CAMBRIDGE
UNIVERSITY PRESS

Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of the original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of *JMR* and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the *Journal of Materials Research* electronically via ScholarOne manuscripts, at the following website address: <http://mc.manuscriptcentral.com/jmr>. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ x11 in. paper, and saved as .doc or .pdf files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the *JMR* keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in *Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006*. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to *JMR* who have related material under consideration or in press elsewhere should send a copy of the related material to *JMR* at the time of submission. While their manuscripts are under consideration at *JMR*, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: *Journal of Materials Research* occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. *JMR* will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will

be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Journal of Materials Research (ISSN: 0884-2914) is published twenty-four times a year by Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006 for the Materials Research Society. Periodical Postage Paid in New York, NY and additional mailing offices. **POSTMASTER:** Send address changes to *Journal of Materials Research*, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, *Journal of Materials Research*, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue's actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in *Journal of Materials Research* may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the *JMR* back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.

Cover: TEM image of the nanoparticles obtained using the standard protocol except for the introduction of different amounts of CF₃COOAg. [M. Zhao, X. Yang, Z. Hood, M. Chi, Y. Xia: Facile synthesis of Pt-Ag octahedral and tetrahedral nanocrystals with enhanced activity and durability toward methanol oxidation. p. 3891].

Journal of MATERIALS RESEARCH

Volume 33, Number 23, December 14, 2018

INVITED FEATURE PAPER

- 3891–3897 **Facile synthesis of Pt–Ag octahedral and tetrahedral nanocrystals with enhanced activity and durability toward methanol oxidation** Ming Zhao, Xuan Yang, Zachary D. Hood, Miaofang Chi, Younan Xia

ARTICLES

- 3898–3905 **Adsorptive removal of phenol by single and double network composite hydrogels based on hydroxypropyl cellulose and graphene oxide** Jingjing Wang, Nan Zhang, Chenye Jiang, Changsen Zhang
- 3906–3916 **N, S doped carbon dots—Plasmonic Au nanocomposites for visible-light photocatalytic reduction of nitroaromatics** Madhusudan Kr. Mahto, Dipanjan Samanta, Suraj Konar, Himani Kalita, Amita Pathak
- 3917–3927 **Simultaneous morphology, band structure, and defect optimization of graphitic carbon nitride microsphere by the precursor concentration to boost photocatalytic activity** Shuaijun Wang, Fengting He, Pei Dong, Zhaoxin Tai, Chaocheng Zhao, Yongqiang Wang, Fang Liu, Lin Li
- 3928–3935 **Fabrication of Bi₂MoO₆/BiOI heterojunction photocatalysts for enhanced photodegradation of RhB** Jie Wang, LiZhen Ren, DongEn Zhang, XiaoYun Hao, JunYan Gong, Xin Xiao, YouXiang Jiang, ZhiWei Tong
- 3936–3945 **In situ synthesis of CsTi₂NbO₇@g-C₃N₄ core–shell heterojunction with excellent electrocatalytic performance for the detection of nitrite** Mengjun Wang, Chao Liu, Xiaobo Zhang, Zichun Fan, Jiasheng Xu, Zhiwei Tong
- 3946–3952 **Green synthesis of functionalized graphene and their use as solid acid catalysts** Xu Zhang, Qiuyu Fan, He Yang
- 3953–3962 **Preparation and photocatalytic application of AgBr modified Bi₂WO₆ nanosheets with high adsorption capacity** Peng Zhang, Zhiyuan Dong, Yuanming Ran, Hualin Xie, Yun Lu, Shimin Ding
- 3963–3970 **Tunable blue-green emission from ZnS(Ag) nanostructures grown by hydrothermal synthesis** Manjula Sharma, Shashwati Sen, Jagannath Gupta, M. Ghosh, S. Pitale, Vinay Gupta, S.C. Gadkari
- 3971–3978 **Combustion synthesis and photoelectrochemical characterization of gallium zinc oxynitrides** Austin E. Kennedy, Benjamin H. Meekins
- 3979–3985 **Differential scanning calorimetric measurements and thermodynamic functions of YbRhO₃(s)** Aparna Banerjee

INVITED FEATURE PAPER - REVIEW

- 3986–3998 **Atomistic consideration of earth-abundant chalcogenide materials for photovoltaics: Kesterite and beyond** Jekyung Kim, Liudmila Larina, Sung-Yoon Chung, Donghyeop Shin, Byungha Shin

(Continued)

ARTICLE

- 3999–4006 **High photoresponsivity and light-induced carrier conversion in RGO/TSCuPc hybrid phototransistors** Tanusri Pal, Daeha Joung, Surajit Ghosh, Anindarupa Chunder, Lei Zhai, Saiful I. Khondaker

INVITED FEATURE PAPERS

- 4007–4017 **Integrated ferroics for sensing, power, RF, and μ -wave electronics** Yingxue Guo, Ryan Quinlan, Neville Sun, Hwaider Lin, Nian Xiang Sun
- 4018–4030 **Interfaces and defect composition at the near-atomic scale through atom probe tomography investigations** Baptiste Gault, Andrew J. Breen, Yanhong Chang, Junyang He, Eric A. Jägler, Paraskevas Kontis, Philipp Kürnsteiner, Alisson Kwiatkowski da Silva, Surendra Kumar Makineni, Isabelle Mouton, Zirong Peng, Dirk Ponge, Torsten Schwarz, Leigh T. Stephenson, Agnieszka Szczepaniak, Huan Zhao, Dierk Raabe

INVITED PAPER

- 4031–4039 **Laser additive manufacturing of powdered bismuth telluride** Haidong Zhang, Dean Hobbs, George S. Nolas, Saniya LeBlanc

ARTICLES

- 4040–4052 **Microstructure evolution and thermal properties of an additively manufactured, solution treatable AISi10Mg part** Pin Yang, Lisa A. Deibler, Donald R. Bradley, Daniel K. Stefan, Jay D. Carroll
- 4053–4061 **Temperature and DC bias dependence of the phase transition behavior of [011]- and [001]-oriented PIN–PMN–PT single crystals with MPB composition** Yuhui Wan, Zhenrong Li, Ming Ma, Shiji Fan, Zhuo Xu
- 4062–4070 **Low-temperature synthesis and microwave absorbing properties of Mn_3O_4 –graphene nanocomposite** Huifang Pang, Yuping Duan, Jia Liu, Bin Zhang
- 4071–4079 **Correlation between vibrational modes, crystal structures, and dielectric properties of $(1 - x)\text{Ba}(\text{Mg}_{1/3}\text{Ta}_{2/3})\text{O}_3$ – $x\text{Ba}(\text{Co}_{1/3}\text{Nb}_{2/3})\text{O}_3$ ceramics** Jianzhu Li, Liang Fang, Guoxiang Zhao, Chao Xing, Hengyang Qiao, Huiling Chen, Qi Zeming, Qing Wang, Feng Shi
- 4080–4091 **Toward the design of interstitial nonmetals co-doping for Mg-based hydrides as hydrogen storage material** Zhen Wu, Luying Zhu, Fusheng Yang, Serge N. Nyamsi, Ekambaram Porpatham, Zaoxiao Zhang

INVITED PAPER

- 4092–4100 **Self-organized wrinkling of liquid crystalline polymer with plasma treatment** Jaehyun Sim, Sihwa Oh, Se-Um Kim, Kyuyoung Heo, Seung-Chul Park, Jun-Hee Na

ARTICLES

- 4101–4112 **The effect of plasticizer on the shape memory properties of poly(lactide acid)/poly(ethylene glycol) blends** Yijun Guo, Jing Ma, Zirui Lv, Na Zhao, Lixia Wang, Qian Li

(Continued)

4113–4122 **Thermal reduction of graphene oxide: How temperature influences purity**

Iman Sengupta,
Samarshi Chakraborty,
Monikangkana Talukdar,
Surjya K. Pal, Sudipto Chakraborty

4123–4133 **Surface modification of the biodegradable cardiovascular stent material Mg–Zn–Y–Nd alloy via conjugating REDV peptide for better endothelialization**

Li Chen, Jingan Li, Shuo Wang,
Shijie Zhu, Chao Zhu,
Boyuan Zheng, Ge Yang,
Shaokang Guan
