

LASER AND PARTICLE BEAMS

Laser and Particle Beams

Physics of High Energy Densities

Editor in Chief: HEINRICH HORA
Head, Department of Theoretical Physics
University of New South Wales
Kensington 2033, Australia

Associate Editors:

T P DONALDSON (for UK)
Cambridge University Press
The Edinburgh Building
Shaftesbury Road
Cambridge CB2 2RU
R. DAUTRAY (for Europe)
Scientific Director, CEA Limeil, B.P. 27
94190 Villeneuve St. Georges, France
and G. H. MILEY (for USA)
Director, Fusion Studies Laboratory,
University of Illinois,
103 S. Goodwin Ave., Urbana, Il. 61801,
USA

Editorial Board

N. G. Basov (Moscow)
J. L. Bobin (Paris)
T. J. M. Boyd (Bangor, Wales)
G. Cooperstein (Washington)
P. F. Cunningham (Natal)
J. L. Emmett (Livermore)
A. H. Guenther (Kirtland AFB)
M. H. Key (Rutherford Appleton Laboratory)
P. Mulser (Darmstadt)
K. Niu (Nagatsuta)
L. I. Rudakov (Moscow)
D. D. Ryutov (Novosibirsk)
S. Singer (Los Alamos)
J. P. Watteau (CEA Limeil)
C. Yamanaka (Osaka)
K. Yatsui (Nagaoka)
G. Yonas (Albuquerque)

Laser and Particle Beams is a new international journal which covers the generation, and the interaction with matter, of high intensity laser and particle beams. It also covers the physics of systems with high energy densities. Specific fields of interest include nuclear fusion, especially inertial confinement, magnetic confinement, diagnostics, material treatment, laboratory astrophysics, plasmas and spectroscopy at extreme conditions, physical properties of hot dense matter and intense particle beams and optical (laser) beams from the microwave to the X-ray region. The exploration of these fields and their new physics, including nonlinear and nonclassical phenomena, should find a forum in this journal.

As well as publishing original articles the journal will also publish occasional review articles, surveys of research at particular laboratories and reviews of recent books.

Copying: This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the percopy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0263-0346/83/0000-0001\$05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

Subscriptions: *Laser and Particle Beams* (ISSN 0263-0346) is published quarterly in February, May, August and November 1983. The subscription price (which includes postage) of volume 1, 1983 is £50 net (US \$125 in USA and Canada). Single parts cost £15 net (US \$37.50 in USA and Canada) plus postage. Four parts form a volume. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publishers: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Orders from the USA or Canada should be sent to Cambridge University Press, 32 East 57th Street, New York, NY 10022, USA. Copies of the journal for subscribers in the USA and Canada are sent by air to New York to arrive with minimum delay. Application to mail at second class postage rates is pending at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA and Canada to *Laser and Particle Beams*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

CONTENTS TO VOLUME 1

TABLE OF CONTENTS LASER AND PARTICLE BEAMS

Vol. 1 1983
(Book reviews in cursive letters)

PART 1 FEBRUARY 1983

| | |
|--|-----|
| Preface | 1 |
| K. I. Golden, Strong ion coupling effects at high density of inertial confinement fusion plasmas | 3 |
| B. I. Henry, Spectral line limiting and polarization shift in plasmas of high particle and energy density | 11 |
| S. Nakai, K. Imasaki, S. Miyamoto, S. Higaki, T. Ozaki, A. Yoshinouchi, H. Fujita, K. Mima, K. Nishihara, T. Yabe, S. Ido, Ohgaki and C. Yamanaka, Inertial confinement fusion research by particle beams at ILE Osaka | 29 |
| P. Lädach and J. E. Balmer, Self-consistent calculations of short-pulse laser-heated plasma dynamics | 67 |
| C. B. Edwards and F. O'Neill, Computer modelling of e-beam-pumped KrF lasers | 81 |
| S. Eliezer and D. Salzmänn, Determination of atomic cross-sections for electron impact excitation using effective Feynman diagrams and Einstein coefficients | 97 |
| <i>Heinrich Hora, Physics of Laser Driven Plasmas.</i> | 103 |
| <i>R. A. Cairns and J. J. Sanderson eds., Laser-Plasma Interactions.</i> | 103 |
| <i>H. J. Doucet and J. M. Buzzi eds., Higher-Power Beams 81.</i> | 104 |
| <i>Hannes Alfvén, Cosmic Plasmas.</i> | 105 |

PART 2 MAY 1983

| | |
|---|-----|
| G. W. Kentwell, Conical two dimensional plasma acceleration at resonance absorption | 107 |
| M. Tamba, N. Nagata, S. Kawara and K. Niu, Analysis of target implosion on irradiation by proton beams I Beam interaction with target plasma | 121 |
| H. Hora, Electrostatic fields and charged particle acceleration in laser produced plasmas | 151 |
| G. J. Tallents, Two-dimensional ion emission from laser-produced plasmas | 171 |
| N. F. Roderick, B. J. Kohn, W. F. McCullough, C. W. Beason, J. A. Lupo, J. D. Letterio, D. A. Kloc and T. W. Hussey, Theoretical modeling of electromagnetically imploded plasma liners | 181 |
| R. Petr and M. Gundersen, Field emission cathode for high power beams | 207 |

| | |
|---|-----|
| <i>H. G. Ahlstrom, Physics of Laser Fusion—Diagnostics of Experiments on Laser Fusion</i> | 215 |
| <i>N. G. Basov, J. A. Zakarenkov, N. N. Zorev, A. A. Rupasov, G. V. Sklizkov and A. S. Shikanov, Heating and Compression of Thermonuclear Targets by Laser Beam</i> | 215 |
| <i>James J. Duderstadt, and G. A. Moses, Inertial Confinement Fusion</i> | 216 |
| <i>K. Thyagarajan, and A. K. Ghatak, Lasers—Theory and Applications</i> | 217 |
| <i>R. J. Thome, and J. M. Tarrh, MHD and Fusion Magnets</i> | 218 |

PART 3 AUGUST 1983

| | |
|--|-----|
| <i>S. Kawata and K. Niu, Numerical simulations for intense light-ion beam propagation in a channel under the influence of plasma inertia</i> | 219 |
| <i>R. G. Evans, A simple model of ion beam heated ICF targets</i> | 231 |
| <i>I. V. Alexandrova, N. G. Basov, A. E. Danilov, Yu. A. Mikhailov, G. V. Sklizkov and S. I. Fedotov, The effect of small-scale perturbations on the brightness of laser radiation in laser fusion experiments</i> | 241 |
| <i>S. Eliezer and A. Ludmirsky, Double layer (DL) formation in laser-produced plasma</i> | 251 |
| <i>J. Handke, S. A. H. Rizvi and B. Kronast, A laser plasma interaction model for the conditions of stimulated Brillouin backscattering model experiments</i> | 271 |
| <i>P. Lalouis and H. Hora, First direct electron and ion fluid computation of high electrostatic fields in dense inhomogeneous plasmas with subsequent nonlinear laser interaction</i> | 283 |
| <i>Wang Runwen, Instabilities of bounded plane plasma irradiated by a high intensity laser beam</i> | 305 |
| <i>C. W. Mendel, Jr., D. B. Seidel, and S. E. Rosenthal, A simple theory of magnetic insulation from basic physical considerations</i> | 311 |
| <i>M. M. Novak, Electromagnetic waves in a high density field</i> | 321 |
| <i>Paul J. Channell editor, Laser Acceleration of Particles (Los Alamos, 1982)</i> | 331 |
| <i>P. Michelsen and J. Jual Rasmussen, editors, Symposium on Plasma Double Layers</i> | 333 |
| <i>J. F. Holzrichter, D. Eimerl, E. V. George, J. B. Trenholme, W. W. Simmons, and J. T. Hunt, Physics of Laser Fusion, Volume III, High Power Lasers</i> | 333 |

PART 4 NOVEMBER 1983

| | |
|---|-----|
| <i>G. Buchwald, G. Graebner, J. Theis, J. A. Maruhn, H. Stöcker and H. Kruse, Irradiation symmetry of heavy ion driven inertial confinement fusion (ICF) targets.</i> | 335 |
| <i>D. A. Steinman, R. A. Lee and W. J. Hillegas, Targets for X-ray laser experiments</i> | 347 |
| <i>G. J. Tallents, A numerical investigation of laser pressure effects in underdense plasmas</i> | 353 |
| <i>D. Subbarao, R. Uma and A. K. Ghatak, Wave optical theory for fast self-focusing of laser beams in plasmas</i> | 367 |
| <i>P. Mulser and H. Schnabl, Excitation of large amplitude electron plasma waves by laser</i> | 379 |

| | |
|--|-----|
| J. A. Kunc, S. Guha and M. A. Gundersen, A fundamental theory of high power thyratrons I: The electron temperature | 395 |
| J. A. Kunc, and M. A. Gundersen, A fundamental theory of high power thyratrons II: The production of atomic hydrogen and positive ions | 407 |
| M. Nambu, A new laser effect in plasma turbulence | 427 |
| B. R. Appleton, and G. K. Celler eds. <i>Laser and Electron Beam Interaction with Solids</i> | 455 |
| D. Twersky, Ed. <i>World Survey of Major Activities in Controlled Fusion Research 1982</i> | 455 |
| J. L. Emmett, W. F. Krupe, and J. B. Trenholme, <i>Physics of Laser Fusion Vol. IV, The Future Development of High-Power Solid State Laser Systems</i> | 456 |
| <i>Alphabetical Author Index</i> | 457 |

Information for Contributors

1. Manuscripts must be written in English. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Associate Editor or the Editor.
2. The typescript should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.
3. The title and section headings should highlight the significant points. A short abstract should precede the main text.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables.
7. References should be cited in the text, according to the Harvard (Author/date system), but giving the last name of the author(s) followed by a comma and the year of publication e.g. DICKEN & LLOYD 1979; FLETCHER 1978. If there is more than one work by an author in a given year, then label them alphabetically within each year, e.g. HALL, 1967a. The full references should be typed, *double-spaced*, on a separate sheet of paper at the end of the article. They must include the names and initials of all the authors, the year of publication, the full title of the article (or book), the standard abbreviated name of the journal.
SHEERIN, J. P. & ONG, R. S. B. 1980 *J. Plasma Phys.* 24, 157.
WHITTAKER, E. T. & WATSON, G. N. 1962 *A Course of Modern Analysis*, p. 36. Cambridge University Press, Cambridge.
8. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

LASER AND PARTICLE BEAMS

Volume 1 Part 4 December 1983

CONTENTS

G. Buchwald, G. Graebner, J. Theis, J. A. Maruhn, H. Stöcker and H. Kruse: Irradiation symmetry of heavy ion driven inertial confinement fusion (ICF) targets. 335

D. A. Steinman, R. A. Lee and W. J. Hillegas: Targets for X-ray laser experiments 347

G. J. Tallents: A numerical investigation of laser pressure effects in underdense plasmas 353

D. Subbarao, R. Uma and A. K. Ghatak: Wave optical theory for fast self-focusing of laser beams in plasmas 367

P. Mulser and H. Schnabl: Excitation of large amplitude electron plasma waves by laser 379

J. A. Kunc, S. Guha and M. A. Gundersen: A fundamental theory of high power thyatrons I: The electron temperature 395

J. A. Kunc, and M. A. Gundersen: A fundamental theory of high power thyatrons II: The production of atomic hydrogen and positive ions 407

Mitsuhiko Nambu: A new laser effect in plasma turbulence based on a bremsstrahlung instability 427
