Keywords: environment; nursing home; residential care home; sense of home; belonging; dementia; Alzheimer's disease; ethnography

A spelling error in the conclusion of this article gives a misleading impression:

Overall, the present study contributes to the discussion on the dilemma between nursing homes as home and institution by adding nuances to the understanding of how inhabiting as well as supporting aspects of the institution are enacted.

It should in fact read:

Overall, the present study contributes to the discussion on the dilemma between nursing homes as home and institution by adding nuances to the understanding of how inhibiting as well as supporting aspects of the institution are enacted.
