The Journal of Laryngology & Otology

The Journal of Laryngology & Otology (JLO) is a leading, monthly journal containing original scientific articles and clinical records in otology, rhinology, laryngology and related specialties.

Founded in 1887, JLO is absorbing reading for ENT specialists and trainees. The journal has an international outlook with contributions from around the world, relevant to all specialists in this area regardless of the country in which they practise. JLO contains main articles (original, review and historical), case reports and short communications, a selection of abstracts, book reviews, letters to the editor, general notes and calendar, operative surgery techniques, and occasional supplements. It is fully illustrated and has become a definitive reference source in this fast-moving subject area.

Published monthly, an annual subscription is excellent value for money. Included in the subscription is access to the JLO interactive website with searchable abstract database of the journal archive dating back to 1887. There is also electronic access to forthcoming articles published ahead of print, and articles published exclusively online.

The Journal of Laryngology & Otology Digital Archive 1887–2006.

Access every article from 1887 to 2006 online. The Archive is free to subscribers of the journal.

The Journal of Laryngology & Otology Digital Archive is a repository of every single article published in the journal between 1887 and 2006. It houses over 116,948 pages of content, reproduced as high-resolution, searchable PDFs. The Archive marks the complete digitisation of *The Journal of Laryngology & Otology*, with all material available through Cambridge Journals Online.

The archive contains approximately 14,606 articles from the journal's first 119 volumes – 1,428 issues in total.
