MDCCCLXXXVII.

H. WOLFF, LEWES.]

To be continued Quarterly.

CONTENTS OF No. 137.—APRIL, 1886.

PART I.—ORIGINAL ARTICLES.

- Achille Foville, M.D.—On the Right of Reclamation of the Insane before the Civil Courts.
E. Maziere Courtenay, M.D.—On Irish Asylum Dietary.
Geo. H. Savage, F.R.C.P.—Drunkenness in Relation to Criminal Responsibility.
Tribolotes.—The Psychological Bearings of the Recent Matriculation Examination of the London University.
Clinical Notes and Cases.—Two Cases of Larvated Insanity; by CONOLLY NORMAN, F.R.C.S.I. Case of Persistent Self-Mutilation; by ERIC SINCLAIR, M.B.—A Case in which an Old Amputation of the Left Upper Arm was associated with an Atrophied Right Ascending Parietal Convolution; by JOSEPH WIGLESWORTH, M.D. (Illustrated).—Case of Accumulation of Hair, &c., in the Stomach, with remarks; by C. S. W. CONSOLD, M.D.—A Case of Saturnine Insanity; by W. HALL WHITE, M.D.—Some Abnormal Forms of Breathing; by W. JULIUS MICKLE, M.B.C.P.
Occasional Notes of the Quarter.—Lord Bramwell on Crime and Insanity.—A Court of Lunacy.—The Lunacy Bill.

PART II.—REVIEWS.

Thirty-fourth Report of the Inspectors of Irish Lunatic Asylums.—Hospital Construction and Management; by F. T. MOUNT, F.R.C.S.—Fagge's Principles and Practice of Medicine.—Klinische Psychiatrie. Specielle Pathologie und Therapie der Geisteskrankheiten; von Dr. Heinrich Schüle. Von Ziemssen's Handbuch der Specieellen Pathologie und Therapie.—De l'Alcoolisme et de ses diverses Manifestations, considérées au point de vue physiologique, pathologique, clinique, et médico-légal; par Dr. F. LÉRY.—Hobbes; by Prof. ROBERTSON.—A Palace-Prison; or, The Past and Present.—A Manual of Chirosofopy, being a Complete Practical Handbook of the Twin Sciences of Chirogony and Chetromancy; by ED. HANON-ALLEN.—The Handbook of Physiognomy; by ROSA BAUGHAN.—Handbook of the Diseases of the Nervous System; by J. ROSS, M.D.—Old Age, and Changes Incidental to it; by G. M. HUMPHRY, M.D.—Fools and Buffoons; by Dr. PAUL MOREAU.

PART III.—PSYCHOLOGICAL RETROSPECT.

1. French Retrospect; by T. W. McDOWALL, M.D.
2. American and Colonial Retrospect; by D. HACK TUBE, F.R.C.P.
3. German Retrospect; by W. W. IRELAND, M.D.
4. English Retrospect. Asylum Reports.

PART IV.—NOTES AND NEWS.

Quarterly Meetings of the Medico-Psychological Association, held in London and Dublin.—Guild of Friends of the Infirm of Mind.—Postscript on the Lunacy Bill.—The Stewart Scholarship in Mental Disease, Trinity College, Dublin.—Was Baines Mad, Drunk, or Delirious?—Obituary.—Correspondence.—Appointments.—Index to Vol. XXXI., &c.

CONTENTS OF No. 138.—JULY, 1886.

PART I.—ORIGINAL ARTICLES.

- E. W. North, M.B.C.S.—Insanity and Crime.
William W. Ireland, M.D.—On the Admission of Idiotic and Imbecile Children into Lunatic Asylums.
J. A. Campbell, M.D.—On the Appetite in Insanity.
G. E. Shuttleworth, M.D.—St. John Ambulance Classes for Asylum Attendants.
Clinical Notes and Cases.—A Case in which a Lesion of one Hemisphere of the Cerebellum was associated with Degeneration of the Ovary Body of the opposite side (*with Plate*); by WILLIAM DUDLEY, M.B.—Three Cases of Choking; by DAVID WELSH, M.B.—Notes of Four Abdominal Cases of Interest; by J. A. CAMPBELL, M.D.—Lead-Poisoning, with Mental and Nervous Disorders; by ALEX. ROBERTSON, M.D.—Cure of Insanity by Removal of a Beard in a Woman; by GEO. H. SAVAGE, F.R.C.P.—Case of Ovariectomy in an Insane Patient; by R. PERCY SMITH, M.D.
Occasional Notes of the Quarter.—The Lunacy Bill.—Classification of Insanity.—The late Samuel Gaskell, Esq.—The Retirement of Dr. Orange, C.B.

PART II.—REVIEWS.

Hospital Construction and Management; by F. T. MOUNT, F.R.C.S.—Manuel de Technique des Autopsies; par Bourneville et P. Briçon.—Klinische Psychiatrie. Specielle Pathologie und Therapie der Geisteskrankheiten; von Dr. Heinrich Schüle. Von Ziemssen's Handbuch der Specieellen Pathologie und Therapie. Compendium der Psychiatrie zum Gebrauche für Studierende und Aerzte; von Dr. EMIL KRAEPELIN.—Ebsteln on the Regimen to be adopted in Gout; translated by JOHN SCOT, M.B.—Gout and its Relations to Disease of the Liver and Kidneys; by ROSSON ROSS, M.D.—The Discoverie of Witchcraft; by REGINALD SCOT, Esq.

PART III.—PSYCHOLOGICAL RETROSPECT.

1. French Retrospect; by T. W. McDOWALL, M.D.
2. American Retrospect; by D. HACK TUBE, F.R.C.P.
3. German Retrospect; by WILLIAM W. IRELAND, M.D.
4. English Retrospect. Asylum Reports.

PART IV.—NOTES AND NEWS.

Quarterly Meetings of the Medico-Psychological Association held in London and Carlisle.—Cork Asylum Church.—Obituary.—Correspondence.—Appointments.—Index Medico-Psychologicus, &c., &c.

“Nos vero intellectum longius a rebus non abstrahimus quam ut rerum imagines et
radii (ut in sensu fit) coire possint.”

FRANCIS BACON, *Proleg. Instaurat. Mag.*

VOL. XXXII.

LONDON:
J. AND A. CHURCHILL,
NEW BURLINGTON STREET.

MDCCLXXXVII.

"IN adopting our title of the *Journal of Mental Science*, published by authority of the *Medico-Psychological Association*, we profess that we cultivate in our pages mental science of a particular kind, namely, such mental science as appertains to medical men who are engaged in the treatment of the insane. But it has been objected that the term mental science is inapplicable, and that the terms, mental physiology, or mental pathology, or psychology, or psychiatry (a term much affected by our German brethren), would have been more correct and appropriate; and that, moreover, we do not deal in mental science, which is properly the sphere of the aspiring metaphysical intellect. If mental science is strictly synonymous with metaphysics, these objections are certainly valid, for although we do not eschew metaphysical discussion, the aim of this Journal is certainly bent upon more attainable objects than the pursuit of those recondite inquiries which have occupied the most ambitious intellects from the time of Plato to the present, with so much labour and so little result. But while we admit that metaphysics may be called one department of mental science, we maintain that mental physiology and mental pathology are also mental science under a different aspect. While metaphysics may be called speculative mental science, mental physiology and pathology, with their vast range of inquiry into insanity, education, crime, and all things which tend to preserve mental health, or to produce mental disease, are not less questions of mental science in its practical, that is, in its sociological point of view. If it were not unjust to high mathematics to compare it in any way with abstruse metaphysics, it would illustrate our meaning to say that our practical mental science would fairly bear the same relation to the mental science of the metaphysicians as applied mathematics bears to the pure science. In both instances the aim of the pure science is the attainment of abstract truth; its utility, however, frequently going no further than to serve as a gymnasium for the intellect. In both instances the mixed science aims at, and, to a certain extent, attains immediate practical results of the greatest utility to the welfare of mankind; we therefore maintain that our Journal is not inaptly called the *Journal of Mental Science*, although the science may only attempt to deal with sociological and medical inquiries, relating either to the preservation of the health of the mind or to the amelioration or cure of its diseases; and although not soaring to the height of abstruse metaphysics, we only aim at such metaphysical knowledge as may be available to our purposes, as the mechanic uses the formularies of mathematics. This is our view of the kind of mental science which physicians engaged in the grave responsibility of caring for the mental health of their fellow men, may, in all modesty, pretend to cultivate; and while we cannot doubt that all additions to our certain knowledge in the speculative department of the science will be great gain, the necessities of duty and of danger must ever compel us to pursue that knowledge which is to be obtained in the practical departments of science, with the earnestness of real workmen. The captain of a ship would be none the worse for being well acquainted with the higher branches of astronomical science, but it is the practical part of that science as it is applicable to navigation which he is compelled to study."—*J. C. Bucknill, M.D., F.R.S.*

ASYLUM LOCKS.

Manufacturers—Young & Co., Wolverhampton, England.

See "JOURNAL OF MENTAL SCIENCE," New Series, No. 99, Oct., 1885.

THIS LOCK is used in many Asylums in England and Ireland, and also on the Continent. It possesses four distinct actions, and claims the following advantages:—

1st.—The ordinary attendant's key turns the bolt once, opening the door, and when the bolt is freed, the bolt (on taking the key out) instead of keeping back springs forward and remains flush with the door, which cannot be shut without inserting the key, thus preventing a patient from locking an attendant or himself in a cell.

2nd.—It prevents the slamming of doors, a most frequent and objectional practice in Lunatic Asylums, as the key must be inserted again, when closing the door, to lock it.

3rd.—The bolt is turned a second time by another key, which is supplied only to the head attendant of a division, and the night attendant; the object of this is, that when the patients are given over for the night to the night attendant he, in passing through, gives the second turn, driving the bolt still further in, thus preventing access to the patients by the day attendant, whose key cannot then turn the bolt back, and thereby fixing the responsibility of correct inspection and safe custody for the night with the officer on duty. In his (the night attendant's) first round afterwards, when all day attendants are in bed, he takes the second action off each lock. To anyone acquainted with the details of Asylum discipline, this will seem to be a most important arrangement.

4th.—The bolt of all locks leading to exterior of buildings, or from male to female divisions, or any other place thought necessary, is turned a third time by a master key, and cannot be unlocked by any other. The necessity for this action is obvious. The master key is only supplied to officers of the institution. Thus each of the three keys will open the door at one turn; the second key gives a second turn, and the third key a third turn—the bolt being at each turn driven further into the door plate.

There is another most important advantage in the locks, viz.: the face of the lock has a depression around the bolt, which fits into a corresponding elevation on the striking plate, thus preventing the possibility of the bolt being shot by a knife, handle of a spoon, or by any other means.

The interior of the lock is made entirely of gun-metal, of the best and simplest workmanship. The striking-plate and face of lock are brass.

The Keys are very strong and made of Case-hardened Steel, and are constructed so as to render it impossible for one to be converted into another, *i.e.*, a first-action Key could not be made into a second, or either of them into a Master Key.

PRICE, 6in. 12s. each. Keys extra. Keys to ditto, 1st action 2s. 6d., 2nd action 2s. 9d., 3rd action 2s. 9d. each.

YOUNG & Co. (late YOUNG & GLOVER),
LOCK PATENTEES AND MAKERS, WOLVERHAMPTON.

MEDICO-PSYCHOLOGICAL ASSOCIATION.

HONOURS EXAMINATION.

July, 1887.

This Examination will be held at Bethlem Royal Hospital on the 29th and 30th July, 1887.

Candidates must have passed an examination for the Certificate in Psychological Medicine in the United Kingdom (one of which will be held on the 25th and 26th of the same month), must have attained the age of twenty-three, and must have been qualified medical officers in one or more asylums for at least two years. Candidates will be examined in—1. Healthy and Morbid Histology of the Brain and Spinal Cord. 2. Clinical Cases with Commentaries. 3. Psychology, including the Senses, Intellect, Emotions, and Volition. 4. Written Examination, including questions on the Diagnosis, Prognosis, Pathology, and Treatment of Mental Diseases, and their Medico-legal Relations.

Candidates intending to present themselves for examination are requested to give fourteen days' notice to the General Secretary.
