOU, G. Glaciologie—Terre Adélie 1962. *Expéditions Polaires Françaises, Missions Paul-Émile Victor, Publication No. 271*, [1965], 37 p. [Description of glaciological laboratory at base Dumont d'Urville; measurements made of gas occlusions in ice, snow accumulation and deuterium content of sea water.]
SPANO, A. F. Results of an airborne albedo program in Antarctica, 1963. *Monthly Weather Review*, Vol. 93, No. 11, 1965, p. 697-703.

GLACIOLOGICAL INSTRUMENTS AND METHODS

- AMBACH, W., and others. Ein Gerät zur Bestimmung des freien Wassergehaltes in der Schneedecke durch dielektrische Messung, von W. Ambach, W. Bitterlich, und F. Howorka. *Acta Physica Austriaca*, Bd. 20, Ht. 1-4, 1965, p. 247-52. [Apparatus for estimation of free water content in snow cover through dielectric measurement.]
ARNBORG, L., and others. The ice gauge. An instrument for measuring vertical movement of ice surfaces, by L. Arnborg, J. Peippo and R. Larsson. *Geografiska Annaler*, Vol. 47A, No. 4, 1965, p. 237-39. [Self-recording instrument to synchronize the movements of the ice with the water-surface fluctuations.]
BINDON, H. H. The design of snow samplers for Canadian snow surveys. *Proceedings of the Eastern Snow Conference*, 21st annual meeting, 1964, p. 23-38. [Tests with standard samplers, and adaptations for use under Canadian conditions.]
BOGORODSKIY, V. V. *Modern physical methods of measuring the thickness of sea ice*. Translated by E. R. Hope. Ottawa, Directorate of Scientific Information Services, 1964. 10 p. (Canada. Defence Research Board. Translation T410R.) [Translated from *Okeanologiya*, Tom 3, Vyp. 4, 1963, p. 720-30. Various close-contact and remote methods reviewed. Electromagnetic remote methods seem to be most promising.]
EVANS, S., and ROBIN, G. de Q. Glacier depth-sounding from the air. *Nature*, Vol. 210, No. 5039, 1966, p. 883-85. [Results of surveys on various glaciers and discussion of advantages for surveys on ice sheets and inaccessible regions.]
FREEMAN, T. G. Snow survey samplers and their accuracy. *Proceedings of the Eastern Snow Conference*, 22nd annual meeting, 1965, p. 1-10. [Comparative tests on 7 samples.]
HASHIMOTO, T., and MANIWA, Y. Keppyōko ni okeru hyōjō yori no suishin-sokuryō to wakasagi tanchi no jikken (2) [Echo sounding of frozen lake and detection of pond-smelt from surface of ice (2)]. *Gyōsen Kenkyū Gihō [Technical Report of Fishing Boat]*, Vol. 18, No. 2, 1963, p. 1-5. [Better results obtained using low frequency ultrasonic waves than with mm. waves. English summary.]
HOFMANN, W. Telluromettermessungen im Rahmen der glaziologischen Antarktisforschung. *Allgemeine Vermessungsnachrichten*, Bd. 71, Ht. 3, 1964, p. 82-86. [Surveying technique used on Ross Ice Shelf Survey.]
KUDŌ, H., and others. Sekisetsu teremeta sochi [Snow gauge telemetering system utilizing radioisotope], [by] H. Kudō, S. Umeda [and] M. Hagimoto. *Fujitsu* (Fuji Tsūshinki Seizō Kabushiki Kaisha [Fuji Communication Equipment Manufacturing Co. Ltd.], Tokyo), Vol. 15, No. 1, 1964, p. 33-42. [Japanese system for recording snowfall. English abstract.]
LANDON-SMITH, I. H., and WOODBERRY, B. The photoelectric metering of wind-blown snow. *ANARE Interim Reports*, Series A (IV), Publication No. 79, 1965, p. 1-18. [Design and calibration of instrument.]
LUGIEZ, F., and others. Recherche d'améliorations sur le nivomètre à absorption de rayonnement γ . [par] F. Lugiez, P. Guillot, M. Jacob et M. Vuillot. [*Union Géodésique et Géophysique Internationale.*] *Association Internationale d'Hydrologie Scientifique. Assemblée générale de Berkeley de l'UGGI, 19-8—31-8 1963. Erosion continentale, précipitations, hydrologie, humidité du sol*. 1964, p. 417-22. [Studies of a field version of the radioactive snow-gauge.]
NYBERG, A. A study of the evaporation and the condensation at a snow surface. *Arkiv för Geofysik*, Bd. 4, Nr. 30, 1965, p. 577-90. [Instrument designed to measure with great accuracy the evaporation from a snow surface.]
ÖSTREME, G., and STANLEY, A. *Glacier mass balance measurements: a manual for field work*. Ottawa, Department of Mines and Technical Surveys, 1966. [viii], 81 p. + 15 forms. [Describes field procedures being used in Canada during International Hydrological Decade.]
WISHART, E. R. A new photoelectric drift snow gauge. *ANARE Interim Reports*, Series A (IV), Publication No. 79, 1965, p. 19-26. [Design and calibration of instrument.]

ZINGG, T. Zur Methodik der Schneemessung am Eidg. Institut für Schnee- und Lawinenforschung. *Winterbericht des Eidg. Institutes für Schnee- und Lawinenforschung*, Nr. 27, 1964, p. 130–38. [Methods of measuring depth, water content, and density of new and total snowfall in Weissfluhjoch area.]

PHYSICS OF ICE

- ALKEZWEENY, A. J., and HOBBS, P. V. The reflection spectrum of ice in the near infrared. *Journal of Geophysical Research*, Vol. 71, No. 4, 1966, p. 1083–86. [Measurement as function of angle from wave-length $2\cdot5 \mu$ to 5μ .]
- BARNES, G. T. Phase transitions in water sorbed on ice forming nuclei. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 14, Fasc. 5, 1963, p. 510–18. [Nuclear magnetic resonance used to study state of water molecules on surfaces.]
- BARNES, P., and TABOR, D. Plastic flow and pressure melting in the deformation of ice I. *Nature*, Vol. 210, No. 5039, 1966, p. 878–82. [Results of indentation tests on ice at various temperatures. Comments, "Implications for glaciology", by P. Barnes and G. de Q. Robin, p. 882–83.]
- BARTLETT, J. T. The growth of ice crystals from water vapour. *Colloques Internationaux du Centre National de la Recherche Scientifique*, No. 152, 1965, p. 317–28. [Discusses the variation with temperature of the habit of ice crystals discussed in terms of stepped growth and rapid change of surface diffusion length with temperature. Discussion, p. 326–28.]
- BARTLETT, J. T., and others. The growth of ice crystals in an electric field, by J. T. Bartlett, A. P. van den Heuvel [sic, i.e. A. P. van den Heuvel] and B. J. Mason. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 14, Fasc. 5, 1963, p. 599–610. [Observation of growth of thin ice needles in presence of high electric field.]
- BERTIE, J. E., and others. Transformations of ice VI and ice VII at atmospheric pressure, [by] J. E. Bertie, L. D. Calvert and E. Whalley. *Canadian Journal of Chemistry*, Vol. 42, No. 6, 1964, p. 1373–78. [Like ice II, III and V investigated earlier, these high-pressure phases transform first to cubic ice and then to hexagonal ice.]
- BLOCK, S., and others. High-pressure single-crystal studies of ice VI, [by] S. Block, C. W. Weir [and] G. J. Piermarini. *Science*, Vol. 148, No. 3672, 1965, p. 947–48. [Method of producing single crystals of ice VI and determination of cell constants.]
- DYE, J. E., and HOBBS, P. V. Effect of carbon dioxide on the shattering of freezing water drops. *Nature*, Vol. 209, No. 5022, 1966, p. 464–66. [Experiments to show effect of carbon dioxide gas.]
- FEDERER, B. Eiskeimfähigkeit von Zinkselenid. *Zeitschrift für angewandte Mathematik und Physik*, Vol. 14, Fasc. 5, 1963, p. 518–22. [Study of factors affecting ice-forming ability of zinc selenide.]
