

BSHS Monographs

THE British Society for the History of Science is publishing a monograph series of extended scholarly studies which further the discipline of history of science. The series is self-financing and non-profit making, and aims to make studies available at the lowest cost compatible with proper presentation. All subjects within the broad field of history of science will be considered. The length of monographs should be between 40,000 and 100,000 words.

All inquiries concerning editorial matters, and suggestions for possible monographs, should be addressed to the Series Editor,
Roger Smith, Department of History, University of Lancaster,
Bailrigg, Lancaster LA1 4YW, England.

Orders for monographs should be addressed to
The Administrator, The British Society for the History of
Science, Halfpenny Furze, Mill Lane, Chalfont St Giles, Bucks
HP8 4NR, England.

Postage is included in the monograph price, but orders must be prepaid. (Please add the equivalent of £0.60 to foreign cheques to cover the additional bank charges involved.) Alternatively, orders may be placed with any bookshop. Monographs are available to members of BSHS at 25% discount, cash with order, direct from The Administrator only.

1. *Images of the earth: essays in the history of the environmental sciences*, edited by L. J. Jordanova and Roy Porter, June 1979, pp. xx+282, with 10 plates. £5.95 (£4.40 to members).

2. *The letters of Georges Cuvier: A summary calendar of the manuscript and printed materials preserved in Europe, the United States of America, and Australasia*, edited by Dorinda Outram, January 1980, pp. iv+102. £3.90 (£2.90 to members).

Further titles are in preparation.

Oxford University Press

Howard Florey

The Making of a Great Scientist

Gwyn Macfarlane

'So valuable, and so enthralling, that it must rank with Cushing's life of Osler and Clapesattle's story of the Doctors May.' *The Lancet*. 'Fascinating . . . Florey's talents come shining through this readable and sympathetic portrait.' Bernard Dixon in *New Scientist*. Illustrated £7.95

A Historical Introduction to the Philosophy of Science

J. P. Losee

This book is a straightforward exposition of the views that have been held by scientists and philosophers, from Aristotle to the present day, on such subjects as scientific method, the nature of scientific laws, the relation of experiment to theory, the function of hypotheses, and the evaluation of competing theories. This new edition includes an expanded presentation of work in the field since the Second World War. Second edition £4.95 paper covers £2.50 OPUS

The Origins and Early Development of the Heavy Chemical Industry in France

John Graham Smith

France's prominent role in the history of the chemical industry has been little studied, and this is the first comprehensive book on the subject. It covers the formative period (c.1770–1820) and focuses on three central developments: sulphuric acid manufacture, chlorine bleaching, and above all the early Leblanc soda industry—which arguably constituted France's greatest contribution to the Industrial Revolution Illustrated £36

Science and Future Choice

P. W. Hemily and M. N. Özdas

Volume 1: Building on Scientific Achievement

Illustrated £11

Volume 2: Technological Challenge for Social Changes

Illustrated £14

Augustine to Galileo

A.C. Crombie

Since publication in 1952, this book has become the standard work on the technology, science, and natural philosophy of the middle ages up to the Renaissance. The second (enlarged and revised) edition is now reissued as a single volume.

The work and thought of centuries — long neglected and misinterpreted — are clarified and evaluated in this full, accurate, and scholarly account. It will be standard reading for all interested in the history and philosophy of science, and for medieval historians.

The Natural Philosophy of Time

G. J. Whitrow

The object of this completely revised edition is to provide an up-to-date, comprehensive, and unified account of our knowledge concerning the concept of time and its role in the sciences. It is intended for scientists, philosophers, and all who take an interest in the subject of time and in the attempts that have been, and are being, made to understand this fundamental but puzzling concept. Second edition £20

The Rise and Fall of Malaria in Europe A Historico-Epidemiological Study

L. J. Bruce-Chwatt and J. de Zulueta

The authors trace the biological origins of malaria in Europe and follow the course of the disease from ancient times until its eradication in the twentieth century. It is also an epidemiological study of the geographical, climatic, entomological, sociological, economic, and political factors that have influenced the disease as a public-health problem. Illustrated £12

The British Society for the History of Science

LIKE the discipline which it represents, the British Society for the History of Science has grown considerably since its foundation in 1947. The object of the Society is to further the discipline in all possible ways, particularly by holding meetings for the reading and discussion of papers, and by publication of relevant material. The Society offers a forum for all who have an interest in the history of science; although it is based in Britain, its membership is international. It welcomes applications for membership from students as well as established scholars, and from non-specialists as well as professional historians of science.

Membership of the Society, which includes a subscription to *The British journal for the history of science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting (formalities required by the UK Companies Act). The annual subscription is £9.00 (US \$21.00 in the Americas, Canada, and Japan) or, for students, £3.00 (\$9.00).

Applications for membership should be made on a form which is available from the Society's Administrator at the address below.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, the only fixture being the three-day summer meeting, held at a different British University or polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly-defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The *British journal for the history of science* is the official organ of the Society. It is published three times a year, in March, July, and November, and the three parts constitute a volume. Articles and reviews range over all aspects of the history of science, and many are interdisciplinary in character, encompassing social and economic history, the philosophy and sociology of science, the history of technology, and the relations between science and theology. Contributions from members and non-members are welcomed alike.

Editorial matters: papers for inclusion in the *Journal* should be submitted to the Editor, Dr Nicholas Fisher, Department of History and Philosophy of Science, King's College, Aberdeen AB9 2UB, Scotland, from whom instructions may be obtained concerning the presentation and documentation of papers. All correspondence on the contents of the *Journal* should be addressed to the Editor.

Books for review should be sent to the Reviews Editor, Dr John R. Durant, Department of Extra-Mural Studies, University College of Swansea, 6 Uplands Terrace, Swansea SA2 0GU, West Glamorgan, South Wales.

Advertising: Particulars about advertising in the *Journal* may be obtained from the Society's Administrator.

Orders and back issues: orders for the *Journal* and inquiries about back issues should be addressed to the Administrator. Claims for missing copies should be made within six months of publication. The annual subscription for non-members is £12.00 (\$30.00).

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr Roger Smith, Department of History, University of Lancaster, Bailrigg, Lancaster LA1 4YG, England. Monographs are available to members at a discount of 25%, post-free from the Society's Administrator. Non-members may obtain them through bookshops, or post-free from the Administrator. Now available:

1. *Images of the earth: essays in the history of the environmental sciences*. Ed. by L. J. Jordanova and R. Porter. 1979. £5.95 (£4.40 to members).
2. *The letters of Georges Cuvier: a summary calendar*. Ed. by Dorinda Outram. 1980. £3.90 (£2.90 to members).

List of theses: Every December, the Society publishes a full list of current theses in history of science in British universities. This is available free to members, and at a small charge to non-members on request to the Administrator. Standing orders are accepted from members or non-members who wish to receive the list regularly.

All the administrative business of the Society is handled by
The Administrator, The British Society for the History of Science, Halfpenny Furze, Mill Lane,
Chalfont St Giles, Bucks HP8 4NR, England.
