

THE JOURNAL OF DAIRY RESEARCH

EDITED FOR

The Committee of Management

BY

A. T. R. MATTICK,
B.Sc., Ph.D.

and

N. C. WRIGHT,
M.A., D.Sc., Ph.D.

The National Institute for Research in Dairying,
University of Reading

The Hannah Dairy Research Institute,
Kirkhill, Ayr

ASSISTED IN THE

SELECTION OF PAPERS FOR PUBLICATION

BY

DR L. B. BULL (Australia)

DR J. O. IRWIN (London)

MR A. D. BUCHANAN SMITH (Edinburgh)

PROF. J. B. LEATHES, F.R.S. (Wantage)

PROF. E. P. CATHCART, F.R.S. (Glasgow)

PROF. F. C. MINETT (London)

DR C. CROWTHER (Newport, Salop)

PROF. H. A. D. NEVILLE (Reading)

DR A. CUNNINGHAM (Edinburgh)

PROF. W. RIDDET (New Zealand)

DR PAUL FILDES, F.R.S. (London)

DR W. M. SCOTT (London)

DR J. HAMMOND, F.R.S. (Cambridge)

PROF. J. A. SCOTT WATSON (Oxford)

DR E. C. HOOD (Canada)

DR P. J. DU TOIT, F.R.S. (S.A.) (S. Africa)

VOLUME X

CAMBRIDGE

AT THE UNIVERSITY PRESS

1939

PRINTED IN GREAT BRITAIN

C O N T E N T S

No. 1 (JANUARY, 1939)

Original Articles:	PAGE
205. Methods of measuring gas production. L. A. ALLEN	1
206. Gas production by <i>Bacterium coli</i> and by lactic acid streptococci under different conditions. M. M. HASSOUNA and L. A. ALLEN	7
207. Protein metabolism and acid production by the lactic acid bacteria in milk. Influence of yeast extract and chalk. M. BRAZ and L. A. ALLEN	20
208. The part played by bacteria in the reduction of methylene blue in milk. B. C. HOBBS	35
209. Studies in mastitis. I. The routine diagnosis of mastitis. J. G. DAVIS, J. McCLEMONT and H. J. ROGERS	59
210. Studies in mastitis. II. A comparison of methods for the detection of subclinical mastitis. J. G. DAVIS and J. McCLEMONT	74
211. Studies in mastitis. III. Mastitis in relation to "udder counts". J. McCLEMONT and J. G. DAVIS	81
212. Studies in mastitis. IV. Mastitis in relation to the methylene blue reduction test. J. McCLEMONT and J. G. DAVIS	88
213. Studies in mastitis. V. Mastitis in relation to cheese-making. J. G. DAVIS and J. McCLEMONT	94
214. Studies in mastitis. VI. General observations, summary and conclusions. J. G. DAVIS and J. McCLEMONT	104
215. The value of indirect methods for the detection of mastitis. S. J. ROWLAND and M. ZEIN-EL-DINE	108
216. The effect of churning on the vitamin A and carotene content of milk fat. K. M. HENRY, S. K. KON, A. E. GILLAM and P. WHITE	114
217. The white particles in mature Cheddar cheese. F. H. McDOWALL and A. K. R. McDOWELL	118
218. Starter cultures for cheese manufacture. Maintenance of acid-producing activity in cultures of lactic streptococci. H. R. WHITEHEAD and G. J. E. HUNTER	120

Biennial Reviews of the Progress of Dairy Science:

Section A. Physiology of dairy cattle. I. Reproduction and lactation. J. A. B. SMITH	133
II. Nutrition. S. MORRIS	153

No. 2 (MAY, 1939)

Original Articles:

219. The nutritive value of proteins for milk production. S. MORRIS and S. C. RAY	165
220. The nutritional requirements of the lactic acid bacteria. J. G. DAVIS	186
221. The effect of serum and blood on the growth of lactic acid bacteria in milk. J. G. DAVIS	196
222. Bacteriological studies of spray-dried milk powder. A. A. NICHOLS	202
223. Bacteriological studies of canned milk products. A. A. NICHOLS	231
224. The decomposition of citric acid by <i>Betacoccus cremoris</i> . J. VAN BEYNUM and J. W. PETTE	250
225. The casein number for diagnosis of mastitis. II. The effect of advanced lactation, and of storage and preservation of the milk sample. S. J. ROWLAND and M. ZEIN-EL-DINE	267
226. The effect of commercial drying and evaporation on the nutritive properties of milk. K. M. HENRY, J. HOUSTON, S. K. KON and L. W. OSBORNE	272
227. The rapid determination of peroxide values for the fat in milk powders. J. A. B. SMITH	294
228. Oxidation of the fat of butter during cold storage. W. J. WILEY	300
229. Bacteriological testing of butter. New and simplified routine methods. G. M. MOIR and R. R. RUSSELL	310
230. The relation of certain lactic acid bacteria to open texture in Cheddar cheese. I. R. SHERWOOD	326
231. The assessment of curd firmness prior to cutting. F. M. V. COPPEN	336
232. A simple and accurate viscosimetric form of rennet test. C. W. KING and E. M. MELVILLE	340

Biennial Reviews of the Progress of Dairy Science:

Section F. Milk-borne diseases. J. SMITH	355
Section G. Genetics of Dairy Cattle. A. D. BUCHANAN SMITH	370

NO. 3 (SEPTEMBER, 1939)

Original Articles:

233. The effect of increased iodine feeding upon the iodine content of cows' milk. N. L. MATTHEWS, G. M. CURTIS and J. H. MEYER	395
234. Bacteriophage-organism relationships in the group of lactic streptococci. H. R. WHITEHEAD and G. J. E. HUNTER	403
235. The enrichment of <i>aerogenes-cloacae</i> types in milk held at low temperatures: with observations on the relative rates of growth of <i>aerogenes-cloacae</i> and <i>B. coli</i> types in milk at different temperatures. J. F. MALCOLM	410
236. The bacterial flora of New Zealand Cheddar cheese. I. R. SHERWOOD	420
237. Lactic acid bacteria in relation to cheese flavour. II. Observations on the inoculation of the milk employed in cheese manufacture with lactobacilli. I. R. SHERWOOD	449
238. The effect of pH on growth and gas production by streptococci and lactobacilli. J. G. DAVIS and C. C. THIEL	455
239. Examples of variation within pure cultures of <i>Streptococcus cremoris</i> . G. J. E. HUNTER	464
240. The effect of light on the vitamin C of milk in different containers. J. HOUSTON, S. K. KON and S. Y. THOMPSON	471
241. Kay and Graham's phosphatase test: (a) Modifications in technique; (b) Effect of bacterial growth. F. K. NEAVE	474
242. A rapid phosphatase test: (a) Adaptation of Scharer's modification to pasteurizing conditions in Great Britain; (b) A study of the factors influencing the reliability of the test. R. ASCHAFFENBURG and F. K. NEAVE	485
243. Factors affecting the solubility of milk powders. IV. The influence of speed and duration of stirring on solubility, with a description of a rapid method for solubility determinations. G. R. HOWAT, J. A. B. SMITH, R. WAITE and N. C. WRIGHT	498

Biennial Reviews of the Progress of Dairy Science:

Section B. Bacteriology and Mycology applied to dairying. A. T. R. MATTICK, E. R. HISCOX and J. G. DAVIS	515
